PROFESSIONAL SUMMARY

Supply Chain Analyst with 3+ years of experience managing end-to-end supply chain operations, including procurement, demand planning, inventory optimization, supplier management, and logistics coordination. Skilled in analyzing supply chain KPIs, improving forecasting accuracy, optimizing inventory levels, reducing costs, and enhancing operational efficiency through data-driven solutions. Experienced with SAP, Oracle ERP, WMS, TMS, Power BI, Tableau, SQL, Python, and Advanced Excel for reporting automation, analytics, and decision support. Proven ability to improve supplier performance, streamline procurement processes, reduce inventory risks, and implement process improvements. Strong collaborator with cross-functional teams including procurement, finance, warehouse, and logistics to drive business performance and achieve supply chain objectives.

SKILLS

- **Supply Chain:** End-to-End Supply Chain Operations, S&OP, Demand Planning, Inventory Control, Order Management, Procurement, Sourcing, Supplier Management, Logistics Coordination
- **Inventory & Planning:** Safety Stock Calculation, Reorder Point Optimization, Inventory Aging Analysis, Cycle Count Management, Dead Stock Reduction, Stockout Prevention
- **Procurement:** Purchase Order Management, Vendor Onboarding, Contract Compliance, Spend Analysis, Cost Variance Tracking, Supplier Scorecards, SLA Management
- **Logistics:** Freight Analysis, Inbound/Outbound Coordination, Carrier Performance Monitoring, Shipment Consolidation, Warehouse Operations Support
- **Process Improvement:** Root Cause Analysis, Pareto Analysis, Fishbone Diagram, SOPs, KPI Design, Workflow Automation, Cross-functional Alignment
- **Tools & Systems:** SAP, Oracle ERP, WMS, TMS, Power BI, Tableau, Advanced Excel (VLOOKUP, Pivot Tables), SQL, Python, Power Automate

EXPERIENCE

Supply Chain Analyst

Jan 2025 – Present

Prozech

USA

- Monitored end-to-end supply chain KPIs — on-time delivery, fill rate, inventory turnover, and procurement cycle time — across 5+ ERP systems, enabling same-day operational decisions by senior leadership.
- Identified a recurring supplier lead-time discrepancy through structured trend analysis, coordinated SLA renegotiation with procurement, and improved on-time delivery from 74% to 91% within 60 days.
- Supported procurement operations by tracking purchase orders, validating goods-received confirmations, and flagging quantity discrepancies to prevent invoice disputes and maintain contract compliance.
- Collaborated with operations and finance teams to build a cost-variance tracking process, surfacing \$120K in avoidable procurement spend in the first quarter and enabling targeted budget corrections.
- Analyzed freight spend patterns across distribution lanes and recommended shipment consolidation, producing an estimated 15% reduction in freight costs.
- Automated weekly supply chain status reporting using Power Automate and Power BI, replacing manual Excel consolidation and reclaiming 6+ hours of analyst time per week.
- Coordinated with warehouse and logistics teams to resolve inventory discrepancies and short shipments, implementing corrective workflows that reduced recurring fulfillment errors by 20%.

Supply Chain Analyst

Jun 2022 – Dec 2023

Anvizon

India

- Managed procurement and inventory operations across 15+ product categories, coordinating replenishment orders and adjusting reorder points to reduce excess inventory holding costs by 18%.
- Developed a demand forecasting process using moving average and exponential smoothing, improving forecast accuracy by 14% and reducing stockout incidents by 25% across key product lines.
- Led supplier performance reviews using Pareto analysis and fishbone diagrams, identifying 3 vendors responsible for 65% of delivery delays and driving corrective action that improved reliability by 28%.
- Designed a vendor scorecard program monitoring on-time delivery, quality defect rates, and cost compliance across 20+ suppliers, improving average vendor performance scores by 21% within two quarters.
- Collaborated with warehouse and logistics teams to re-sequence picking routes based on order frequency data, achieving a 12% reduction in warehouse cycle time and saving 15 labor hours per week.

PROJECTS

Supplier Performance & Risk Monitoring System

Power BI, SAP, SQL, Excel

- Built a supplier risk monitoring framework tracking lead-time compliance, quality defect trends, and cost variance across 30+ vendors, providing procurement leadership with a weekly risk-ranked supplier view.
- Identified 3 high-risk suppliers driving 70% of supply disruptions, supporting sourcing decisions that reduced single-source dependency and improved supply continuity.

Inventory Optimization & Demand Planning Model

Excel, Python, Tableau

- Designed a SKU-level inventory planning model incorporating demand forecasts, supplier lead times, and service level targets to calculate dynamic safety stock and reorder points across a 400-item portfolio.
- Reduced average inventory days-on-hand by 15% while maintaining a 98% service level by right-sizing safety stock buffers based on historical demand variability.

EDUCATION

Master of Science in Computer Science

Jan 2024 – Dec 2025

Lamar University

Beaumont, TX

CERTIFICATIONS

- APICS Certified in Planning and Inventory Management (CPIM) – ASCM
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Microsoft
- Tableau Desktop Specialist – Tableau / Salesforce
- Lean Six Sigma Yellow Belt – IASSC / ASQ
