

SUMMARY

Software Engineer with 4+ years building distributed systems, scalable APIs, and cloud infrastructure across enterprise and healthcare platforms. Currently designing HIPAA-compliant AI agents at Lili Solutions Inc. Delivered production systems for Amazon and Puma, with a track record of owning features end-to-end on GCP, AWS, Firebase, and Azure.

PROFESSIONAL EXPERIENCE

Software Engineer | Lili Solutions Inc. | Remote, WA

Apr 2026 – Present

- **Design** and integrate HIPAA-compliant AI agents and patient-facing healthcare workflows using RetellAI, ElevenLabs, and Twilio, reducing operational overhead by 4x across 5+ automated healthcare scenarios.
- **Developed** EHR integration and patient registration workflows with insurance eligibility verification using Stedi, reducing manual insurance checks by ~80% and streamlining patient onboarding for healthcare practices.
- **Architect** multi-tenant backend infrastructure on GCP using Cloud Functions, Firestore, and Secret Manager, supporting 5+ concurrent healthcare clients with HIPAA-compliant data isolation and Zero-Trust security.
- **Engineer** full-stack healthcare applications integrating GCP, Firebase, and LangChain, using Claude Code and GitHub Copilot to accelerate feature delivery and maintain code quality end-to-end.
- **Author** PRD, SRS, and system architecture documentation covering security controls aligned to OWASP Top 10, data models, and evaluation frameworks for AI-driven healthcare applications.

Software Developer | VersionX Innovations | Bengaluru, India

Jan 2021 – Apr 2023

- **Architected** 15+ REST APIs via Express/Node.js microservices, powering enterprise workloads for 200+ concurrent users across 5+ client integrations.
- **Orchestrated** multi-phase AngularJS to Angular 12 migration across 8 enterprise logistics modules, cutting bundle size by ~30% and reducing page load time by 2s.
- **Optimized** API performance for 50+ enterprise users, reducing latency by 30% via bottleneck profiling; used GitHub Copilot to accelerate feature delivery.
- **Streamlined** CI/CD pipelines on Azure via Jenkins and GitHub Actions, cutting release cycle time by ~40% and saving 6+ hours of manual effort weekly.
- **Led** development and backend delivery for enterprise security projects at Amazon and Puma using Angular and Node.js, building threat detection systems and face recognition attendance tools with RFID hardware integration.
- **Managed** end-to-end project delivery for a London-based security client, coordinating tech and testing teams via Asana, contributing to development, and achieving successful client sign-off.

Cloud Computing Developer | Oregon State University | Corvallis, OR

May 2025 – Apr 2026

- **Validated** end-to-end FaaS workflow execution across Python and R runtimes on GitHub Actions and MinIO, ensuring correctness of multi-step orchestration pipelines.
- **Diagnosed** and resolved serverless container failures, tracing dependency conflicts, S3 transfer errors, and inter-step state corruption, reducing pipeline incident resolution time by ~40%.

IAM Assistant | Oregon State University | Corvallis, OR

Feb 2024 – Mar 2025

- **Transitioned** ITSM workflows from TeamDynamix to ServiceNow, increasing system performance and audit traceability.
- **Automated** user lifecycle workflows in Python and Bash, eliminating 80+ manual steps and reducing access-related incidents by 14/month; secured 200+ requests via OAuth 2.0 and TLS.

PROJECTS

- **Subscription Management:** Full-stack Angular + Firebase platform with real-time analytics dashboards; reduced API load by 25% via GraphQL optimization.
- **E-commerce Test Automation:** Selenium framework validating 50+ UI workflows and 100+ API endpoints; reduced regressions by 80% via GitHub Actions + Jenkins.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java

Frameworks: React, Angular, Node.js, Express, Spring Boot, Flask, .NET Core, REST, GraphQL

Cloud & Infra: GCP, AWS, Azure, Firebase, Cloud Functions, Secret Manager, Docker, Kubernetes, Terraform, Jenkins

Databases: PostgreSQL, MySQL, MongoDB, Firestore, SQL Server, Elasticsearch

AI / ML & Data: LangChain, OpenAI API, RetellAI, ElevenLabs, Twilio, Claude Code, Cursor, GitHub Copilot

Observability / Methods: Grafana, Prometheus, Splunk, OAuth 2.0, TLS, IAM, Agile, Scrum, Jira, TDD

EDUCATION

Master of Science in Computer Science | Oregon State University | Corvallis, OR

Sep 2023 – Mar 2025

B.Tech. in Information Science and Engineering | Jain University | Bengaluru, India

Aug 2016 – Jul 2020
