

Otabek Abdurashidov

Software Engineer · Python Developer

otabekabdurashidov01@gmail.com | +1 (615) 626 0892 | United States

SUMMARY

Dedicated engineer with a strong focus on Python development and backend systems. I am passionate about writing clean, maintainable code and developing RESTful APIs that interface with relational databases like PostgreSQL. My background includes building automated workflows and managing data processing pipelines across cloud platforms while ensuring high code quality through testing and documentation.

SKILLS

Languages: Python, PySpark, SQL, T-SQL, PL/SQL, C#

Web Frameworks & APIs: Django, Flask, FastAPI, RESTful APIs, Third-party API Integrations

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis

Tools & Version Control: Git, GitHub, Docker, Kubernetes, Jira, PyTest, CI/CD pipelines

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP)

WORK EXPERIENCE

Software Engineer

Uber (Remote) | Nashville, TN | 04/2022 - 07/2026

- Developed Python based applications using frameworks like FastAPI to process data and integrate it into cloud storage.
- Built and integrated RESTful APIs to facilitate communication between backend services and external data providers.
- Wrote clean and reusable code for production environments while focusing on performance and long term maintainability.
- Collaborated with software engineers and product teams to design efficient automation workflows for complex data movement.
- Troubleshoot application issues by analyzing system logs and performing performance improvements for internal services.
- Managed version control workflows using Git and GitHub to ensure team collaboration and code quality across projects.
- Configured Azure cloud components including blob storage and automated pipelines for efficient data movement and storage.
- Participated in regular code reviews and contributed to technical documentation to support engineering best practices.

- Integrated third party API integrations to expand the capabilities of internal data processing and automation tools.
- Utilized SQL window functions and complex joins to verify data integrity across multiple relational database platforms.

Software Engineer

YRC Freight (Remote) | Nashville, TN | 03/2019 - 04/2022

- Created complex T-SQL code including stored procedures and functions to maintain application level logic and data integrity.
- Developed backend scripts using Python to automate ETL workflows and load data from sources like CSV and Flat files.
- Optimized database performance by analyzing execution plans and implementing indexing strategies for PostgreSQL and SQL Server.
- Built custom logging frameworks in Python to ensure reliable data processing and automated monitoring of cloud services.
- Implemented unit testing practices using PyTest to ensure the reliability of code deployments within the software lifecycle.
- Followed Agile software development practices while working with cross functional teams to deliver software solutions.
- Maintained hybrid cloud deployments to ensure consistent data flow between local systems and Azure environments.
- Assisted with the design of source to target mapping documents for enterprise wide database migration projects.
- Converted legacy reporting systems to modern formats to improve reporting standardization and performance across the company.
- Contributed to technical documentation and the development of internal tools using Python web frameworks like Flask.

EDUCATION

Bachelor's Degree in Computer Science

Webster University | Grade: 4.0/4.0 | Saint Louis, MO, USA

Certificate of Complete Secondary Education, Database

International House - Tashkent academic lyceum | Grade: 5.0/5.0 | Tashkent, UZ

ACHIEVEMENTS

- TED-ED Speaker: Selected speaker for TEDx TALKS in Tashkent, Uzbekistan, focusing on technical topics and data education.
