SUMMARY

Python-first Full-Stack Engineer with 5 years of experience designing and building production-grade web applications using React and Python (Django, FastAPI), with additional experience in Java and Go. Proficient in improving application performance by 30% through API optimization and efficient system design. Strong background in developing scalable microservices, enhancing reliability, and delivering secure, cloud-native solutions on AWS and GCP. Experienced in CI/CD automation, security-focused development, and cross-functional collaboration in agile environments.

WORK EXPERIENCE

Sabre

Full-Stack Engineer

USA

Apr 2022 – Present

- Designed and deployed 15+ production-grade React applications integrated with Spring Boot, Django, and FastAPI services, supporting 8,000+ monthly active users across enterprise platforms.
- Built and standardized 40+ reusable React UI components and shared design patterns, reducing feature development time by 30 hours per sprint and improving cross-team maintainability.
- Engineered 25+ secure REST APIs using OAuth2 and Azure AD authentication, reducing average API response time from 420ms to 310ms while enforcing enterprise-grade access control for 1,200+ internal users.
- Developed scalable backend modules using PostgreSQL and MySQL, optimizing 60+ complex queries and reducing database execution time from 3.2 seconds to under 1.4 seconds.
- Strengthened CI/CD pipelines using Docker, Kubernetes, Terraform, Jenkins, and GitHub Actions, reducing deployment time from 45 minutes to 18 minutes and enabling 3–5 stable releases per week.
- Integrated Datadog and Splunk monitoring across 20+ microservices, decreasing incident resolution time from 6 hours to under 2 hours and improving overall production uptime to 99.9%.

L'Oréal

Full-Stack Engineer

USA

May 2020 – Mar 2022

- Developed and maintained 10+ consumer-facing web applications using React, Django, and Spring Boot, supporting e-commerce and digital marketing platforms used by 5,000+ daily users.
- Designed and enhanced 30+ REST and GraphQL APIs to support frontend features and third-party integrations, reducing frontend-backend dependency resolution time by 25 hours per release cycle.
- Implemented backend services using FastAPI and Node.js for 8+ secure third-party integrations (payment gateways, CRM, analytics tools), improving data exchange reliability and reducing manual processing efforts by 15 hours per week.
- Optimized 50+ complex SQL queries across PostgreSQL, MySQL, and DynamoDB, reducing average page load time from 3.5 seconds to 2.8 seconds and improving overall application responsiveness by 20%.
- Containerized 12+ applications using Docker and deployed on AWS EKS with Kubernetes, enabling zero-downtime deployments and supporting 99.8% production uptime.

Unilever

Junior Software Engineer

USA

Nov 2019 – Apr 2020

- Engineered and enhanced 6+ Python backend modules supporting internal supply chain and inventory management systems used by regional operations teams, ensuring accurate product tracking and order processing.
- Designed and implemented 10+ RESTful API endpoints for product catalog and stock updates, enabling seamless integration between backend services, frontend dashboards, and third-party reporting tools.
- Analyzed application logs and debugged 15+ production and UAT defects, performing structured root cause analysis to prevent recurring issues in subsequent releases.
- Strengthened application reliability by implementing structured input validation, centralized logging, and exception handling across multiple service layers, improving debugging efficiency and system stability.
- Collaborated within a 5-member Agile team (frontend, QA, product owner) to deliver 8+ feature enhancements across three sprint cycles, ensuring timely releases and alignment with business requirements.

TECHNICAL SKILLS

- Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3
- Backend:** Python (Django, FastAPI), Java (Spring Boot), Go, Node.js, REST APIs, GraphQL, OAuth2
- Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB
- Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions
- Observability & Security:** Datadog, Splunk, Veracode, Qualys, Synack

EDUCATION

Geetam University

Bachelor of Business Administration

May 2007 – May 2010
