EXPERIENCE

Twitch (an Amazon's company), San Francisco, CA

July 2025 – Now

Software Engineer- Membership & Monetization

- Launched a new server-rendered UI component (**React**, **node tokenization**, **GraphQL**, **Go**) to reduce the time-to-launch for all promotional banners from **2 weeks to 1 day**. The component was used to generate all the banners in Twitch's annual subscription campaign (SUBS-tember), which projects to **generate \$2M+ in revenue**.
- Trained & built an internal chatbot (**Claude 3.7 Sonnet**, deployed to **AWS Bedrock**) that helped **5 engineers** in the Monetization org accelerate their onboarding time from 3 weeks to 4 days.

Turo, San Francisco, CA

August 2024 – July 2025

Software Engineer- Payments team

- Launched 2 new microservices in **Java Spring Boot**, **Kotlin**, and **MySQL** that migrated from a Monolithic codebase to handle showing earnings and sending payouts to **50 million car owners** (Turo hosts).
- Designed a new multi-layer **locking & alert mechanism** in **MySQL**, **New Relic**, and **Stripe** (pessimistic database lock & Stripe Idempotency key) to prevent race conditions and duplicate executions in sending payouts in 2 separate systems.
- Architected a workflow scheduling algorithm in **Temporal Cloud** to reduce the number of redundant workflows by **35%** while increasing the frequency of payouts execution to **every 24 hours per host**.
- Automated the experiment rollout process for a **team of 11** by integrating **Flagr** for feature flags & wrote **3 Python scripts** to streamline local feature flag testing (unit tests, integration tests on **Docker** containers, and component tests).

Illumio, Sunnyvale, CA

May 2024 – August 2024

Software Engineer Intern- CloudSecure Team

- Launched the 1st version of CloudSecure Insights, which summarizes the network traffic activities in customer clouds over **90 days**, to **15 enterprise clients** (**Golang** + **gRPC**, **PostgreSQL**, **Redis**, **Kubernetes**).
- Developed **3 types of traffic insights** to expose network requests from internal virtual machines to external cloud providers (classified by the receivers' IP addresses).
- Architected a new method of returning the raw amount of traffic logs processed via AWS & Microsoft Azure (average of **400GB/month/client**) to power the revamp of Illumio's usage page.

Zillow, Remote, CA

May 2023 – August 2023

Software Development Intern- Connection Platform Team

- Utilized **Golang**, **React** with **TypeScript**, **C# .NET**, and **PostgreSQL** to launch an internal tool to help developers, customer representatives, and business operators audit & troubleshoot phone-related issues **20% faster**.
- Engineered a new **GraphQL** query in **C# .NET** to aggregate over **3.5 million** Twilio phone calls and conferences per month, with the average performance of 90ms/query.
- Collaborated with a cross-functional team of 11 engineers, designers, and product managers to deliver a Hackweek project that streamlined case generation for test automation by 2x in case volume.

Mintlify (YC W22), Remote, NY

May 2022 – July 2022

Software Developer Intern

- Engineered **3 API integrations** for documentation's content scraping: Notion Pages, Google Docs, and Confluence Pages.
- Launched the v1 on Product Hunt, which ranks as the **1st Product of the Day** with **923 upvotes**.

EDUCATION

California State University, East Bay – B.S. Computer Science

Jan 2023 – May 2024

- Relevant coursework: Artificial Intelligence, Computer Network Architecture, Operating System, Advanced Programming with Data Structures in **C++**, Computer Organization AND Assembly Language Programming, Analysis of Algorithms.

SKILLS

- Programming Languages:** JavaScript & TypeScript ❤️, Python, C++, Go, Java, Swift, Assembly.
- Framework:** React & React Native, Jest, Flask, TailwindCSS, NextJS, NodeJS/Express, gRPC, Docker, MongoDB, Redis, PostgreSQL.
- Tools:** AWS, Linux, Algolia, Twilio, Git, Heroku.

HONORS & AWARDS

- Winner of the best Fintech hack out of ~1500 participants- Stanford University's Treehacks 2023.**
- Google CS Research Mentorship Awardee 2021 – Machine Learning and Augmented Reality track (top 2% applicants).**
