Summary

Innovative and detail-oriented Computer Engineering graduate with hands-on experience deploying and supporting complex hardware and software systems. Proven ability to lead multi-site installations of point-of-sale solutions, develop custom test fixtures, and troubleshoot hardware, software, and networking issues under tight deadlines. Skilled in C/C++, Python, SQL, ARM Assembly, and electronics repair, with a strong foundation in Linux and Windows environments. Adept at authoring process documentation—including work instructions, quality plans, and inspection criteria—to enable scalable testing and deployment. Collaborative team player with internship and student-assistant roles that demonstrate leadership, customer focus, and a passion for continuous technical learning.

Education

Kennesaw State University, Marietta, GA

Bachelor of Science in Computer Engineering, December 2022

GPA: 3.0

Relevant Coursework: C++/Python Fundamentals, Networking, Project Design & Electrical Systems

Experience

POS Unlimited, Atlanta, GA

Systems Support Technician | July 2023 – July 2024

- Owned end-to-end deployment of multi-site POS hardware, developing repeatable installation and configuration processes across 80+ retail locations.
- Authored detailed work instructions, quality inspection checklists, and process flows for hardware deployment and network integration.
- Played central part in a team of five technicians, driving on-site and remote troubleshooting and rapid prototyping of hardware and software fixes.
- Queried SQL databases to gain insight as to the cause of software-related issues.

Kennesaw State University – Johnson Library, Marietta, GA

Student Assistant | September 2021 – December 2022

- Maintained and repaired library computer workstations, printers and peripherals, including hardware troubleshooting and software configuration.
 - Streamlined equipment checkout procedures and inventory management, ensuring high levels of customer satisfaction.
-

Projects/Certifications

- Currently pursuing certification for Google Data Analytics Professional
 - AT&T Summer Learning Academy Extern - <https://www.credly.com/badges/2cdd7e3e-34d7-4e64-80d2-3e750ca0a2ca>
 - Full project portfolio: <https://bit.ly/PeterStepkaProjects>
-

Skills

Hardware, Software & Scripting

- Python, C/C++, SQL, Bash, automation scripting for testing, data gathering/analysis and validation
- Hardware Troubleshooting, including modern and legacy PC systems

Tools & Environments

- Linux, Windows, Microsoft Office, POS platforms, Network Diagnostic utilities, Legacy systems
-

Additional Information

- U.S. Person; eligible for U.S. export-controlled facilities and clearance
- Available to start full-time immediately
- Currently based in Atlanta, GA area; open and willing to relocate with limited notice
