

Software Developer Automation Framework | Expert in Mobile & Web & API | CI/CD | Performance Testing**OBJECTIVE**

Innovative Software QA Automation Engineer with over 9 years of experience in software quality assurance and over 16 years in IT. Passionate about solving complex challenges, collaborating with creative teams, and contributing to transformative projects that make an impact.

SUMMARY

- Proficient in white-box, grey-box, and black-box testing; automation; performance and load testing (JMeter).
- Extensive experience with backend testing (RESTful API Web Services) using manual tools (Postman/Swagger) and automation frameworks.
- Experienced in testing big data applications.
- Expertise in web application testing using Selenium WebDriver and mobile app testing (iOS/Android) with Appium.
- Skilled in CI/CD processes using Jenkins.
- Programming languages: Java, C#, Swift, JavaScript/TypeScript, Python, Scala, SQL.
- Frameworks: Maven, Cucumber, TestNG/JUnit, XCTest/XCPreTTY, Cypress/Playwright, Robot Framework, ScalaTest/MUnit.
- Tools: Jira, Bugzilla, Confluence; Git; PostgreSQL, Oracle, MongoDB.

EXPERIENCE**Senior Software Quality Assurance Engineer****Mar 2019 – Present****Dynamic Signal by FirstUp**, Remote (from Florida)

- Designed structure of POM and implemented an integrated automation framework (API/Web) using C# and Selenium.
- Developed API tests in JavaScript/TypeScript (Postman) and enhanced UI testing with Cypress/Playwright.
- Created from scratch and maintained mobile app automation frameworks using Java (Appium) and Swift (XCTest).
- Led development of platform's integration testing framework for iOS/Android applications.
- Conducted load testing using JMeter and accessibility testing with 508, Axe and Lighthouse.
- Created test cases/scenarios for features, automated test scenarios, improving regression test coverage by 30%.
- Adjusted myself or created tickets for mobile app developers to add data-test-id-s to allow reliable access of the UI elements.
- Installed and configured Jenkins on the server to schedule job runs.
- Trained manual QA team to contribute to automation, enhancing team efficiency.

Software Quality Assurance Engineer**Jan 2017 – Mar 2019****AnchorFree**, Redwood city, CA

- Tested VPN application behavior under various network conditions and interruptions.
- Improved existing test plans and created new ones in TestRail.
- Developed automation frameworks for RESTful API Web Services and mobile apps using Java, Maven, Appium.
- Enhanced reliability and performance of automated tests through XPath optimization.
- Analyzed logs by tools: ADB command, Xcode/Console/Apple Configurator 2, ensuring rapid issue identification.
- Tested VPN connection with third-party apps (Charles or WireShark).

Software Quality Assurance Engineer

Apr 2015 – Jan 2017

WILLIAMS-SONOMA, San Francisco, CA

- Developed E2E automation frameworks using Java/TestNG, Scala/ScalaTest, and Selenium.
- Reduced regression test execution time by 50% by implementing new technologies.
- Reduced the number of lines of code in 10–15 times by using Page Object Model (POM) & Page Factory.
- Migrated reporting from TestNG to Allure, providing actionable insights to upper management.
- Conducted performance testing and enhanced test reliability with improved XPath techniques.

Lived in Russia and worked as a Network Administrator

2007 – 2015

CERTIFICATIONS

OCA Java SE 7 Programmer – 1Z0-803 Certificate

2017

Oracle University, Redwood City, CA

EDUCATION

M.S. Automated Systems of Information Processing and Management

2010

South Ural State University, Chelyabinsk, Russia

B.S. Computer Science

2003

Troitsk Civil Aviation Technical College, Troitsk, Russia

SKILLS

- Automation Tools: Selenium, Appium, JMeter, Cypress, Playwright.
- Languages: Java, C#, JavaScript/TypeScript, Python, Scala, Swift.
- CI/CD: Jenkins.
- Databases: PostgreSQL, Oracle, MongoDB.
- Test Management: Jira, TestRail.
- Reporting: Allure, TestNG.

ACHIEVEMENTS

- Improved regression test runtime by 50%, optimizing productivity and cost.
- Designed and implemented cross-platform Web/mobile app automation frameworks from scratch.
- Successfully trained and integrated manual QA teams into automation workflows.
