

POORNA CHAND YANAMADALA

Java Full Stack Developer

CONTACT

Phone: (475) 237 7881

Location: Cedar Rapids, Iowa

Email: poornachand621@gmail.com

SUMMARY

Full Stack Developer with 6 years of experience building scalable, high-performance web and mobile applications. Proficient in backend technologies including Java, JavaScript, and Python, and experienced with modern frontend frameworks such as Vue.js, React, React Native, and Angular. Skilled in working with relational databases like MySQL, Oracle, and PostgreSQL, and integrating third-party APIs such as Google Maps. Strong problem-solving, debugging, and version control skills with Git. Experienced in Agile workflows, cloud-native deployments, DevOps automation, and implementing enterprise-grade security. Passionate about continuous learning and delivering user-focused, data-intensive, and real-time applications.

EDUCATION

M.S. Applied Computer Science

Northwest Missouri State University (2021-23)

B.S. Computer Science

KL University (2014-18)

PROFESSIONAL EXPERIENCE

Advithri Technologies, LLC

Client: Sherwin Williams

Java Full Stack Developer – September 2022-Present

- Developed and maintained Vue 3 applications using JavaScript, TypeScript, Composition API, and Pinia, delivering responsive, scalable, and user-focused interfaces.
- Collaborated with UX/UI designers to create wireframes and design flows, contributing to intuitive, accessible, and responsive web applications for desktop and small-screen devices.
- Engineered RESTful microservices using Java 17, Spring Boot, and JAX-RS (Jersey), deployed on Apache Tomcat for scalable backend services.
- Secured applications through Spring Security with OAuth2, OpenID Connect, and SAML, implementing robust enterprise-level authentication and authorization flows.
- Designed and implemented persistence layers using Spring Data JPA, Hibernate, and JDBC, with PostgreSQL and MySQL databases.
- Built concurrent and asynchronous services using Java Streams, multithreading, and HTTP-based integrations to enhance backend performance.
- Optimized SQL performance through indexing, normalization, and query tuning, reducing latency and improving data access efficiency.
- Connected frontend Vue 3 apps to backend APIs via REST, ensuring secure and performant client-server communication.
- Integrated Google Maps API for geospatial tracking and real-time delivery route visualization in a centralized POS delivery management system.
- Delivered scheduling and delivery management features to streamline logistics and supply chain coordination in point-of-sale systems.
- Containerized and deployed services using Docker and Kubernetes on AWS and Oracle Cloud, improving scalability and operational resilience.
- Utilized Node.js tooling for frontend workflows, including npm package management, Vite module bundling, and build automation.
- Built CI/CD pipelines using Git, Jenkins, and Maven to accelerate delivery, improve testing, and reduce deployment risk.
- Wrote unit and component tests using Vue Test Utils and Jest; implemented E2E tests using Cypress to ensure feature integrity and regression protection.
- Wrote and maintained comprehensive unit and integration tests using JUnit and Mockito to ensure code quality and reliability.
- Actively participated in Agile ceremonies (planning, daily standups, retrospectives), contributing to collaborative, iterative development.

Tools & Languages: Vue 3, TypeScript, Pinia, Composition API, Node.js Java 17, Spring Boot, JAX-RS, Spring Security (OAuth2, SAML), Google Maps API, PostgreSQL, MySQL, Terraform, Chef, Docker, Kubernetes, AWS, Oracle Cloud, Jenkins, Git, Maven, JUnit, Mockito, Cypress, Kafka

IVY Works (India)

Java Full Stack Developer – January 2019-July 2021

- Built a full-stack application using Java 8 (Spring Boot) and React, delivering responsive and mobile-accessible interfaces for web and Android/iOS platforms.
- Implemented Redux-based state management to handle complex user interactions and data flows across devices.
- Developed and styled mobile-friendly UIs adhering to responsive design principles and modern UI/UX standards.
- Integrated RESTful APIs and SOAP web services to facilitate secure, scalable data exchange between frontend and backend.
- Designed and optimized SQL queries for Oracle 10g and MySQL databases to ensure fast, reliable data operations.
- Followed Agile practices and clean code principles; used Git for version control and collaborated closely with backend, QA, and design teams

Tools & Languages: React, Redux, Java 8, Spring Boot, Oracle 10g, MySQL, REST APIs, SOAP, Git

SKILLS/LANGUAGES

Programming Languages & Frameworks:

- Java / J2EE
- Spring Boot, Spring Framework, Spring Data, Node Js
- Node.js, Python, C++
- TypeScript, JavaScript
- HTML5, CSS3, SASS
- Vue.js, React.js, React Native
- AJAX, jQuery, JSON

Web Services:

- RESTful APIs, SOAP Web Services
- JPA (Java Persistence API)

Databases:

- PostgreSQL, MySQL, Oracle SQL Developer, Cassandra
- Version Control & DevOps:
- Git, Maven
- CI/CD (Jenkins)

Cloud & Deployment:

- AWS, Kubernetes, Docker

Additional Tools & Technologies:

- Kafka
- RxJS, NgRx, Pinia
- Agile / Scrum
