

PRANAV GOGINENI

SOFTWARE DEVELOPMENT ENGINEER

Email: nagapranavg@gmail.com | Phone: +1 (980) 413-6435 | LinkedIn: <https://www.linkedin.com/in/pranav-gogineni/>

PROFESSIONAL SUMMARY

Results-driven Software Engineer with over **4 years of experience** building **scalable full-stack web applications** and **backend services** across enterprise environments. Specialized in modern **JavaScript frameworks (React, Node.js)**, backend technologies (**Spring Boot, Django**), and **cloud-native deployments** using **AWS** and **Docker**. Recently focused on integrating **Generative AI (GPT-4, LangChain, OpenAI APIs)** into internal developer tooling, automation, and **knowledge management systems** to improve operational efficiency and support workflows. Strong foundation in **software design, system architecture**, and real-world application of **large language models (LLMs)**.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript, TypeScript, React.js, Node.js, Spring Boot, Django

AI/ML: GPT-4, LangChain, OpenAI APIs, Prompt Engineering, Hugging Face, Pinecone

Cloud & DevOps: AWS (Lambda, S3, ECS), Docker, Kubernetes, GitHub Actions, Terraform

Databases: PostgreSQL, MongoDB, Redis, MySQL

Testing & Tools: Jest, Cypress, Postman, Git, Jira, Confluence

Soft Skills: Problem Solving, Collaboration, Adaptability, Attention to Detail, Critical Thinking

PROFESSIONAL EXPERIENCE

Insight Enterprise

Role: Software Development Engineer

Feb 2024 – Present

- Designed and deployed an internal **AI-powered Copilot** using **GPT-4, LangChain**, and **embedding-based retrieval** to streamline access to technical documentation—reducing lookup time by 50%.
- Developed a **Retrieval-Augmented Generation (RAG)** based assistant using **OpenAI APIs** to support **IT operations**, resulting in a 30% improvement in support ticket resolution.
- Built scalable **Node.js microservices** containerized with **Docker** and deployed on **AWS ECS**, maintaining **99.99% uptime** across internal platforms.
- Created **real-time dashboards** using **React.js** and **AWS CloudWatch**, enabling proactive **incident detection** and faster resolution.

Tech Mahindra – Hyderabad, India

Role: Full Stack developer

Feb 2022– Jul 2023

- Developed interactive **self-service portals** using **React.js** and **GraphQL**, enhancing platform usability and increasing user engagement by **40%**.
- Integrated **GPT-3.5** into support applications to **automate email response generation** and **summarize call logs**, improving agent response time by 25%.
- Led the implementation of **automated testing pipelines** with **Jest** and **Cypress**, reducing manual QA efforts by **60%** and improving **deployment stability**.
- Created an **NLP-powered knowledge dashboard** for support teams, increasing **first-call resolution rates** by **25%** through **intelligent article recommendations**.

Tech Mahindra– Hyderabad, India

Role: Software Developer

May 2020– Feb 2022

- Developed **RESTful APIs** using **Java** and **Spring Boot** handling **20K+ transactions/day** with **95%+ unit test coverage**.
- Improved backend performance by **optimizing SQL queries** and introducing **Redis caching**, reducing **report generation latency by 35%**.
- Built **CI/CD pipelines** with **Jenkins and Docker**, streamlining deployments and reducing **release cycle time by 40%**.
- Implemented secure **API access** using **OAuth 2.0** and **rate-limiting controls** to ensure system reliability and compliance.
- Conducted thorough **integration testing** with **Postman** and monitored system metrics using **Prometheus and Grafana**.

EDUCATION

University of North Carolina at Charlotte

- GPA: 3.8/4.0
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theor

PROJECTS

AI-Powered DevOps Support Chatbot

Tools Used: Python, Flask, OpenAI GPT-4, AWS EC2, CloudWatch

- Built a **web-based chatbot** that interprets **AWS CloudWatch** alerts and **EC2 logs** in plain English using **GPT-4**, improving on-call support and reducing debugging time.
- Deployed with Flask on **Linux EC2**, using **OpenAI API** for natural language explanations.
- Focused on real-time **log interpretation**, cloud-native deployment, and **AI integration**.

AI-Powered Internal Search Tool for Technical Docs

Tools Used: Python, LangChain, OpenAI API, AWS S3, Streamlit

- Created a natural language search tool to query technical runbooks and setup guides, boosting team productivity.
- Integrated **LangChain** with **LLM embeddings** for smart document understanding.
- Deployed with **Streamlit** front-end and used **AWS S3** for secure data storage.
