

PRATHEEKSHA CHANDRA

Business Analyst | SQL, Tableau, Microsoft Visio, Python
9472521726 | c.pratheeksha87@gmail.com | linkedin.com/in/pratheekshachandra | West Bloomfield, MI

Professional Summary

Business Analyst with experience at Deloitte specializing in requirements gathering, process mapping, HRIS configuration, and business process improvement. Skilled in SQL, Tableau, Microsoft Visio, and Python with strong stakeholder management and presentation skills. Adept at creating reports, performing custom analysis, and delivering insights that support strategic decision-making.

Work Experience

DELOITTE USI – BUSINESS ANALYST – BENGALURU, INDIA | Sep 2022 – Mar 2024

- Partnered with stakeholders to gather, document, and validate business requirements (BRDs, FRDs, user stories).
- Configured and maintained SuccessFactors Employee Central components including RBP roles, workflows, picklists, translations, and document generation.
- Supported SIT, UAT, and defect triage, reducing post-go-live issues by 15%.
- Created process maps and workflows using Microsoft Visio in Agile/Scrum environments with JIRA and Confluence.
- Conducted HR data clean-up and migration activities, improving accuracy across systems.
- Built Tableau dashboards and Excel reports for HR leadership to track workforce KPIs.
- Facilitated stakeholder workshops and presented insights during All-Hands Meetings and leadership reviews.

PROFESSIONAL DEVELOPMENT & UPSKILLING | Mar 2024 – Present

- Continued professional growth with advanced learning in Python, data visualization, and reporting methods.

MZAALO (XFINITE TECHNOLOGIES) – INTERN – REMOTE, INDIA | Apr 2021 – May 2021

- Optimized recruitment operations including hiring, screening, and onboarding.
- Boosted app engagement, increasing Mzaalo users to 8.7k+ on Play Store & iOS.
- Supported cross-team collaboration to enhance performance tracking and engagement.

Projects

HR Process Workflow Redesign

- Analyzed existing HR workflows and identified bottlenecks in employee onboarding and document generation.
- Redesigned processes using Microsoft Visio and created documentation for RBP and workflow approvals.
- Improved onboarding efficiency by reducing process delays and ensuring accurate document management.

Sales Performance Optimization Dashboard

- Created Tableau dashboard visualizing sales, churn, and product performance.

Exploratory Data Analysis on COVID-19 Cases in India

- Performed data cleaning and analysis using Python (Pandas) on JSON datasets.
- Created visualizations in Matplotlib and Seaborn to track trends and impact.
