SUMMARY

Data Engineer with 3+ years of experience designing scalable data platforms and building high-performance analytics pipelines across fintech and telecom environments. Experienced in distributed data processing, real-time streaming, and cloud-native lakehouse architectures using Apache Spark, Kafka, and Flink. Skilled in developing reliable ETL and ELT frameworks, transforming large-scale transactional datasets, and optimizing analytical query performance. Proven ability to support fraud analytics, revenue assurance, and business intelligence initiatives by delivering trusted, well-governed datasets and resilient data infrastructure that enable faster insights and data-driven decision making.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Scala, R, Bash, PL/SQL

Data Engineering Technologies: Apache Spark, Apache Kafka, Apache Airflow, Apache Flink, Hadoop, Apache Hive, Apache Hudi, Apache NiFi, Delta Lake, Apache Iceberg, Databricks, dbt (Core & Cloud), Snowflake, Amazon Redshift, Google BigQuery, Azure Synapse Analytics, Trino, Presto, AWS EMR

Data Analysis & BI Tools: Power BI, Tableau, Looker, Microsoft Excel, Jupyter Notebook, Pandas, NumPy, SciPy, Matplotlib, Seaborn, Plotly, DAX, Power Query

Cloud & Data Platforms: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), Amazon S3, AWS Glue, AWS Lambda, Azure Data Factory, Azure Data Lake Storage, Google Cloud Storage, BigQuery Data Transfer Service

Data Modeling & Warehousing: Dimensional Modeling, Star Schema, Snowflake Schema, Data Warehousing, Data Lake Architecture, Data Lakehouse Architecture, Data Transformation, ETL Pipelines, ELT Pipelines, Data Integration, Data Migration, Data Quality Management

Data Governance, Orchestration & Infrastructure: Data Governance, Data Lineage, Metadata Management, Data Catalog, Apache Airflow Scheduling, Workflow Automation, Data Validation, Data Observability, Great Expectations, Data Security, Version Control (Git), CI/CD Pipelines, Docker, Kubernetes, Terraform

PROFESSIONAL EXPERIENCE

Data Engineer, *Chime*

Jan 2025 - Present | Remote, USA

- Engineered real-time financial transaction ingestion pipelines using Apache Flink and Google Cloud Pub/Sub, processing nearly twelve million daily card events into BigQuery datasets supporting fraud monitoring and risk analytics.
- Developed scalable ELT transformations using Trino and Apache Iceberg tables stored on Google Cloud Storage, consolidating twenty fintech transaction sources into standardized datasets for regulatory reporting.
- Implemented automated data quality monitoring frameworks using Great Expectations, validating financial event schemas and ensuring transaction consistency across streaming pipelines, reducing downstream reconciliation discrepancies by twenty-four percent.
- Optimized analytical performance of large BigQuery datasets by redesigning partitioning strategies and query patterns, decreasing average execution time for fraud detection analytics workloads by nearly twenty-nine percent.
- Designed Kubernetes-based containerized workflows integrated with Git-driven CI/CD pipelines, automating deployment of 25+ production data pipelines and reducing engineering release cycles by 40%.
- Developed curated analytical datasets powering 30+ Power BI and Tableau dashboards, enabling product and risk teams to monitor key financial metrics and improving reporting turnaround by 35%.
- Implemented data governance frameworks including lineage tracking and metadata cataloging across 50+ financial data pipelines, improving audit traceability and regulatory reporting readiness.

Data Engineer, *LTIMindtree*

Aug 2021 - Jul 2023 | Remote, India

- Built distributed telecom event ingestion pipelines using Apache Kafka and Apache NiFi, capturing nearly eight million daily network records and storing curated datasets within Azure Data Lake Storage.
- Engineered scalable batch processing workflows using Apache Spark with Scala on Databricks, transforming multi-source telecom usage data and reducing nightly processing latency across enterprise reporting systems.
- Designed dimensional data warehouse models in Azure Synapse Analytics using star schema architecture supporting 10+ telecom analytics dashboards and improving query performance by 30%.
- Implemented ELT transformation workflows using dbt and SQL pipelines, integrating over fifteen telecom billing datasets into structured warehouse tables supporting revenue assurance and customer analytics.
- Developed orchestration workflows using Apache Airflow scheduling and workflow automation, improving reliability of large-scale batch data processing pipelines across multiple telecom operational systems.
- Implemented Delta Lake lakehouse architecture on Azure storage environments, optimizing partition strategies and improving query performance for high-volume telecom analytical datasets by approximately twenty-six percent.
- Automated infrastructure provisioning using Docker and Terraform, standardizing deployment across 15+ data engineering environments and reducing environment setup time by 50%.

CERTIFICATIONS

- Machine Learning Essentials – AWS (Feb/2023)
- Advanced Google Analytics – GOOGLE (Jan/2025)

EDUCATION

Master of Science, *San Jose state university*

Aug 2023 to May 2025 | CA, USA

Data Analytics

Bachelor of Science, *Vellore institute of technology*

Jul 2019 to Apr 2023 | TN, India

Computer science
