New York, USA

☎ +1(929)293-5425 ✉ [dhruvpandoh29@gmail.com](mailto:dhruvpandoh29@gmail.com) [in dhruvpandoh](https://www.linkedin.com/in/dhruvpandoh)

## Education

### New York University

Expected May 2026

*Master of Science in Computer Science*

*New York, USA*

- Relevant Coursework: Artificial Intelligence, Web Search Engines, Design and Analysis of Algorithms, Human Computer Interaction, Big Data, Machine Learning, Information Visualization

### SRM Institute of Science and Technology

September 2020 – May 2024

*Bachelor of Technology in Computer Science and Engineering*

*Chennai, India*

- Relevant Coursework: Operating Systems, Software Engineering, Object Oriented Programming, Computer Networks, Database Management Systems, Conversational AI

## Work Experience

### McKinsey Investment Office (MIO Partners)

May 2025 – August 2025

*Software Engineering Intern*

*New York, USA*

- Designed and deployed a **full-stack** MIO Calculator Registration and Update platform using **React, React-Hook-Form, AWS Lambda (Python), SQL database** integration, and **Jenkins pipelines with SVN commits**, replacing manual Excel workflows and **reducing onboarding time by 80%**.
- Improved reliability and user experience by implementing dynamic parameter handling, autocomplete prefill, and real-time validation with inline error checks, **cutting deployment failures by 60%**.
- Validated the platform **end-to-end** through **Excel Add-In and Python Add-In**, reinforced with **unit and integration tests**, which increased confidence and adoption among business teams.
- Built a real-time Data Service Health Monitor dashboard using **React, Ag-Charts, AWS Lambda, optimized Athena queries, CloudWatch, ECS, and Redis**, delivering interactive charts across multiple timeframes, reducing incident **resolution time by 50%** and enabling no-code service onboarding via **AWS Parameter Store**.

### SALZAA

February 2023 – May 2024

*Founder and CTO*

*Bengaluru, India*

- Architected and developed a hyperlocal commerce platform with a scalable **Node.js backend** and high-performance **SvelteJS frontend**, **reducing page load time by 40% and improving user engagement by 30%**.
- Designed advanced geospatial algorithms for dynamic store clustering, optimizing real-time customer-store mapping and **reducing delivery time by 25%, enabling 30-minute deliveries**.
- Built an **AI-driven** dispatch system leveraging **Kafka and Redis**, improving order allocation **efficiency by 35%** and **reducing fulfillment time by 20%**.
- Implemented event-driven inventory synchronization with **WebSockets and Redis caching**, achieving **99.9% stock accuracy** and preventing order failures, **reducing stock mismatch issues by 40%**.

## Projects

### RAG Web Application

- Developed a **Python** RAG web application for ROS2 support, combining **Qdrant** dense-vector retrieval on a **10k+** document knowledge base with a **LoRA** fine-tuned **LLaMA** generator to produce precise, context-grounded answers.
- Designed a multi-source ETL pipeline (ROS2 docs, GitHub, YouTube) processing over **1GB/day** with deduplication and semantic chunking, then deployed an async **FastAPI** and **Gradio** service tracked in **ClearML**.

### Crypto Tracker

- Built a **MERN-stack** cryptocurrency tracker that ingests **live market data** from public APIs, normalizes it on the backend, and renders real-time prices, symbols, and asset stats in a responsive dashboard.
- Engineered fast search and filters over **10k+ coins** using **debounced queries, client-side indexing, and paginated lists**, delivering near-instant lookup and smooth UX under large data loads.

## Technical Skills

**Programming Languages:** Python, HTML/CSS, JavaScript, SQL, C++, Java

**Technologies/Frameworks:** Django, Flask, FastAPI, Node.js, React.js, Next.js, Spring, Spring Boot, JUnit, Mockito

**Developer Tools:** Jenkins, Kubernetes, Docker, GIT, NPM, Babel, ESLint, Script

**Machine Learning & AI:** TensorFlow, PyTorch, Scikit-learn, OpenCV, Hugging Face Transformers, Bart

**Platforms:** Linux, Web, Windows, Arduino, AWS, GCP, IOS

**Big Data & Databases:** Apache Spark, MongoDB, MySQL, PostgreSQL, SQLite, Redis

## Achievements

### The Startup and Entrepreneur Award, SRM University

May 2024

- Recognized from a large competitive batch for founding and scaling **Salzaa, achieving 15% growth** in 6 months through entrepreneurial innovation and scalable e-commerce solutions.
