

SAKARIE ABDI ADEN

Columbus, OH · Istanbul, Turkey · (614) 301-6469 · sakeaden@gmail.com · linkedin.com/in/sakarie-aden · github.com/sakeaden-create

PROFESSIONAL SUMMARY

Results-driven Software Engineering graduate (September 2026) with hands-on experience in backend development, RESTful API design, and database optimization. Proficient in JavaScript and Python with a strong foundation in Agile methodologies, system architecture, and the full SDLC. Proven ability to deliver scalable, secure solutions and collaborate cross-functionally to meet business objectives. Seeking a Software Engineer, Backend, or Data Engineer role where I can contribute from day one.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL

Backend: RESTful API Design, System Architecture, Role-Based Access Control (RBAC)

Databases: PostgreSQL, SQL, Data Modeling, Query Optimization

Methodologies: Agile (Scrum), SDLC, Requirement Analysis, Unit & Integration Testing

Tools: VS Code, Git, GitHub, Postman

Languages (Human): English (Fluent), Somali (Fluent), Turkish (Proficient)

PROJECTS

AI Resume Analyzer | Personal Project — GitHub 2026

- Built a Streamlit web app in Python that uses the Claude API to analyze resumes for ATS compatibility and extract key skills.
- Implemented multi-format resume parsing (PDF, DOCX, TXT) using pypdf and python-docx to extract raw text for analysis.
- Designed structured JSON-based prompting to generate consistent, parseable AI feedback, including a match score against a pasted job description.
- Structured the codebase into separate parsing, AI-analysis, and UI modules, and wrote unit tests to validate the parsing logic.

Grading Management System | Uskudar University — Istanbul, Turkey

2025

- Architected and built RESTful APIs in Python and JavaScript to integrate a PostgreSQL database with the frontend, supporting concurrent multi-role access.
- Engineered role-based access control (RBAC), enforcing strict data separation between teacher and student accounts.
- Automated grade calculation workflows, eliminating manual entry errors and reducing administrative processing time by 40%.
- Designed normalized database schema to ensure data integrity and support efficient query performance at scale.

EDUCATION

B.S. in Software Engineering | Uskudar University — Istanbul, Turkey

Sep 2026

- Relevant Coursework: Data Structures, Object-Oriented Programming, Operating Systems, Database Management Systems, Software Design and Architecture, Computer Networks, Prompt Engineering
- Capstone: Led backend development for a grading platform serving teachers and students with secure, role-based grade management.

High School Diploma — Central Crossing High School, Columbus, OH (Jun 2021)
