

Sakshi Kedar

Data Analyst | Business Intelligence Analyst | Product Analyst

Hillsboro, OR (Open to Relocate) | (971) 217-7125 | sakshipkedar@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience transforming complex data into actionable business insights across Retail, FinTech, Logistics, and SaaS industries. Proficient in SQL, Python, Tableau, Power BI, Snowflake, and Databricks, with expertise in dashboard development, ETL pipelines, KPI reporting, statistical analysis, and data quality improvement. Experienced in partnering with cross-functional teams to automate reporting, optimize business processes, and deliver scalable analytics solutions that improve operational efficiency and business performance.

SKILLS

Programming & Query Languages: SQL (Advanced SQL, CTEs, Window Functions, Query Optimization), Python (Pandas, NumPy, PySpark), Microsoft Excel (Pivot Tables, Power Query, XLOOKUP/VLOOKUP), Git

Business Intelligence & Visualization: Tableau, Microsoft Power BI, Looker, Amazon QuickSight

Data Platforms: Snowflake, Databricks, Amazon Athena, Airtable

Data Engineering & Data Management: ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Transformation, Data Validation, Data Cleansing, Data Reconciliation, Data Governance, Data Lineage, Source-to-Target Mapping

Analytics & Statistical Techniques: Root Cause Analysis, Ad Hoc Analysis, A/B Testing, Cohort Analysis, Funnel Analysis, Customer Segmentation, Forecasting, Statistical Analysis, Anomaly Detection, Variance Analysis

PROFESSIONAL EXPERIENCE

Nike | Data Analyst II | Beaverton, OR, USA

Mar 2025 - May 2026

- Designed and delivered enterprise Tableau dashboards that enabled executive KPI tracking across customer, POS, and master store data for 10+ cross-functional stakeholders.
- Built scalable SQL-based ETL/ELT pipelines and transformation workflows to support migration from Amazon Athena to Databricks, improving reporting scalability, query performance, and data governance.
- Identified marketplace issues through SQL analysis and Tableau dashboards, reducing high-risk product detection time by 60%.
- Automated synchronization of 60,000+ records between Snowflake and Airtable using Python and REST APIs, significantly reducing manual effort while improving data accuracy.
- Developed AI-assisted reconciliation workflows achieving 90% matching accuracy and saving more than 24 hours of manual work per week.
- Collaborated with Product, Engineering, and Operations teams to define reporting requirements, improve data quality, and deliver scalable analytics solutions.

Intuit | Financial Data Analyst | Remote

Jun 2024 - Feb 2025

- Analyzed subscription, billing, and financial transaction data to identify revenue trends, customer behavior, and operational performance insights.
- Built Power BI dashboards tracking revenue, retention, subscription health, payment performance, and executive KPIs.
- Improved reporting accuracy through comprehensive data validation, reconciliation, and variance analysis across enterprise datasets.
- Conducted ad hoc analyses and root cause investigations to resolve reporting discrepancies and recommend process improvements.
- Automated recurring financial reporting processes, improving reporting efficiency through AI-assisted analytics.

DoorDash Data Analyst Tempe, AZ, USA	Apr 2023 - May 2024
• Analyzed large-scale marketplace and logistics data using SQL and Python to improve operational performance and business decision-making. • Developed Tableau and Looker dashboards that reduced manual reporting by 25% while improving visibility into customer engagement, delivery performance, and operational KPIs. • Performed A/B testing, cohort analysis, customer segmentation, and statistical analysis to evaluate product performance and user behavior. • Leveraged advanced SQL techniques including CTEs and window functions to identify operational bottlenecks and drive process improvements. • Developed forecasting models in Python that improved inventory planning accuracy and reduced stock-out risk by 18%. • Worked closely with Product Managers and Engineering teams to develop KPI frameworks and scalable reporting solutions.	

Freshworks Data Analyst India	Jun 2021 - Jun 2022
• Analyzed CRM and sales data to monitor ARR, customer retention, churn, pipeline performance, and SaaS business metrics. • Developed executive Power BI dashboards providing visibility into revenue, sales effectiveness, and customer engagement. • Conducted customer segmentation, cohort analysis, and funnel analysis to identify growth opportunities and improve customer retention. • Improved reporting accuracy by implementing data validation, cleansing, reconciliation, and standardization processes. • Automated recurring reports and KPI tracking in collaboration with Sales, Marketing, and Customer Success teams.	

PROJECTS

Sales Performance Dashboard (Power BI)
• Built an interactive Power BI dashboard analyzing sales performance, regional trends, and customer behavior using SQL and Power Query. • Implemented drill-through reports and KPI scorecards for executive reporting.
Customer Churn Analysis (Python & SQL)
• Developed a churn prediction analysis using Python (Pandas) and SQL to identify key drivers of customer attrition. • Created visualizations highlighting customer segments and retention opportunities.

EDUCATION

Master of Science in Information Technology Arizona State University, Tempe, AZ, USA	Aug 2022 – May 2024
Bachelor of Engineering in Computer Science and Engineering Government College of Engineering Nagpur, Nagpur, Maharashtra, India	Aug 2018 – Jun 2022
