

SRUTI NAIR

SENIOR SDET | LEAD QA AUTOMATION ENGINEER | USA

+1 (914) 356-7675 | srutin.nyc@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

Results-driven Senior SDET and QA Automation Architect with 15+ years of experience designing scalable test automation frameworks (Cypress, Selenium, Appium) for FinTech and digital banking platforms across the full SDLC. Proven track record of reducing defect escape rates, cutting manual regression effort by 50%, and accelerating release velocity through CI/CD-integrated test pipelines at enterprise scale. Adept at leading cross-functional QA guilds, driving shift-left testing strategies, and partnering with DevOps, product, and engineering teams to embed quality at every stage of delivery.

TECHNICAL SKILLS

Test Automation: Cypress, Selenium WebDriver (2.0–4.0), Appium, Protractor, XCTest, UIAutomator, Selenium RC, JUnit, TestNG, Cucumber (BDD), Page Object Model (POM)

Languages & Scripting: JavaScript (ES6+), TypeScript, Java, SQL, Swift, Angular JS, HTML, XML, Shell/Batch Script

CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, CircleCI, Git, Azure DevOps, Selenium GRID

Cloud & Infrastructure: Azure, AWS (SES), Linux, macOS, Windows, Docker (containerized testing)

API & Database Testing: Postman, SoapUI, REST API testing, MySQL, MS SQL Server 2012, TOAD, SQLYog

Reporting & Monitoring: Allure Reports, Jasmine, TestNG Reports, Lighthouse, WAVE (WebAIM)

Mobile Testing: Appium, XCode, Android Studio, XCUIApplication, UIAutomator2

Bug Tracking & BA Tools: JIRA, Azure DevOps, TFS, Bugzilla, Quality Center, Confluence, Lucidchart, MS Visio

Methodologies: Agile/Scrum, Kanban, Shift-Left Testing, BDD/TDD, UAT, WCAG 2.0/2.1 Accessibility, Risk-Based Testing

PROFESSIONAL EXPERIENCE

Backbase | Atlanta, GA (Remote – New York) | **June 2017 – Present**

Lead SDET & Business Analyst

Project: EverBank – Digital-First Banking Platform

- Architected and deployed an AI-augmented Cypress automation framework integrating Autonomous AI Testing Agents to detect edge-case UI anomalies across 150+ user journeys, reducing manual regression effort by 50% and cutting release cycle time from 3 weeks to 10 days.
- Designed and executed a comprehensive CI/CD-integrated test pipeline using Jenkins and GitLab CI, enabling automated test execution on every commit across Chrome, Firefox, Safari, and Edge, improving feedback loop speed by 70% and achieving 95%+ cross-browser pass rates.
- Led UAT roadmap definition and Go-Live readiness validation for EverBank's digital banking platform, coordinating with C-suite stakeholders to establish acceptance criteria, resulting in zero critical production defects at launch across 200,000+ end users.
- Orchestrated end-to-end requirements gathering and authored Business Requirement Documents (BRDs) and Functional Specification Documents (FSDs) with Sequence and Activity Diagrams, aligning 8+ engineers across product, dev, and QA for 100% story acceptance criteria compliance across 12 sprints.
- Drove WCAG 2.0 accessibility compliance for 30+ digital banking widgets using WAVE and Lighthouse, eliminating all Level A/AA violations and mitigating legal risk across an ADA-regulated financial platform.
- Mentored a team of 4 junior automation engineers in Cypress best practices, JavaScript/TypeScript programming, and BDD strategies, increasing team automation output by 40% and reducing onboarding time from 8 weeks to 3 weeks.

Project: Schools First Federal Credit Union (SFFCU) – Mobile & Web

Software Quality Control Coordinator

- Established the end-to-end test strategy and quality framework for SFFCU's new digital banking platform (web + mobile), introducing standardized QA Guild tooling that reduced test inconsistencies by 35% across 6 squads.
- Developed and executed 500+ manual and automated test cases covering functional, performance, and security requirements for SFFCU's mobile and web banking solutions, achieving 98% functional test coverage prior to each release.
- Delivered hands-on Appium and mobile automation training to 5 mobile developers, enabling dev-side unit test contributions that expanded End-to-End (E2E) test coverage by 30% without additional QA headcount.
- Drove defect triage sessions with Product Owners and client stakeholders, leveraging test evidence, defect metrics, and risk analysis to prioritize sprint backlogs, maintaining defect escape rate below 2% over 18 months.

Project: Central 1 Credit Union – Alterna Bank

Mobile Automation QA Engineer – Android & iOS

- Built a native mobile automation suite using XCUIApplication (iOS) and UIAutomator2 (Android) within XCode and Android Studio, covering 200+ test scenarios across iOS and Android devices and tablets, reducing manual mobile regression effort by 45%.

- Executed Postman-based API integration tests to validate data consistency between the mobile front end and back-end banking services, identifying and resolving 12 critical data integrity defects before production deployment.

Project: Sterling National Bank – Online Banking Platform

Web Automation QA Engineer

- Designed and implemented an end-to-end Protractor/Selenium WebDriver regression automation framework for SNB's AngularJS banking application, integrated with Jenkins CI to generate nightly test reports and achieving 90%+ UI regression coverage.
- Built Data-Driven, Keyword-Driven, and Hybrid Page Object Model (POM) frameworks using Protractor, Jasmine, and NodeJS, reducing test script maintenance effort by 30% and enabling non-technical team members to add test cases via data tables.
- Performed WCAG 2.0 (Level A and AA) accessibility audits using WAVE on all web banking modules, eliminating 100% of flagged accessibility violations before go-live and establishing a repeatable accessibility checkpoint in the CI pipeline.

Measurement Inc. | Durham, NC | June 2014 – June 2017

Senior Software Test Engineer

Project: MIDAS & ISEE – Educational Assessment Platforms

- Designed and implemented a Hybrid/Data-Driven Selenium WebDriver (Java + TestNG) automation framework with Page Object Model and Allure Reports integration, achieving 85% regression automation coverage and reducing manual QA effort by 40% across quarterly release cycles.
- Established CI/CD test execution pipelines in Jenkins integrated with GitHub, scheduling nightly automation runs across Selenium GRID nodes for cross-browser parallel testing, reducing full regression execution time from 6 hours to 90 minutes.
- Authored and executed 400+ SQL-based database verification scripts on MS SQL Server to validate back-end data integrity for assessment scoring algorithms, catching 25+ critical data-layer defects before UAT.
- Performed REST and SOAP API testing using SoapUI and Postman for platform integration points, validating 100% of external service contracts and reducing API-related production incidents by 60%.

Project: Item Bank System (IBS) – Business Analyst

- Led requirements elicitation and authored Functional Specification Documents, Use Case Diagrams, Activity Diagrams, and swim-lane Process Flows for IBS, translating complex educational assessment workflows into technical specifications for a 12-person engineering team.

Tiffany & Co. | Pelham, NY | March 2011 – June 2014

QA Analyst

- Executed end-to-end functional, regression, integration, and UAT testing for Tiffany.com, a global e-commerce platform spanning 15+ country-specific sites, maintaining a defect leakage rate below 1.5% across quarterly releases.
- Automated SQL-based backend data validation scripts to verify product catalog, pricing, and order data integrity across CMS and database layers, reducing manual data verification effort by 50% and supporting a platform serving millions of annual online shoppers.

JSoft Solutions | India | June 2010 – February 2011

Software Tester

- Developed and executed comprehensive test plans, test cases, and regression scripts for UConnect (a university social networking platform), covering functional, GUI, database, and UAT testing and tracking 80+ defects to closure in Bugzilla.

EDUCATION

Bachelor of Technology (B.Tech) | Mahatma Gandhi University, India | 2010

WORK AUTHORIZATION

U.S. Citizen — Authorized to work in the United States without sponsorship.
