Clinical Application Analyst | Cerner Millennium EMR | Healthcare Informatics | Healthcare Analytics | SQL & Power BI

PROFESSIONAL SUMMARY

Healthcare Informatics professional with a pharmacy clinical foundation and experience across **Cerner Millennium application support, healthcare analytics, and clinical trial data management**. Supports clinical workflows across **Orders, FirstNet, Capacity Management, and Dynamic Documentation**, including configuration, testing, troubleshooting, upgrades, and end-user support. Skilled in **SQL, Power BI, Tableau, Python, DAX, and Power Query** for healthcare data validation, reconciliation, and reporting, with working knowledge of **HIPAA, ICH-GCP**, and clinical documentation standards.

CORE SKILLS

Clinical Applications & EMR: Cerner Millennium | Orders | Orderables | Order Sets | FirstNet | Capacity Management | Dynamic Documentation | Clinical Workflow Configuration | Functional, Regression & UAT Testing | Production & End-User Support

Healthcare Data & Analytics: Clinical KPI Reporting | Patient Data Analysis | Data Quality & Validation | Data Reconciliation | Data Profiling | Clinical Documentation Improvement | Revenue Cycle Analytics

Clinical Research: EDC | eCRF Review | Clinical Query & Discrepancy Management | Adverse Event Data Review | Trial Data Reconciliation

Technical & Standards: SQL | SQL Server | SSIS ETL | Power BI | DAX | Power Query | Tableau | Python | R | Advanced Excel | HIPAA | ICH-GCP | ICD-10 | CPT

Pharmaceutical Sciences: Preformulation Studies | Topical & Semi-Solid Formulation | Excipient Compatibility | Solubility Enhancement | API Characterization | Stability & Sterility Testing | MIC & Agar Diffusion Assays

EDUCATION

MS, Health Informatics | Governors State University, IL, USA | GPA 3.7/4.0 Dec 2023 – Dec 2025

Coursework: Advanced DBMS, Big Data Analytics, AI Fundamentals, Advanced Operating Systems, JAVA Programming, Internet Programming, Electronic Health Records

BPharm, Pharmacy | Sri Venkateshwara College of Pharmacy, India | GPA 9.4/10 Jul 2018 – Aug 2022

Coursework: Solid oral dosage forms (tablets, capsules), liquid orals, injectables and other dosage forms, API characterization, excipient compatibility, solubility enhancement techniques

PROFESSIONAL EXPERIENCE

Clinical Application Analyst | UHS | Remote, United States Feb 2026 – Present

- Support the design, build, testing, implementation, and optimization of **Cerner Millennium** clinical workflows across UHS-affiliated facilities, including **Orders, FirstNet, Capacity Management, and Dynamic Documentation**.
- Configure and maintain clinical **order sets, orderables**, and documentation workflows, translating clinician requests into validated application changes.
- Troubleshoot clinical application incidents by reproducing issues, analyzing configuration behavior, documenting findings, and coordinating resolution through **on-call production support**.
- Execute **functional, regression, and user-acceptance testing** for new builds, configuration changes, enhancements, and Cerner upgrade cycles.
- Partner with nurses, physicians, and IT teams to close workflow gaps, improve usability, and support **patient-safety requirements**, delivering end-user training and application support.

Healthcare Informatics Intern | WELLINK HEALTH ALLIANCE | Cleveland, OH – Remote Sep 2025 – Dec 2025

- Supported recurring **Power BI** healthcare dashboards used by operations and reporting stakeholders for clinical KPI, utilization, and operational reporting.
- Identified and resolved **15 SQL Server-to-Power BI reporting discrepancies** through source-data reconciliation, SQL validation, DAX review, and Power Query analysis.

- Built a **standardized reconciliation process** comparing report outputs against source data, improving recurring dashboard validation.
- Mapped reporting data across SQL Server tables, transformation logic, and **SSIS ETL** processes, refining **DAX** measures and **Power Query** transformations and validating outputs with **SQL**, **Python**, and Excel before stakeholder review.

Clinical Data Analyst – Clinical Trials | AUGUR TALENTCARE | Hyderabad, India Mar 2023 – Nov 2023

- Reviewed **EDC** records and **eCRFs** to identify missing fields, inconsistent entries, out-of-range values, and clinical data discrepancies.
- Managed **120+ clinical data queries** through identification, documentation, tracking, follow-up, and closure across study review cycles.
- Reconciled subject visits, laboratory values, medication records, and **adverse-event data** using **SQL** and Excel, monitoring overdue responses ahead of scheduled data reviews.
- Standardized query comments, validation notes, and tracking templates, and prepared recurring **data-quality summaries** for clinical data managers.
- Applied **ICH-GCP** and sponsor data privacy requirements while documenting data corrections in collaboration with data managers, coordinators, and CRAs.

Clinical Data Analyst – Healthcare & Hospital Data | REVENTICS | Hyderabad, India Sep 2022 – Mar 2023

- Extracted, cleaned, and validated **EHR data** using **SQL**, **R**, and Excel across approximately **35,000 patient encounters**.
- Analyzed **ICD-10**, **CPT**, and documentation patterns to identify gaps affecting clinical documentation and downstream healthcare reporting.
- Built **Tableau** dashboards and ad hoc reports covering documentation quality, coding patterns, and encounter-level trends, using **SQL joins** for duplicate detection and reconciliation.
- Supported **Clinical Documentation Improvement (CDI)** initiatives with physicians and coding teams, working under **HIPAA** and client security requirements.

SELECTED PROJECTS

Hospital Clinical KPI & Patient Outcomes Dashboard | Power BI | SQL Server | DAX | Power Query

- Built a healthcare analytics dashboard on a de-identified public dataset analyzing patient encounters, length of stay, readmission trends, discharge disposition, and utilization patterns.
- Prepared data with **SQL** and **Power Query**, developed **DAX** measures for clinical and operational KPIs, built interactive drill-down views, and validated KPIs against source data.

EHR Data Quality & Clinical Documentation Analysis | SQL | Python | Data Profiling

- Analyzed a de-identified **EHR dataset** to identify missing values, duplicate patient records, inconsistent clinical fields, and incomplete documentation.
- Applied **SQL** queries, **Python validation checks**, and **data profiling** to evaluate completeness and accuracy, then summarized root-cause patterns and recommended data-quality improvements.

Formulation and Evaluation of Topical Antiseptics

- Developed pharmaceutical-grade antimicrobial formulations meeting **sterility and stability standards**.
- Conducted **MIC testing** and **agar diffusion** assays to evaluate antimicrobial effectiveness.
- Assessed physicochemical and dermatological properties under laboratory conditions.
- **Co-authored a scientific paper** on the findings and their clinical relevance in infection control.

COURSES & CERTIFICATES

-
- **Coursera:** Data Management for Clinical Research | Clinical Trials Operations
 - **LinkedIn Learning:** Healthcare Data Analytics | Python Data Analysis for Healthcare | SQL Essential Training | Power BI Essential Training
