## Data Analyst

Lewisville, TX | (312) 776-6114 | malabantivarshika@gmail.com | LinkedIn

### SUMMARY

Data Analyst with 4+ years of experience analyzing healthcare data to deliver actionable insights using SQL, Python, Power BI, and Tableau. Experienced in dashboard development, KPI reporting, claims analytics, ETL, statistical analysis, and business intelligence to support healthcare operations and data-driven decision-making. Skilled in working with HL7, FHIR, EHR/EMR, ICD-10, and HIPAA-compliant data while ensuring data quality and reporting accuracy. Proficient in leveraging AI-powered tools to automate workflows and improve analytics efficiency.

### TECHNICAL SKILLS

**Programming:** Python, SQL, Advanced Microsoft Excel (Pivot Tables, Power Query, DAX)

**Python Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib

**Healthcare Analytics:** Claims Analytics, Member Analytics, Provider Analytics, Patient Analytics, Population Health Analytics, Risk Adjustment Analytics, Care Management Analytics, Pharmacy Analytics, Revenue Cycle Analytics, Healthcare KPI Reporting, Quality Metrics (HEDIS), Clinical Reporting, Healthcare Operations Reporting

**Healthcare Data & Compliance:** HIPAA, HL7, FHIR, ICD-10, CPT, HCPCS, NDC, EHR/EMR Data, Healthcare Claims Data, Healthcare Data Governance, Protected Health Information (PHI), Data Privacy & Compliance

**Data Analysis:** Data Analysis, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation, Data Profiling, KPI Analysis, Trend Analysis, Root Cause Analysis

**Data Visualization & BI:** Power BI, Tableau, Dashboard Development, Interactive Reporting, Executive Dashboards, Business Intelligence (BI), Data Storytelling

**Databases & Data Warehousing:** SQL Server, PostgreSQL, MySQL, Snowflake, Google BigQuery, Data Warehousing, Relational & Dimensional Data Modeling, Star Schema

**ETL & Data Management:** ETL/ELT, Data Extraction, Data Transformation, Data Integration, Data Quality Management

**Statistics & Analytics:** Hypothesis Testing, A/B Testing, Regression Analysis, Time Series Analysis, Forecasting, Predictive Modeling, Descriptive & Diagnostic Analytics

**Cloud Platforms:** AWS (S3, Athena, Redshift), Microsoft Azure (Azure SQL Database), Google Cloud Platform (BigQuery)

**Business & Collaboration:** Requirements Gathering, Business Process Analysis, Stakeholder Management, Agile, Scrum, Jira, Confluence

**Tools & AI:** Git, GitHub, Jupyter Notebook, SQL Server Management Studio (SSMS), Power BI Service, ChatGPT, Microsoft Copilot, OpenAI APIs, Prompt Engineering

### EXPERIENCE

#### Data Analyst | CVS Health

Feb 2025 – Present

- Collaborated with clinical, pharmacy, and business stakeholders to gather reporting requirements and deliver analytics supporting healthcare operations and strategic decision-making.
- Developed interactive Power BI dashboards using DAX and Power Query to monitor healthcare KPIs, including claims processing, member enrollment, provider performance, and pharmacy utilization.
- Optimized complex SQL queries, views, and stored procedures across SQL Server and Snowflake, reducing report execution time by 40% and improving reporting efficiency.
- Performed exploratory data analysis (EDA), trend analysis, and root cause analysis using Python and SQL to identify utilization patterns, care gaps, and operational improvement opportunities.
- Automated recurring healthcare reporting and ETL workflows using Python and Power Query, reducing manual effort by 60% while improving report delivery timelines.
- Validated and reconciled claims, member, provider, and EHR/EMR data using HL7 and FHIR standards while ensuring HIPAA compliance, data integrity, and reporting accuracy above 99%.
- Developed reusable semantic datasets and standardized healthcare KPI definitions, enabling self-service analytics and improving reporting consistency across clinical and operational teams.
- Leveraged ChatGPT and Microsoft Copilot to accelerate SQL development, automate documentation, and improve productivity across healthcare analytics initiatives.

#### Data Analyst | Avenir Technologies

Feb 2020 – Dec 2022

- Extracted, transformed, and analyzed healthcare and operational data from relational databases using SQL to support claims reporting, provider analytics, and business intelligence initiatives.
- Designed Power BI and Tableau dashboards that provided real-time visibility into healthcare KPIs, patient utilization, quality metrics, and operational performance.

- Cleaned, standardized, and transformed large healthcare datasets using Python, Power Query, and Advanced Excel, improving data quality and reporting consistency.
- Developed reusable SQL scripts, stored procedures, and reporting solutions that reduced report preparation time by 45%.
- Applied statistical techniques including hypothesis testing, regression analysis, predictive modeling, forecasting, and trend analysis to evaluate healthcare performance and support data-driven recommendations
- Developed ETL workflows integrating claims, member, provider, and EHR/EMR data from multiple healthcare systems while ensuring data integrity, HIPAA compliance, and consistent reporting.
- Partnered with cross-functional stakeholders to define healthcare reporting requirements, establish KPIs, and deliver analytical solutions supporting operational improvements.
- Implemented data quality validation and reconciliation processes that improved reporting accuracy to 99.5% while reducing inconsistencies across enterprise healthcare datasets.

## PROJECTS

### Healthcare Claims & Population Health Analytics Dashboard

**Tech Stack:** SQL, Python, Power BI, Snowflake, DAX, Power Query, HL7, FHIR, ChatGPT, Microsoft Copilot

- Developed an end-to-end healthcare analytics solution integrating claims, member, provider, and EHR/EMR data using SQL, Python, and Snowflake to support enterprise reporting.
- Built interactive Power BI dashboards using DAX and Power Query to monitor healthcare KPIs, including claims processing, HEDIS quality measures, patient utilization, provider performance, pharmacy trends, and population health metrics.
- Performed data transformation, validation, and quality checks on HL7 and FHIR healthcare datasets while ensuring HIPAA compliance and reporting accuracy above 99%.
- Leveraged ChatGPT and Microsoft Copilot to accelerate SQL development, generate DAX measures, automate technical documentation, and reduce dashboard development time by 30%, improving reporting delivery efficiency.

## EDUCATION

**Master of Information Technology and Management | *Illinois Institute of Technology***

***Jan 2023 – Dec 2024***
