SUMMARY

QA Automation Engineer with 6+ years testing web and API-based applications across Telecom and E-commerce domains. Skilled in building and maintaining scalable automation frameworks using Java, Selenium, TestNG, Cucumber integrated with Jenkins CI/CD, reducing manual regression effort. Proficient across the full testing lifecycle — test design, API and SQL validation, and framework maintenance — with recent experience leveraging GitHub Copilot to accelerate script development.

CORE SKILLS

- **Languages & Frameworks:** Java, JavaScript, Selenium WebDriver, Playwright, TestNG, Cucumber (BDD), Gherkin, Maven
- **Testing:** Manual & Automated Testing, Functional, Regression, API (Postman), SQL/DB validation, Smoke, UAT
- **CI/CD & Tools:** Jenkins, Git/GitHub, Jira, Zephyr, Confluence
- **AI-Assisted Testing:** GitHub Copilot
- **Methodologies:** Agile/Scrum

PROFESSIONAL EXPERIENCE

Comcast Corp (Xfinity), New York, NY

Mar 2023 – Present

QA Automation Engineer

- Design and execute automated and manual test suites (functional, regression, smoke, UAT) for Customer Portal and Xfinity Streaming applications using **Selenium WebDriver, Java**, and TestNG, resulting in **95% requirement coverage**.
- Build BDD test scripts with Cucumber/Gherkin on a **Page Object Model** framework; integrate TestNG/XML suites with Extent HTML reporting.
- Contributing to the migration of business-critical test automation from **Selenium to Playwright**, including framework setup and script conversion.
- Run nightly regression automation through **Jenkins CI/CD**, giving developers same-day feedback on build health.
- Validate API behavior (GET/POST/PUT/DELETE) with **Postman** and cross-check UI data against backend records via **SQL**.
- Use **GitHub Copilot** to speed up development of Selenium/TestNG scripts and Cucumber step definitions.
- Partner with developers, PO, and Scrum Master across sprint ceremonies to clarify acceptance criteria and resolve defects pre-release.

Levi Strauss & Co, Dhaka, Bangladesh

Aug 2019 – Sept 2022

QA Analyst

- Assisted automating critical regression test cases with **Selenium/Java**, cutting manual testing effort by **over 70%** and shortening release cycles.
- Executed manual- functional, smoke, GUI, system, end-to-end, and regression testing after SAP transports and patches; tracked defects in **JIRA**.
- Maintained the Requirements Traceability Matrix (RTM) to ensure full coverage against requirements.
- Ran cross-browser testing via **BrowserStack** and pre-release sanity checks in production.

CERTIFICATION & EDUCATION

- Professional Scrum Master I (PSM I), Scrum.org | BBA, Marketing & MIS – North South University, Dhaka, Bangladesh, 2015
