WORK EXPERIENCE

Capgemini, Integration Consultant (Columbia, SC)

Jun 2022 – Present

- Deployed 15+ MuleSoft Applications to production environment, utilizing API-led connectivity to enhance system integration and streamline business processes
- Owns, manages, and delivers high priority support to 150+ MuleSoft Applications for a major Capgemini client, the second largest restaurant group in the United States
- Creates and updates diagrams and documentation regarding all owned MuleSoft Applications to clarify the interactions between various API layers and facilitate a high understanding across the group
- Regularly involved in the decision-making process regarding the future of Integration Architecture for the client
- Makes regular updates to existing MuleSoft Applications to enhance performance, resolve recurring issues, increase usability for the client, etc.
- Implements and updates GitLab DevOps CI/CD pipelines, automating build and deployment processes, following best practices for Git development cycles
- Collaborates with business users and stakeholders to define API requirements and write user stories
- Adds to and updates sprint tickets within the JIRA platform to track and provide visibility on the progress of all sprints
- Internal projects coding in Java and Python languages utilizing Service Bus and SQS queues in Azure Cloud and AWS Cloud
- Internal projects shadowing more advanced developers in the Integration space within Capgemini

Shaw Industries, Robotics Process Automation Co-Op (Remote / Dalton, GA)

May 2021 – Aug 2021

- Learned and excelled using the RPA tool Automation Anywhere in order to gain extensive industry knowledge while studying as a Co-Op student and providing unique solutions for Shaw Industries in a single Summer
- Deployed an automatic email sending automation to production in order to streamline processes
