

HARSHIT BHORASKAR

Python Full-Stack Developer

harshitbhoroskar@gmail.com · San Francisco, CA · +1 669 281 9392 · [GitHub](#) · [LinkedIn](#)

SUMMARY

Results-driven and experienced Python Full Stack Developer with 4+ years of expertise in designing, implementing, and maintaining scalable and robust web applications. Proficient in a wide range of technologies and frameworks, with a strong focus on delivering high-quality code and user-centric solutions. Adept at working in various methodologies such as SDLC, Agile, and Waterfall.

TECHNICAL SKILLS

Methodology: SDLC, Agile, Waterfall

Programming Languages: Python, SQL, Java, JavaScript (ES6+), TypeScript

Frameworks/Libraries: React.js, Redux, Django, Flask, Material UI, Node.js, Express.js, Angular, Next.js, GraphQL, Rest Framework

Python Packages: NumPy, Pandas, Web2py, CherryPy, ZeeP, urllib2, requests, Beautiful Soup, FastAPI, PyTest

Web Technologies: HTML, CSS, JavaScript, XML, JSON, Bootstrap, AJAX, Tailwind, JQuery

IDEs: Visual Studio Code, Jupyter Notebook, PyCharm, Sublime Text, Notepad++, NetBeans

Databases: SQL Server, MySQL, NoSQL (MongoDB), Redis

Cloud Technologies: AWS(EC2, Lambda, Cloud Watch, S3)

Version Control/Other Tools: CMS, Jira, Git/GitHub, MS Office, SEO, Postmen, REST API, Selenium, Appium, Docker, SEO, Jenkins, webpack, Kafka

Soft Skills: Communication, Leadership, Team Management, Collaboration, Continuous Learning

Operating Systems: Windows, Linux, MAC OS

EDUCATION

Master of Software Engineering (GPA: 3.73) · San Jose State University, San Jose (SJSU) Aug 2021 – May 2023

Bachelor of Engineering in Computer Science (GPA: 3.83) · Rajiv Gandhi Technical University, India Aug 2013 – May 2017

PROFESSIONAL EXPERIENCE

Python Full-Stack Developer · *Infinite Options, CA* August 2023 - Present

- Collaborated with cross-functional teams to deliver scalable solutions in an Agile environment.
- Leading the enhancement of the Infinite Solutions client website by creating features based on client specifications.
- Leveraging MERN stack along with RDBMS for creating multi-modular architecture, and CI/CD pipeline using Jenkins for deployment.
- Developing and managing synchronous and complex multiplayer online party games leveraging AWS services, Python, and React.
- Implemented RESTful APIs using FastAPI and integrated GraphQL for improved data retrieval.

Frontend Engineer Intern · *IBM Red Hat Inc. | Raleigh, North Carolina, USA* June 2022 – August 2022

- Collaborated and developed infrastructure for the Observability team of Advanced Cluster Management product, utilizing time series data to perform analytics on 10+ managed clusters using Apache Superset.
- Conducted data preprocessing on month-long time-series data gathered from various Linux servers across 10+ deployed clusters.
- Leveraged TRINO and Apache Superset to retrieve valuable time-series data stored in Amazon S3 buckets.
- Developed engaging, interactive visualizations from Prometheus time-series data leveraging React JS, enabling stakeholders to easily interpret and improve resource management.
- Volunteered in open-source projects by collaborating and solving UI issues using ReactJS and TypeScript.

Software Engineer · *Scienaptic Systems, India* August 2019 - July 2021

- Designed and implemented Change Request Management System for CISCO using MERN stack capable of processing 10,000+ rows of data, saving 600 man-hours per year.
- Led and managed the team for development of architecture of 4+ client data dashboards for event metrics generated across the company from scratch and implemented Data Visualization for real-time data using React, Python, and Django.
- Spearheaded development of interactive and user-friendly chatbot supporting live chat by leveraging third-party Eserve SDK as a support program for CISCO employees using Angular8 and Python, reducing 10000 service tickets per year.
- Designed continuous integration and continuous deployment (CI/CD) pipelines for 4+ projects leveraging Docker, YAML and deploying it to Redhat Openshift containers via Jenkins, and maintained multiple project pipelines.
- Mentored and guided other project teams for chatbot implementation and CI/CD pipeline execution

Associate Consultant · *Incture Technologies, India* September 2017 - June 2019

- Contributed to end-to-end design and implementation of HR Management portal for Britannia Industries as a front-end engineer.
- Implemented 8+ complex modules such as Leave Management, mid-year KRA Portal, Sales portal, salary portal, etc. in MVC architecture using AngularJS and handled employee data of 2000 employees.
- Led the development of a dynamic e-commerce platform using Django, React.js, and Redux, resulting in a 25% increase in user engagement.
- Streamlined the deployment process using the CI/CD pipeline through Jenkins and Linux servers.
- Designed and implemented an employee attendance hybrid mobile app leveraging Google's Geolocation API allowing users to log into the system when they are in a 300-meter radius of the office.
