PROFESSIONAL EXPERIENCE

Finance & Research Analyst

360 Huntington Fund (Northeastern University)

Boston, MA

Nov 2024–Dec 2025

- Built valuation models (DCF, comparable company analysis) for 6+ publicly listed companies across technology, healthcare, and consumer discretionary sectors to support investment recommendations for a \$2M student-managed portfolio.
- Conducted sensitivity analysis on revenue growth, operating margins, and WACC assumptions to evaluate downside risk under 5–10% scenario variations in key financial drivers.
- Analyzed 3–5 years of historical financial statements and industry trends to develop forward-looking revenue and EBITDA growth assumptions used in portfolio allocation decisions.
- Presented 3+ investment theses to the fund’s investment committee, translating financial model outputs into actionable recommendations under time-constrained review cycles.
- Monitored portfolio performance relative to benchmark indices and macroeconomic indicators to support monthly portfolio rebalancing decisions.

Financial Analyst

Dhruvi Healthcare Pvt. Ltd.

Gujarat, India

July 2023–July 2024

- Built a three-year revenue and EBITDA forecast model to support annual operating plan (AOP) and monthly financial planning cycles across 10+ product SKUs.
- Performed monthly budget vs. actual variance analysis across revenue and expense categories, identifying cost deviations of up to 8–12% across product lines.
- Performed monthly P&L and cash flow analysis across regional sales teams to identify margin leakage and support cost optimization decisions.
- Built scenario-based financial models to evaluate the financial impact of pricing and demand fluctuations on projected profitability.
- Created cash flow forecasting schedules to improve visibility into receivables and working capital requirements for monthly financial planning cycles.
- Automated monthly KPI and budget variance reporting using Advanced Excel (Pivot Tables, SUMIF, VLOOKUP), reducing manual reporting time during financial close cycles.

EDUCATION

NORTHEASTERN UNIVERSITY

D’Amore-McKim School of Business

Master of Science in Quantitative Finance (GPA: 3.5/4)

Graduate Assistant – D’Amore-McKim School of Business Admission team

Boston, MA

Sep 2024–Dec 2025

GLS INSTITUTE OF MANAGEMENT

Bachelor’s in Business Administration

Concentrations in Finance and Marketing (GPA: 3.8/4)

Gujarat, India

Jun 2020–May 2023

LEADERSHIP

Graduate Assistant – Admissions Office

Northeastern University

Boston, MA

Nov 2024–Dec 2025

- Reviewed and processed 50+ graduate applications weekly, maintaining applicant data accuracy, supporting enrollment reporting.
- Tracked application pipeline metrics and assisted in generating weekly status reports to support admissions planning decisions.
- Coordinated with cross-functional teams to manage applicant communications and scheduling, ensuring timely updates and process efficiency.

Strategy and Financial Consulting Intern

UNITE The World Foundation Inc.

Boston, MA

Jan 2025–Apr 2025

- Researched and evaluated 100+ potential funding sources by conducting financial capacity assessments, strategic alignment reviews and historical funding activity to prioritize 30 high-value targets guiding fundraising strategy.
- Built an Excel-based tracking and analysis model to monitor grants and funding cycles, reducing research and tracking time.
- Supported 5+ active funding discussions by developing donor-ready financial summaries and presentation materials to facilitate stakeholder engagement and decision-making.

Co-founder (Start-up)

Medisky

Gujarat, India

Jun 2021–Aug 2024

- Co-founded a healthcare commerce startup supplying surgical equipment to 20+ clinics and individual practitioners, managing vendor partnerships, customer onboarding, and end-to-end order operations.
- Engaged directly with 30+ B2B/B2C customers to assess procurement needs and pricing sensitivity, enabling demand-driven sourcing and pricing decisions.
- Coordinated with 5+ suppliers to streamline fulfillment workflows and resolve delivery bottlenecks, improving average turnaround time by 25%.
- Supported business planning through budgeting, cash flow tracking and unit economics analysis, optimizing inventory levels and reducing holding costs by 15%.

ACADEMIC PROJECTS

Corporate FP&A Forecasting & Variance Analysis

- Built a 12-month integrated FP&A forecast model projecting revenue, operating expenses, EBITDA, and cash flow across 5+ cost centers, enabling scenario-based financial planning.
- Conducted budget vs. actual variance analysis to identify cost overruns and support short-term financial planning adjustments.
- Stress-tested revenue and expense assumptions using 5–8% sensitivity scenarios, highlighting forecast risks and potential margin compression.
