Platforms	: Windows, macOS, Unix/Linux, iOS, Android
Web Technology	: HTML, CSS, JavaScript, XML, JSON
RDBMS	: SQL, Oracle, MySQL
Web Services	: RESTful API, Postman, Swagger
Test Automation	: Selenium WebDriver, Cucumber, IntelliJ, GitHub, ChroPath, SelectorHub
Mobile Testing	: VSCode, Android Studio, ADB, TestFlight, Dev Tools, AWS, Samsung Device Farm
Defect/Test Management	: Jira, Xray
Project Management	: Jira, Confluence, Slack
Other	: MS Office, QuickBooks, UltraTax, AccountMate, Lacerte Tax

WORK EXPERIENCE

BootCamp in Quality Assurance(Web and Mobile Application testing)

Portnov Computer School, Sunnyvale,CA

Nov 2022 - Feb 2023

Project: Online educational platform providing an assessment control tool which allows to measure student's knowledge competency and monitor learning progress.

- Analyzed specifications and requirements (project structure and test design), updated testing documentation
- Wrote and executed test cases and test scenarios for various components, using Xray /Jira to monitor test executions, and capture results
- Participated in different types of functional and non-functional testing (Smoke, Regression, Compatibility, Usability, Build Acceptance, Release Acceptance, etc.)
- Conducted backend testing using SQL queries to extract data from the database and ensure there was no data loss,
- Developed sets of Restful API tests to validate business logic and performance parameters, based on API documentation (Swagger) and executed them via Postman Runner
- Generated test execution reports and presented test results at the team meetings
- Identified, analyzed, and reported bugs using Jira, tracking the status of filed bugs, following up on them with developers to help resolve any arising issues, and retested fixed bugs to close the tickets
- Took part in the weekly QA meetings discussing the findings, bug fixes, and latest builds

Project: Smart City service application improving experience from accessing public transportation for riders with disabilities and providing drivers with advanced notifications, creating fixed-routes, and other functions

- Reviewed functional requirements to ensure test cases met the acceptance criteria
- Developed, maintained, and executed test cases and regression scenarios for mobile application using different user roles (Rider, Driver, Board)

- Performed compatibility testing of the app on Samsung emulators (AWS, Samsung Device Farm and Android Studio)
- Used Android emulators (AVD) and remote device farms to overcome the Android fragmentation issue and provide a good compatibility test coverage
- Worked with AWS device farm (configured device, installed apk file, tested app, ran tests and analyzed data)
- Created Accessibility test cases for Sign in screen and executed them using TalkBack Android accessibility tool
- Conducted end-to-end testing of the app on devices with different environments (on updated app versions, different devices, OS, routes, agencies)
- Reported issues into JIRA and followed up on bugs until complete resolution
- Collected and analyzed logs using Charles Proxy, ADB commands, Terminal, XCode and on-device for Android and iOS applications
- Participated in Sprint Planning, and Sprint Retrospective meetings to discuss and develop new testing techniques/methods and process improvement recommendations

Bookkeeper/Tax Preparer,

Jay's Tax and Bookkeeping Services, Santa Clara, CA

Feb 2019 - Sep 2019

- Prepared tax returns for numerous clients, assessed and researched difficult tax issues to identify solutions
- Determined tax savings and recommend strategies to improve profits for the company clients
- Evaluated tax regulations and ensured compliance with requirements while forwarding required information to federal, state, and local authorities
- Prepared accurate quarterly and annual tax reports
- Examined/analyzed accounting records, financial statements, or other financial reports to assess accuracy and completeness
- Conducted client calls and meetings to exchange information and documentation to support services
- Performed bookkeeping tasks utilizing various software packages (QuickBooks and Intuit suite)
