Professional Summary

- 1. Around 4+ years of experience as a Software Developer. 2 years of experience as a PHP developer, 3 years of experience as a Java J2EE Developer in Object Oriented Design, Development, implementation, and maintenance of the web-based Client-Server business applications using Java/J2EE technologies
 2. Good experience using Core Java like Multithreading, concurrency, JDBC, Collection, and exceptional Handling.
 3. Experience using Ajax, JSON, and Javascript/Typescript to build the most interactive web pages.
 4. Experience with Agile/Scrum and Waterfall development methodologies
 5. Experience in core PHP concepts and frameworks like Laravel/CodeIgniter, demonstrating strong problem-solving skills by developing efficient web applications while actively seeking to expand knowledge in backend development and database management.
 6. Expertise in using Persistence Frameworks like Hibernate Java Persistence API(JPA)
 7. Implemented jQuery for auto-completion of forms and user-validation functionalities.
 8. Implemented Spring IOC (Inversion of control) container.
 9. Experience in using NoSQL Databases like Mongo DB
 10. Experience in writing SQL queries in PL/SQL, Triggers, and Stored Procedures in Relational Database Management Systems such as MySQL
 11. Experience in Spring Framework modules like Spring MVC, Spring AOP, Spring Boot, Spring Core, Spring IOC
 12. Experience in core Python concepts and libraries like NumPy, Pandas, and Django, demonstrating strong problem-solving skills through developing and deploying web applications and data analysis pipelines.
 13. Experience in server-side view rendering Java content structures like React.JS and rendering pages on the server side utilizing Redux for accomplishing the unidirectional plan stream.
 14. Experience in Microservices architecture, including design and implementation.
 15. Developed responsive design by implementing the Bootstrap custom templates.

Technical Skills

- Programming Languages: Java, Python, PHP
- Java/J2EE Technologies: Spring, Servlets, JDBC, JSP, JPA, JSTL, AWT, Applets
- Frameworks: Spring 5, Springboot, Spring AOP, Spring Core, Spring IOC, Hibernate
- Web Technologies HTML/HTML5, Bootstrap, CSS/CSS3, XML, AJAX
- Databases: MySQL, SQL Server, NoSQL(MongoDB)
- JavaScript Frameworks: JQuery, Angular 2.0/4.0, React JS, Node.js
- Source Control: Git, GitHub, and GitLab
- Methodology: Agile, Scrum, Waterfall model

Education

- Santhigiri College- Vazhithala, Kerala, India 06/2015- 06/2017
Masters in Computer Application: Mahatma Gandhi University
- Al Azhar College- Thodupuzha, Kerala,India 03/2012-03/2015
Bachelor in Computer Application: Mahatma Gandhi University

Experience

- **Sumskar System Private Limited** 1/10/2023- 31/10/2024
Java Developer

- Involved in developing the application using Spring
- Involved in application development using HTML, CSS, BootStrap, and JavaScript
- Experience using core Java features like multithreading, concurrency, JDBC, Transaction management, collection, and exceptional handling.
- The application uses J2EE design patterns and technologies based on the MVC architecture. It implements Autowiring to make a constructor field, getter and setter methods, or configuration methods Autowired by Spring's dependency injection facilities. A JavaScript library has been implemented to simplify HTML document traversing and event handling. It also includes dynamic features for automatic form completion and user validation functionalities using jQuery. Hibernate Query Language has been implemented to write database-independent queries.

- **.QUEST INNOVATIVE SOLUTIONS, Ernakulam, Kerala, India** 04/2022 - 08/2023
Software Engineer

- Architecting web solutions by seamlessly integrating front-end fitness with back-end prowess for all development lifecycle phases.
- Develop product features, unit tests, and reporting functionalities.
- Assist in decomposing major software features into coding projects and tasks.
- Debug and resolve software bugs, gathering feedback from internal and external stakeholders.
- Design, build, and implement features with reusable and reliable code,

Delivering user-centric designs and innovative solutions within an agile framework.

Collaborating with senior programmers or software developers to finish code. Integrate client-side and server-side 3rd party.

- **CAMERINFOLKS PVT. LTD - KOCHI, ERNAKULAM** 08/2021 - 03/2022
Full stack development Intern

- Assist in designing, developing, and maintaining user-friendly web applications.
- Work closely with the team leader and other team members to implement functionalities based on business specifications.
- Debug and fix issues reported by users or identified during testing.
- optimize application performance and ensure code quality through code reviews and testing.
- Stay current with industry trends and technologies and propose innovative ideas for improvements.

PHP developer

- Designed and implemented features, enhancements, and bug fixes for the employee compliance platform.
- Participate in all phases of software development from design to implementation, testing, release, and maintenance.
- Work closely with product managers, other developers, and the QA team. Responsible for quickly reviewing, analyzing, and triaging trouble tickets to resolve identified technical issues. Develop, test, and optimize SQL queries for performance and scalability.
- Develop, test, and maintain PHP-based applications to fulfill the requirements.

The team member will design, develop, and maintain web applications using PHP and Laravel and ensure their scalability, security, and performance.

Work closely with the help desk and software development team members to resolve user and system issues in an extensive application that is used by thousands.

Certifications

- 1.Azure Certified
- 2. Mulesoft Certified Developer-Level 1
- 3.Diploma in Datascience; ExpertzlabTechnologies,Kochi
