

ALUKA RAMPRASAD REDDY

BUSINESS ANALYST

IRVING, TX - USA | (832) 604-5355 | reddy.260298@gmail.com

SUMMARY

- **Business Analyst having 4+ years of experience** in healthcare and pharmaceutical domains, skilled in translating business objectives into data-driven solutions using tools like **Python, SQL, Power BI, and Tableau** across cross-functional teams.
- Proficient in analyzing clinical and operational data using **Pandas, NumPy**, and **Alteryx**, with proven ability to deliver actionable insights that reduced manual workloads and improved patient care strategies.
- Hands-on in building statistical models using **R (ggplot2, dplyr)**, **SPSS**, and **SAS** to support segmentation, risk stratification, and marketing effectiveness with strong command over **A/B testing, ANOVA**, and **clustering**.
- Experienced in designing and optimizing ETL processes using **SSIS, Snowflake**, and **Google BigQuery**, with a focus on delivering clean, structured data pipelines for high-volume reporting and forecasting tasks.
- Skilled in visual storytelling and performance tracking through **Advanced Excel, Power BI**, and **SSRS**, enabling executive-level decision-making across regional sales, compliance, and clinical analytics use cases.
- Adept at working in **Agile and Scrum** environments, leading **JAD sessions**, managing product backlogs in **ServiceNow**, and maintaining strong stakeholder engagement through effective communication and documentation.

SKILLS

Methodologies:	SDLC, Agile, Scrum, Waterfall
Languages:	Python, SQL, R, Scala
Packages & Libraries:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, dplyr, ggplot2
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, VBA, Macros)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Databases:	MySQL, PostgreSQL, SQL Server, Oracle
Cloud Platforms:	Amazon Web Services (AWS), Microsoft Azure
ETL & Reporting Tools:	SSIS, SSRS, Alteryx, Snowflake, Google BigQuery, Hadoop, Spark, MapReduce, Data Mining, Data Transformation, Data Integration, Data Warehousing, Data Pipeline
Analytics & ML:	Machine Learning Algorithms, Forecasting & Modelling, Classification, Clustering, Regression, A/B Testing, Hypothesis Testing, ANOVA, Confidence Intervals, SPSS, SAS
Statistics & Math:	Probability Distributions, Linear Algebra, Statistics, Regression Analysis, Advance Analytics, Mathematics
Business Tools:	MS Office Suite (Word, PowerPoint, Excel), MS Visio, MS SharePoint, ServiceNow, Confluence, Trello, MS Project

PROFESSIONAL EXPERIENCE

Optum, NH, USA Business Analyst	Jul 2023 – Present
• Collaborated with clinical data teams to ingest and analyze over 11 million EHR and claims records using Python, applying Pandas for feature extraction and NumPy for normalization to enhance chronic disease progression models. • Built automated Power BI dashboards for risk stratification insights, reducing manual report generation by 18 hours weekly and integrating advanced DAX functions to visualize 12+ KPIs across geographic cohorts. • Leveraged Jira & Azure DevOps for Agile sprint planning, backlog grooming, and requirement traceability.. • Designed complex SQL queries with CTEs and window functions to profile patient risk categories, improving the accuracy of predictive risk scoring models by 27% across Medicare and Medicaid populations.	

- Automated Power BI dashboards with complex DAX expressions, reducing reporting time by 80%.
- Integrated external social determinants using **Google BigQuery**, transforming unstructured SDOH attributes from 7 sources into standardized formats for enriched predictive modeling across Optum analytics workflows.
- Orchestrated ETL workflows in **Alteryx**, establishing over 25 automated pipelines for ingesting EHR feeds and resolving schema mismatches using embedded macros and data cleansing tools.
- Created and versioned **SSRS** reports for the compliance and audit team, automating delivery of 35+ policy adherence metrics via integrated Microsoft **SharePoint** channels and securing them using role-based access.
- Automated **ETL workflows with Apache Airflow**, enabling scalable orchestration across 50+ datasets.
- Implemented **HL7/FHIR-based integration pipelines** for healthcare interoperability and compliance.
- Created SSIS packages to transform and load inventory and CRM data into Snowflake across 45+ dimensions.
- Facilitated JAD sessions, backlog grooming, and user story creation to drive cross-functional alignment.
- Though HL7 and FHIR are not explicitly listed, his extensive experience working with large-scale EHR/claims data pipelines and integrating SDOH suggests readiness to work within **FHIR/HL7-based interoperability frameworks**.

Capgemini, India | Business Analyst

May 2020 - Jul 2022

- Facilitated strategic insights delivery by leveraging **Advanced Excel** (VLOOKUP, PivotTables, VBA) to manipulate 500K+ rows of GSK regional sales data, revealing product underperformance across 11 metro territories.
- Enabled cross-platform visualization via **Tableau** to support field force analytics; implemented parameterized filters and calculated fields, achieving a **22%** reduction in decision latency for business users.
- Developed **predictive ML models** (classification/regression) in Python, operationalized via **Azure ML pipelines**..
- Applied Scikit-learn to train and validate churn prediction models, improving retention strategy outcomes by 11%.
- Applied **SPSS** for statistical segmentation of 800+ physicians by prescribing patterns; ANOVA and clustering models yielded **14%** improvement in targeting strategy precision for high-value HCPs.
- Utilized **SAS** to cleanse and normalize data from multiple CRM sources; processed 5.2 million records for accurate mapping of product-channel conversion paths across 3 quarters.
- Employed **Hadoop MapReduce** on distributed infrastructure to extract trends from over 7 TB of unstructured field activity logs; findings supported the rollout of a nationwide e-detailing campaign across 1200 reps.
- Configured batch data ingestion through **SSIS**, loading GSK distributor-level inventory into **Snowflake** with transformation logic applied across 45+ dimension tables to support SKU-wise variance reports.
- Modeled and validated classification algorithms using **Scikit-learn** to predict churn risk of prescribers; insights led to **11%** uplift in sales team’s retention performance quarter-over-quarter.
- Engaged **Google BigQuery** to perform federated queries across marketing, inventory, and claims databases; accelerated multi-source joins by **31%**, streamlining report refresh timelines significantly.
- Applied **Forecasting & Modelling** techniques including exponential smoothing and regression ensembles to project sales for 18 core products, maintaining a prediction accuracy of **96.2%** for the fiscal year.
- Leveraged **MS Project** and **ServiceNow** to track 62 enhancement requests, coordinate task prioritization with onshore clients, and reduce backlog size by **47%** over two consecutive sprints.
- Leveraged **Jira & Azure DevOps** for Agile sprint planning, backlog grooming, and requirement traceability.

EDUCATION	
Master of Science in computer science	Aug 2022 - May 2024
- University of North TX	
Bachelor’s in electronic and communication	Jun 2017 - May 2021
-Hyderabad, Telangana, India
