

Niharika Tewari

niharikatewari10@gmail.com | Atlanta, GA | (404)-645-6070 | [linkedin.com](https://www.linkedin.com/in/niharikatewari10/)

PROFESSIONAL SUMMARY

- Analyst with 3 years of experience in financial risk analysis with demonstrated analytical and problem-solving skills with exposure to statistical software.
- Experience in the Finance Planning and Analysis (FP&A) team at Honeywell has allowed me to build a foundation based on three critical skills navigating enterprise software systems, mastering financial statements, and proficiency in visualization tools for impactful presentation.
- Experience in EY exposed me to working with clients directly along with handling meetings with them to understand their expectations and has been a part of the negotiation team for handling projects.
- Experience with reporting and analytics applications like Business Objects.
- Ability to translate complex business requirements into insightful visualizations and interactive dashboards using Tableau.
- Proven ability, experience, and overall understanding of fundamental finance and accounting acumen including data modeling, data analytics, forecasting, interpreting financial statements, and reporting.
- Possess the ability to learn quickly as well as the eagerness to adapt to new environments.

SKILL

Language: R, SQL, Python

Visualization Tools: Tableau, Power BI

Methodologies & Technologies: Agile, Waterfall, MS Excel, MS SharePoint, MS PowerPoint, SAP BusinessObjects, Oracle Hyperion Essbase, Alteryx, MS Word, MS Visio, AWS, JaamSim

Soft Skills: Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication

EDUCATION

Master of Science in Business Analytics | Mercer University, USA

GPA 3.7 (Aug 2022-Dec 2023)

Programming with Python, Advanced Business Statistics using R, Management Analytics, Data Mining, Data Science, Financial Analytics, Visual Reporting, Advanced quantitative analysis, and Forecast Modelling.

Master of Business Administration | Christ University Bengaluru, India

Bachelor of Business Administration | Christ University Bengaluru, India

EXPERIENCE

Indus River Technologies, Inc, USA | Feb 2024 – present | Data Engineer

- Create and optimize ETL processes to extract, transform, and load data from various sources into the data warehouse.
- Collaborate with cross-functional teams to understand data requirements and implement data solutions.
- Identify, design, and implement internal process improvements: automating manual processes, optimizing data delivery, re-designing infrastructure for greater scalability, etc.
- Monitor and troubleshoot data pipelines to identify and resolve issues promptly.
- Performs data analysis required to troubleshoot data-related issues and assist in the resolution of data issues.
- Experience in AI applying advanced tree-based machine learning algorithms, including Gradient Boosting for classification problems.
- ML applying supervised, unsupervised, Reinforcement learning. Also, statistical methods like Hypothesis testing, Regression analysis, and Time series analysis.

Mercer University, USA | Sep 2022 – Dec 2023 | Technical Analyst

- Manage the deployment of IT systems, coordinating with relevant stakeholders to ensure a smooth transition and minimal disruption.
- Expertise in creating complex formulas and functions in Excel to perform various calculations and data manipulations. Ability to write complex and optimized T-SQL queries for data retrieval, modification, and manipulation.
- Integrate new systems with existing university platforms and databases, ensuring data integrity and security compliance.
- Provide training and support to end-users to facilitate the adoption of new technologies.
- Collaborate with university departments to understand their IT needs and business processes.
- Conduct a thorough analysis of existing systems and workflows to identify areas for improvement.
- Gather and document functional and technical requirements for new IT solutions.
- Design scalable and efficient IT systems, ensuring compatibility with existing infrastructure and future expansion plans.
- Work closely with software developers and engineers to implement customized solutions or configure off-the-shelf software.

Honeywell, India | Sep 2020 – Mar 2021 | Finance Specialist

- Handles digital transformation projects for the Safety Industry by delivering 20 digital finance initiatives which include data extraction from ERPs such as SAP, Oracle and Hyperion, data cleansing via Alteryx and data presentation on Tableau dashboards.
- Identified opportunities based on assessments for IOT business and designed increased sales visibility for the global sales representatives, highlighting the sales opportunities won or lost.
- Designed and helped execute an operating plan for the Site Manager that measures and controls the performance of the teams in fields of Analytics, Productivity, Skill generation and Quality of deliverables for the year 2020.
- Optimized my performance by streamlining the reporting process through automation and elimination of duplications, saving 1000+ manual hours.
- Used MS Excel, Hyperion Essbase and other ETL tools to locate, extract, manipulate, and analyze data.

Harman (A Samsung Company), India | Apr 2019 – May 2019 | Summer Trainee

- Tasked to extensively work on hedging which is performed as part of the monthly decision-making process.
- Using the SAP platform to extract data for reporting monthly analysis.
- Assisted in analyzing and comparing the best rates offered by various banks.
- Experienced in preparing reports, data analysis and presentation of the monthly assigned project for interns.

EY (Ernst & Young), India | Aug 2016 – Jun 2017 | Analyst

- Part of a Client-serving team and working with the AMERICA team in getting the process and tasks completed efficiently.
- Utilize various tools to create custom reports and update financial models used to budget and forecast project financials, KPIs, and profit and loss data.
- Liaise extensively with various stakeholders while ensuring overall project tracking and planning along with reviewing the daily set of deliverables.
- Conducted thorough analysis of business processes, identified pain points, and recommended process improvements that resulted in a 15% increase in operational efficiency.
- Developed comprehensive business requirements documents, functional specifications, and user stories to guide the development and implementation of software solutions.
- Conducted a comprehensive process review, reducing operational costs by 20% through improved efficiency and resource allocation.

- Chosen by management to spearhead a newly formed team for a strategic client, responsible for leading the team's efforts and facilitating the seamless integration of new hires into the team.

Axis Bank, India | Apr 2015 – May 2015 | Summer Trainee

- Operated with various teams in the accounting, loan and credit department and forex card department.
- Assisted with daily activities like cash posting etc. to meet accounting requirements using the Finacle tool.
- Monitored the accounts which had excess overdrafts to highlight in the weekly meetings.
- Support annual planning process, formal budget review process, and quarterly forecast review process.

PROJECTS

- **Switching Gears: Uncovering the truth about electric Vehicles and pump prices:** Analyzed whether electric vehicle adoption impacts pump prices. Additionally, studied if there is a causal relationship between pump prices, as a potential Granger causality test on electric vehicle adoption. **Tools: R, Tableau**
- **Financial Modelling on Adobe's stock price:** Performed financial analysis and forecast for Adobe's stock performance from 2013 to 2023. Using MS Excel to project growth rate along with company balance sheet, common size income statement, industry analysis and company analysis. **Tools: MS Excel, Yahoo Finance**
- **Data Mining project on E-commerce electronic store data:** Analyzed customer's user journey and predicted whether the next customer will make a purchase or not. Using R to further understand on which day of the week were the highest purchases made. **Tools: R, MS Excel**
- **Data Cleaning in GitHub accounts creation database:** Analyzed GitHub user account creation data to identify fake account creations. Used Python to perform IP address and Geolocation mapping to identify accounts with wrong locations. Used email validation package to identify fake email IDs. **Tool: Python**
- **Analysis of Holiday retail sales through visualizations:** Analyzed the overall holiday revenue, store wise sales as well as identifying the extent to which the external factors affect revenue. Incorporating Power BI and Tableau dashboards to show the results of the analysis. Created reporting solutions in Excel and Power BI that sourced data from SQL data sources using complex queries. **Tools: Power BI, SQL, Tableau**
- **Starbucks simulation model:** Analyzing which simulation model of Starbucks was leading to lesser wait time in the queue and better utilization of operators. This was performed using JaamSim, a simulation software that considered a few assumptions and resulted in an improvement in wait time by 78%. This outcome helped the store with operational efficiency. **Tools: JaamSim, MS Excel**
