

BHANU SREE RAMAIAHGARI

Data Analyst

Location: TX | Phone: (972)-591-7264 | Email: bhanusree1613@gmail.com | [LinkedIn](#)

SUMMARY

- Results-driven Business Intelligence Data Analyst with over **4+ years** of experience and a robust background in data analysis, visualization, and cloud technologies.
- Demonstrates a strong command of **SQL, Python**, and **AWS services**, consistently leveraging these skills to extract actionable insights from complex datasets.
- Proficient in creating interactive dashboards using **Power BI** and **Tableau**, effectively translating data into strategic business recommendations.
- Experienced in implementing **data warehousing** solutions and optimizing database performance, particularly with MongoDB and AWS Redshift.
- Adept at conducting various analytical assessments, including cost/benefit, impact, and **GAP analysis**, to drive informed decision-making.
- Skilled in **Agile methodologies** and version control practices, fostering collaborative environments and ensuring project success.
- Combines technical expertise with strong communication skills to bridge the gap between technical and non-technical stakeholders, authoring comprehensive **BRDs** and **SRS** documents.

TECHNICAL SKILLS

Programming Languages:	SAS, Python SQL,
Databases:	MySQL, Oracle, MongoDB, SQL Server, Snowflake.
Cloud Technologies:	AWS (EC2, S3, Lambda, RDS, RedShift, Glue, Cloud Watch, Athena) Azure (ADF, ASA).
Libraries:	NumPy, Pandas, Matplotlib.
Data Visualization:	Tableau, Power BI, MS Excel.
Analytical Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis, Data Cleaning, Data Wrangling, Data Warehousing
Documentation Skills:	FRD, BRD, SRS
Methodologies:	Agile (Scrum), Waterfall.
Version Control & Other Skills:	Git, GitHub, Jira. EMR/EHR, SSIS, SSAS SSRS.
Soft Skills:	Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication. Root cause Analysis, Change Management, FP&A

EDUCATION

The University of Texas at Dallas Master of Science, Business Analytics	Aug 2022 - May 2024
Acharya Institute of Management and Sciences, Bangalore Bachelor of Business Administration	Jul 2015 - May 2018

PROFESSIONAL EXPERIENCE

BCBS, USA Data Analyst	Sep 2023 – Jan 2024
• Implemented a robust ETL pipeline leveraging Python, AWS services like RDS, Athena, S3, and AWS Glue to seamlessly extract, Transform (Cleaning), and load healthcare data into Redshift Data warehouse. • Applied SAS programming to execute advanced statistical analyses and data manipulations, creating and running scripts to support detailed reporting and actionable insights, thereby improving data-driven decision-making in healthcare analytics • Developed and implemented SQL queries and views tailored for Tableau, driving the creation of dynamic and insightful dashboards for healthcare insurance claims analysis helped in 20% reduction in time spent by stakeholders to interpret data. • Analyzed data obtained by HG Insights in Excel and streamlined the migration process into Snowflake, utilizing Snowflake APIs and eliminating manual tasks by 40% for improved reporting and business intelligence. • Transformed legacy spending data amounting to \$15M, increasing healthcare market forecasting accuracy by 15% using Python. • Developed comprehensive Tableau dashboards tailored for healthcare operations, employing advanced methodologies including Level of Detail (LOD) expressions, calculated fields, parameterization, and hierarchical structuring. • Collaborated with cross-functional teams using GitHub for version control, ensuring seamless integration of code changes, maintaining project documentation, and fostering efficient team collaboration.	
Cipla, India BI Data Analyst	Jul 2020 – Jun 2022
• Created and maintained interactive dashboards and reports using Power BI and Excel, translating complex data into actionable insights for stakeholders across various business units, enhancing decision-making processes and operational efficiency.	

- Conducted **statistical analysis** using **Python** to perform hypothesis testing, regression analysis, clustering, and other analytical techniques to support business decision-making.
- Utilized Python's data visualization libraries such as **Matplotlib**, **Seaborn**, and **Plotly** to create informative and visually appealing graphs, charts, and plots to present data insights to stakeholders.
- Creating and optimizing complex **DAX expressions** for tabular models to meet analytical needs and maintained **Power BI** dashboards for sales reporting, enhancing data visualization and providing critical business insights to senior management.
- Established 10 **data governance** policies and procedures to ensure the security, privacy, and compliance of business data, maintaining the integrity of business intelligence systems
- Developed **Python** and **SQL scripts** to automate **ETL tasks**, streamlining data extraction, transformation, and loading workflows, enhancing analysis efficiency by 30% and maintaining high accuracy.
- Implemented data transformation tasks using **Azure Data bricks** with **Python**, ensuring **data quality** for analytics
- Built comprehensive **Tableau** and **Excel dashboards** to monitor KPIs, providing stakeholders with interactive and visually appealing views of business metrics for quick and informed decision-making.
- Utilized advanced **SQL** queries for data blending, integrating disparate datasets to provide comprehensive views of business performance and uncovering critical trends that guided strategic planning.
- Migrated data from an on-premises database to **Azure Data Lake Gen2** utilizing **Azure Data Factory**.

KPMG, India

Business Analyst

Sep 2018 – Jun 2020

- Collected and documented business requirements by conducting interviews with key stakeholders, focus group discussions, and surveying existing documents, producing clear and comprehensive **FRD** and **BRD** for the Customer Feedback Analysis project.
- Actively participated as a key member of **Agile (Scrum)** teams, collaborating with cross-functional members to deliver data analysis projects on time and within scope
- Designed **physical and logical data models**, **metadata** documentation, and production specifications, and utilized **MS Excel** to create Crosstabs for further data analysis.
- Conducted **root cause analysis** on **supply chain** disruptions, resulting in the identification of critical issues and the implementation of preventive measures, reducing downtime by 20%.
- Conducted data gathering and reconciliation using **Excel**, resulting in a 20% increase in data accuracy.
- Designed and maintained functional reports in **Tableau** based on user requirements, leading to a 30% increase in user satisfaction
- Optimized several complex **SQL queries** for better performance and efficiency, resulting in a 25% reduction in query execution time.
- Developed predictive analytics use-cases with **Python**, leading to a 25% increase in predictive accuracy.
- Analyzed data to identify the best **BI solution** for generating reports, dashboards, scorecards, and data cubes using **Tableau**.
- Skilled in designing and developing effective data visualizations using **Power BI**, selecting appropriate charts and graphs, and Applying interactive features to enhance user experience.
- Generated analytical reports with recommendations for management to enable strategic planning, using **ETL** processes to gather Data from various external sources.
- Conducted **cost/benefit analysis** to determine the potential financial impact of customer feedback solutions, developing 10 detailed recommendations based on analysis for executive **decision-making**.
- Compiled aggregate customer feedback data into highly detailed **statistical dashboards** and reports through Tableau and MS Excel, effectively interpreting and sharing data insights with 20 stakeholders.
- Implemented project documents and code versioning using the **Git version-control** system, ensuring accurate tracking of changes and effective integration with development teams.

PROJECTS

Customer Review Analysis: Analytical Reviews Using Audit Software

- Conducted analytical reviews on 14,465 records from Amazon's dataset using Excel, ACL, IDEA, and Tableau.
- Achieved a 0% duplication rate by implementing advanced keyword analysis and eliminating redundancies, significantly improving resume search ability.
- Investigated the top 5 product categories and correlated discounts with ratings, extracting actionable insights using formulas.
