PROFESSIONAL SUMMARY

SQL / Power BI Developer with over 6 years of IT experience in database design, development, ETL processes, data modelling, and business intelligence (BI) solutions. Proven expertise in Microsoft SQL Server (2016–2021), SSIS, SSRS, SSAS, Power BI and Tableau for building reports, dashboards, and data visualizations. Strong experience in data collection, data analytics, and data science, with a solid foundation in relational databases such as SQL Server and Oracle.

Proficient in advanced T-SQL, DAX programming, and performance tuning for scalable BI solutions. Skilled in writing optimized queries and designing interactive reports and semantic models in Power BI. Experienced in Python and R programming, enhancing capabilities in analytics and statistical modelling.

Hands-on with Azure Data Services, including Azure SQL, Data Factory, and cloud migration strategies. Adept at transforming business requirements into technical solutions that drive strategic decisions through impactful insights. Collaborative, detail-oriented, and committed to continuous improvement in data-driven environments.

EDUCATION

MBA in Management Information Systems

Concordia University Wisconsin, Mequon, WI

TECHNICAL SKILLS

- **Databases:** SQL Server 2021/2019/2017/2016, Azure SQL, Oracle 11g, MySQL
 - **Cloud Platforms:** Microsoft Azure (Data Factory, Synapse, Data Lake, Azure SQL)
 - **ETL Tools:** SSIS, Azure Data Factory (ADF)
 - **Reporting & Visualization:** Power BI (Service, Desktop, Gateway), SSRS, Tableau, Report Builder
 - **Power Platform:** Power Apps, Power Automate, Power BI integration
 - **Languages:** T-SQL, DAX, MDX, Python, R, C#, LINQ, Shell Scripting
 - **OLAP & Modeling:** SSAS (Tabular & Multidimensional), Power BI Dataflows, Star/Snowflake Schemas
 - **DevOps & Source Control:** Azure DevOps, Git, TFS, Visual Studio
 - **Monitoring/Utilities:** SQL Profiler, Performance Monitor, Query Store, SQL CMD
 - **Operating Systems:** Windows Server 2022/2019, Linux (basic)
 - **Methodologies:** Agile, Scrum, SDLC, CI/CD
-

PROFESSIONAL EXPERIENCE

SQL / Power BI Developer

Liberty Mutual Insurance, Boston, MA — July 2024 to Present

- Built end-to-end Power Platform solutions: Power Apps data-entry forms (SQL/SharePoint), automated approval workflows with Power Automate, and real-time dashboards in Power BI for stakeholder visibility.

- Developed enterprise Power BI dashboards using DAX, Power Query, and Azure SQL/on-prem SQL sources.
- Designed and maintained SSIS packages with advanced error handling, event handlers, and parameterized ETL logic.
- Published Power BI reports to the Service using dataflows, paginated reports, and implemented Row-Level Security (RLS).
- Worked with Azure Synapse serverless SQL pools for large-scale data warehousing and analytics.
- Configured and maintained Power BI Gateway to refresh on-premises SQL data into Power BI Service.
- Created SSAS Tabular models with calculated columns, measures, and optimized relationships.
- Optimized T-SQL queries, indexes, and performance using Query Store and execution plan tuning.
- Partnered with data scientists to support predictive Modeling and advanced analytics initiatives.
- Automated CI/CD deployment pipelines using Azure DevOps (YAML pipelines).

Environment: SQL Server 2021/2019, Azure SQL, Power BI Service, SSIS, SSAS, Azure Synapse, Power BI Gateway, Power Apps, Power Automate, Git, Azure DevOps

SQL BI Developer

Wipro, India — *July 2020 to Jan 2023*

- Developed SSIS packages with advanced control flow, logging, and checkpointing for fault-tolerant ETL processes.
- Built interactive Power BI dashboards using Bookmarks, Drill through, and Smart Narrative.
- Migrated legacy SSRS reports to Power BI and improved visual storytelling through modern visual features.
- Developed Azure Data Factory pipelines to orchestrate ETL from Blob Storage and SQL to Azure SQL.
- Designed data models using star and snowflake schemas to support high-performance BI solutions.

Environment: SQL Server 2019/2017, Power BI, SSIS, SSRS, Azure Data Factory, Git, Azure

SQL Server BI Developer

Accenture, India — *May 2018 to June 2020*

- Designed and deployed SSAS multidimensional cubes and tabular models for analytical reporting.
- Developed executive and operational dashboards using Tableau and Power BI.
- Automated ETL processes using SSIS to load data from multiple legacy systems into the data warehouse.
- Built parameterized SSRS reports with drill-down and export capabilities.
- Improved reporting performance by creating optimized indexes and materialized views.

Environment: SQL Server 2016/2017, SSAS, SSIS, SSRS, Tableau, Power BI
