SUMMARY

Results-driven Data Engineer with 5+ years of experience in designing and developing end-to-end data solutions, improving data processing efficiency through scalable pipeline development using Databricks, PySpark, and Python. Proficient in SQL, T-SQL, Pandas, and Linux shell scripting, with hands-on experience in big data tools like Spark, Hive, and Hadoop for processing datasets at scale. Boosted reporting speed by optimizing data models and SQL queries across PostgreSQL, SQL Server, and MongoDB. Delivered impactful dashboards with Power BI and Tableau, enabling data-driven decision-making across business units. Implemented cloud-native ETL workflows on AWS (Redshift, Glue, S3, EMR, Athena) and Azure (Data Factory, Synapse, Databricks), reducing infrastructure costs by 25%. Collaborative and agile-focused, with a proven record in leading crossfunctional teams and deploying high-performance, secure, and regulatory-compliant data pipelines.

SKILLS

- **Programming Languages:** Python (Advanced), SQL (complex queries), Java, C#, R, Scala, Unix/Linux
- **Data Processing:** Apache Spark, Kafka, Hadoop (HDFS, MapReduce, Hive), Spark SQL, EDA, Databricks.
- **ETL Tools:** Apache Airflow, Talend, Informatica, Azure Data Factory, DBT, Fivetran.
- **Cloud Platforms:** AWS (S3, Glue, EMR, Kinesis, Athena), Azure (Data Factory, SQL Database, Data Lake), GCP
- **Data Warehousing:** Amazon Redshift, SQL Server, Hive, Snowflake, OLTP, OLAP.
- **Database Management:** MongoDB, PostgreSQL, Oracle, MySQL
- **Data Visualization:** Power BI, Tableau, Looker, Excel.
- **CI/CD & DevOps:** Jenkins, Docker, Kubernetes, Terraform, Azure DevOps
- **Data Governance:** IAM Roles, Colibra, GDPR, HIPAA, CCPA compliance.
- **Soft Skills:** Adaptability, Collaboration, Problem-Solving, Stakeholder Management.
- **Certifications:** AWS solution Architect, Python, SQL certified Data engineer.
- **Other:** TensorFlow, PyTorch, Apache Nifi, JIRA, GitHub, Git, Machine learning.

PROFESSIONAL EXPERIENCE

Data Engineer | Regions Bank, Tupelo, Mississippi, USA

Nov 2024 - Present

- Designed and managed relational and NoSQL databases using AWS RDS (PostgreSQL, MySQL), DynamoDB, and MongoDB, supporting over 50 production applications and ensuring high data reliability and system uptime.
- Built scalable ETL pipelines with Databricks and PySpark, processing over 5TB of financial data monthly, reducing ETL execution time by 30% and improving reporting agility.
- Automated database provisioning, backups, and monitoring using Python, reducing manual operations by 50% and accelerating deployment cycles by 3+ hours per release.
- Integrated Snowflake with external sources using DBT, enabling seamless ELT processing and improving reporting cycles by 25% through more efficient data modeling and transformation.
- Deployed CI/CD workflows with Jenkins, GitLab, and Terraform, reducing deployment errors by 40% and ensuring consistency across environments.
- Created and maintained 10+ Power BI dashboards for executive teams, resulting in a 20% improvement in strategic decision-making speed through real-time KPIs and insights.
- Migrated 50TB+ healthcare data to AWS with zero downtime, reducing infrastructure costs by 25% and improving data availability for analytics use cases.
- Implemented GDPR and CCPA compliance using AWS Lake Formation and IAM, ensuring 100% adherence to privacy and access control regulations.
- Optimized Kafka and Airflow pipelines to reduce ingestion latency by 35%, enabling near-real-time processing of over 1 million healthcare claims per day.
- Built Python-based data validation checks to catch 98% of anomalies before reaching production, dramatically enhancing data trustworthiness.

Data Engineer | Accenture Pvt Ltd , Bengaluru , India**Sep 2022 - Jun 2024**

- Designed and implemented scalable data pipelines using AWS Redshift, Glue, and Lambda, efficiently processing over 10TB of healthcare data daily to support advanced analytics use cases.
- Automated pipeline deployments via AWS CodePipeline and CodeDeploy, enhancing CI/CD workflows and reducing deployment time by 40%, ensuring consistent and rapid delivery cycles.
- Led the migration of 50TB+ healthcare data to AWS cloud infrastructure, achieving zero downtime and reducing operational costs by 25% through optimized storage and compute strategies.
- Implemented GDPR and CCPA compliance frameworks using AWS Lake Formation and IAM, ensuring 100% regulatory adherence and secure access control across all healthcare datasets.
- Optimized streaming and batch data pipelines built on Apache Kafka and Airflow, reducing data ingestion latency by 35% and enabling real-time processing of over 1 million claims per day.
- Developed high-reliability pipelines to integrate healthcare claims data into Snowflake, maintaining HIPAA compliance while ensuring scalable, high-quality analytics capabilities.
- Built and deployed automated data validation systems using Python, detecting 98% of data anomalies pre-production, significantly improving data trust and accuracy in reporting pipelines.

Business Analyst | Capgemini, Bengaluru, India**Jun 2020- July 2022**

- Analyzed healthcare claims, clinical datasets, and EHR/EMR data using Python, SQL, and Excel to identify trends in patient outcomes, disease patterns, and provider performance.
- Collaborated with U.S. payer and provider clients to understand medical workflows, ICD-10/CPT coding, eligibility data, and biomedical documentation, improving data interpretation and analytics accuracy.
- Developed scalable big data pipelines using Apache Spark, Databricks, Hive, and Kafka, enabling faster processing of high-volume healthcare transactions.
- Performed data cleaning, normalization, and feature mapping for clinical attributes (vitals, lab values, medication history, medical device data), applying biomedical engineering knowledge for accurate data interpretation.
- Designed and automated ETL workflows using Apache Airflow, Informatica, and Azure Data Factory, improving data quality and reducing manual processes by 40%.
- Built interactive Power BI and Tableau dashboards to deliver insights on patient utilization, readmission rates, claims efficiency, and healthcare cost trends.
- Interpreted clinical metrics such as Length of Stay (LOS), comorbidities, lab indicators, and diagnosis groupings, supporting data-driven clinical and operational decision-making.
- Ensured full compliance with HIPAA, PHI, GDPR, and CCPA by implementing data governance controls, IAM policies, and secure data access frameworks.
- Worked closely with clinicians, product owners, data engineers, and QA teams to translate healthcare workflows and business requirements into actionable analytical solutions.
- Conducted root-cause analysis on clinical data anomalies using Spark SQL, Python, and EDA, improving overall data accuracy by 30%.
- Supported predictive modeling initiatives using scikit-learn, TensorFlow, and time-series analysis to identify risk factors, disease trends, and operational bottlenecks.
- Optimized reporting and analytics for medical claims systems using Snowflake, Amazon Redshift, and SQL Server, improving dashboard refresh and reporting performance by 25%.

EDUCATION**HARRISBURG UNIVERSITY OF SCIENCE AND TECHNOLOGY – 3.5, USA (2024-2025)**

Business Analytics / Masters
