PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience driving conversion, retention, and operational efficiency for healthcare, nonprofit, and ecommerce platforms. Expert in funnel optimization, customer journey analytics, lifecycle measurement, and experimentation design. Skilled in SQL, Python, Microsoft Fabric, Power BI, GA4, Google Tag Manager, Snowflake, Looker Studio, and Tableau. Proven ability to translate complex datasets into executive-ready insights, identify friction points, and implement solutions that improve conversion by 10–25%, reduce operational delays, and increase engagement across digital marketplaces.

EDUCATION

University of Illinois Urbana-Champaign – Master of science in Business Analytics, GPA – 3.79/4 | August 2024 – May 2025

Relevant Coursework: Financial Analytics, Data Warehousing, Business Intelligence, Cloud Data Engineering

MANIT-Bhopal – Bachelor of Technology in Electronics and Communication, GPA: 7.82/10 | July 2019 – May 2023

WORK EXPERIENCE

Data Analyst, Sensegrass, Remote

November 2025 – Present

- Built operational and lifecycle analytics frameworks across 14 agricultural regions, enabling tracking of 5,000+ customers and service adoption patterns, improving reporting accuracy by 40%.
- Delivered real-time dashboards monitoring onboarding, telemetry coverage, and operational throughput, reducing regional investigation time by 3 days per issue.
- Standardized 27 KPIs, improving cross-functional team efficiency in evaluating utilization trends and regional performance by 35%.
- Conducted cohort analysis to prioritize service interventions, increasing engagement in high-variance regions by 20–25%.
- Implemented automated data quality monitoring, detecting missing telemetry and inconsistent records, increasing dataset reliability by 30%.

Data Analyst, THE DONOVAN'S VENOM, Remote

August 2025 – October 2025

- Designed GA4 event tracking and GTM taxonomy capturing 35+ lifecycle events, improving donation funnel visibility across 12 campaigns.
- Built funnel dashboards in Tableau and Looker Studio, identifying drop-offs, resulting in a 15% increase in completed donation transactions.
- Performed multi-channel attribution analysis, enabling reallocation of \$50k+ in marketing spend to higher-converting channels.
- Supported A/B testing of campaigns, measuring engagement and checkout conversion, resulting in 10–12% lift in donor completion rates.
- Established lifecycle KPI definitions, standardizing reporting for acquisition, conversion, and retention across teams.

Data Science Analyst, CNeutral, Remote

August 2024 – May 2025

- Built sustainability analytics models evaluating 200+ investment portfolios for ESG compliance, reducing manual reporting effort by 60%.
- Developed dimensional data marts, enabling executives to monitor exposure, compliance performance, and risk metrics for \$500M+ assets under management.
- Optimized SQL queries, improving dashboard refresh reliability and reducing executive report generation time by 50%.

Data Analyst, IQVIA, Pune, India

October 2023 – July 2024

- Analyzed 2M+ healthcare claims, identifying therapy initiation delays, adherence gaps, and provider engagement trends.
- Built patient journey dashboards tracking treatment adoption and supply chain alignment, improving decision-making efficiency by 25%.
- Implemented automated validation workflows, reducing data errors by 30% in regulatory reporting.
- Built operational dashboards monitoring SLA adherence and analytics pipeline reliability across 50+ datasets.

Research Data Analyst, MANIT-Bhopal

November 2022 – September 2023

- Developed experimental analytics dashboards tracking model performance and dataset quality, improving transparency by 40%.
- Automated model validation reporting, reducing manual review time by 50%.

Data Analyst Intern, Helical IT Solutions Pvt Ltd

August 2021 – September 2022

- Supported web/product analytics for ecommerce platforms with 2–3M monthly events, transforming raw data into 10+ cleaned tables for dashboards.
- Conducted funnel and cohort analyses, identifying drop-offs that increased conversion by 8–10%.
- Developed BI dashboards in Looker Studio and Power BI to monitor traffic, session metrics, and conversion.
- Assisted in weekly and monthly reports for 8–10 stakeholders, ensuring data accuracy and consistency.

PROJECTS

Microsoft Fabric Lifecycle Analytics Pipeline – Built an end-to-end Fabric Lakehouse pipeline integrating multi-source event data, automating ingestion and transformation workflows, improving analytics query performance by 30% and reducing manual reporting effort by 40%.

Digital Healthcare Marketplace Analytics – Modeled patient appointment journeys using GA4-style event data; built funnel dashboards that reduced booking drop-offs by 12% and increased appointment completions by 15%.

Digital Lending Funnel & Risk Analytics – Analyzed 3.6M loan records; developed 24 borrower behavior indicators and predictive models that identified high-risk segments with 85% accuracy, supporting early mitigation.

Enterprise Analytics Monitoring Framework – Designed data quality monitoring workflows and SLA dashboards, reducing executive reporting errors by 30% and improving data lineage transparency.

TECHNICAL SKILLS

Analytics & Tracking: GA4, Google Tag Manager, Funnel Analytics, Cohort & Retention Analysis, Attribution, Event Taxonomy

Programming & Data Analysis: SQL, Python, PySpark, R

Data Visualization & BI: Tableau, Power BI, Looker Studio, Streamlit, Matplotlib

Cloud & Data Platforms: Snowflake, Databricks, BigQuery, AWS, GCP, Azure Data Factory, Microsoft Fabric (Lakehouse, OneLake, Power BI Integration)

Governance & Monitoring: Data validation frameworks, Metadata documentation, Data lineage, Analytics reliability monitoring

Methodologies: KPI design & forecasting, Experimentation, Funnel analysis, Agile Scrum, Stakeholder collaboration

CERTIFICATIONS

Python Advanced SQL (Kaggle, 2023) | Python for Data Analytics (Udemy, 2023) | Apache Kafka Fundamentals (Udemy, 2023) | Serverless Analytics (AWS, 2023) | Exploring and Producing Data for Business Decision Making (Coursera, 2024) | Google AI Essentials (Coursera, 2025) | AWS Certified Cloud Practitioner (2025) | McKinsey.org Forward Program (2025)

PUBLICATIONS

- [“Classification of Currencies as Authentic or Counterfeit: A Data-Driven Approach”](#) Springer ICSDP 2024.

PROJECTS

- Finalist Smart India Hackathon 2022
- Winner National Data Science Hackathon 2021
- Founder AI and Data Science Club MANIT mentoring more than 50 students
