EDUCATION

Master of Science in Information Technology & Management

The University of Texas at Dallas, Dallas, Texas

May 2024

GPA: 3.9

Bachelor of Science in Computer Science

Savitribai Phule Pune University, Pune, India

November 2020

GPA: 3.5

PROFESSIONAL EXPERIENCE

Data Analyst | Community Dreams Foundation, Texas, US

September 2024 – Present

- Created predictive models with **Python** and **Scikit-learn** to forecast trends and boost marketing strategies, user engagement
- Applied **AI** tools and **SQL** to efficiently segment customers and tailor marketing campaigns, driving higher retention rates
- Interpreted large datasets with **Tableau** and **Excel** to uncover valuable insights and improve marketing ROI
- Collaborated with **marketing** teams to align data strategies with business goals, improving campaign targeting and ROI
- Cleaned and validated large volumes of complex marketing and donor data to ensure consistently high-quality analytics
- Developed intuitive dashboards and performance reports to support critical executive-level decision-making processes
- Integrated **Airflow** for automating and scheduling ETL processes, ensuring consistent data refresh and monitoring
- Gained hands-on exposure to **Snowflake** concepts including data loading, schema design, and performance optimization, leveraging experience with **Azure SQL** for cloud data warehousing
- Identified key data-driven opportunities for growth and presented actionable findings to leadership for strategic planning
- Integrated third-party data sources (e.g., CRM systems, public datasets) to enrich analysis and expand targeting precision
- Collaborated with Salesforce users to maintain data quality between **CRM** and reporting databases, ensuring consistency
- Streamlined data pipelines and reporting workflows with **SQL** and **Python**, boosting efficiency and accuracy in analytics
- Supported **Azure SQL** administration by monitoring query performance and validating stored procedures
- Implemented **CI/CD** concepts for automating deployment of data workflows and maintaining version control using Git and GitHub
- Worked in **Linux** based environments to automate and monitor ETL pipelines using Airflow and command-line tools, ensuring stable data workflows

Junior Data Analyst | MIST IT Services, Mumbai, India

May 2020 – June 2022

- Cleaned and pre-processed large datasets using **Python** and **Excel**, ensuring data accuracy and enabling actionable insights
- Executed **SQL** queries to generate detailed reports and perform advanced data analysis for business decision-making
- Conducted data profiling and quality checks to uncover insights, improving efficiency of cross-functional decision-making
- Designed and implemented dynamic **Power BI** dashboards to effectively communicate analytical findings to stakeholders
- Automated **ETL** workflows using **Python** and **SQL**, achieving a 25% reduction in processing time and improving data accuracy
- Built and deployed predictive models using machine learning algorithms to forecast trends and support strategic planning
- Leveraged **AWS Glue** and **Lambda** to automate data ingestion and transformation from multiple sources, enhancing ETL scalability.
- Assisted in migrating ETL pipelines to a cloud data warehouse (Snowflake) prototype, applying concepts of data partitioning, role-based access, and query performance tuning
- Collaborated with cross-functional teams to align data strategies with business priorities, improving client satisfaction by 10%.
- Documented SQL scripts, data flows, and reporting standards to maintain consistency across analytics projects.
- Utilized **Amazon S3** and **Redshift** for centralized data storage and advanced querying, improving accessibility and performance of analytics workflows.
- Executed and validated SQL-based data transformations within **Linux** environments, utilizing shell scripting to automate repetitive ETL tasks

IT Intern, Web Development | MIST IT Services, Mumbai, India

September 2019 - April 2020

- Monitored the company website for issues, resolving 30% of identified bugs using **HTML**, **JavaScript** debugging techniques
- Optimized ETL data flows and resolved migration issues, streamlining database management and improving efficiency
- Increased session duration by 40% through the redesign of the webpage, focusing on user engagement and experience
- Integrated third-party **APIs** and optimized scripts to improve website functionality and performance, enhancing user experience
- Designed and executed **A/B** tests for various website features, resulting in a 20% improvement in conversion rates
- Reduced IT issues by 25% through efficient troubleshooting strategies, enhancing overall system performance and user satisfaction

SKILLS

Programming Languages and Databases - Python, C, C++, SQL, Snowflake, MySQL, JavaScript

Cloud and Web Technologies - Azure, AWS, HTML, CSS

Machine Learning and Data Science - Keras, PyTorch, Scikit-learn, Seaborn, TensorFlow, NumPy, Pandas

Data Analysis and Visualization - Tableau, Power BI, DAX, SQL, Excel, R, Data Cleaning, Data Visualization, Statistical Analysis

Software - PyCharm, Android Studio, R Studio, Excel, SQL Server, Visual Studio

Operating Systems - Windows, Linux

Others - Jira, SDLC, Agile, Waterfall
