---

Data Analysis experienced in software development, while specializing in data modeling, dashboard creation, reporting automation, database design, and analytical problem-solving. Proven ability to translate business needs into data-driven solutions that improve efficiency, accuracy, and decision-making. Experience collaborating with cross-functional teams, managing technical projects end-to-end, and delivering insights that support strategic business outcomes. Adept in Python, SQL, and visualization tools with a strong foundation in software engineering.

## **SKILLS**

- **Programming:** Python(Pandas, NumPy, Matplotlib), SQL, R
- **Machine Learning:** Regression: Linear, Logistic, Statistics, Random Forest, Cluster, PyTorch
- **Data Analysis Tools:** Data Cleaning & Preprocessing, Feature Engineering, EDA, ETL, Statistical Modelling
- **Tools:** Power BI, Tableau ([Dashboard Link](#)), Excel, Jupyter Notebook, Streamlit, VSCode, RStudio
- **Web Tools:** Git, GitHub, Version Control, GCP, Spark, Pyspark

## **PROJECT**

### **Adverse Risk Prediction of Diabetes Type-2 with IOT Device Data | [LINK](#)**

- Built a cloud-based analytics pipeline using multi-sensor IoT data to predict Type-2 diabetes
- Identify patient health risks in real-time by monitoring vital signs and predicting adverse events to support proactive clinical interventions
- Performed feature engineering and model evaluation to support real-time risk alerts
- Designed dashboards to communicate predictions and risk indicators to clinical stakeholders
- Successfully processed 1,440+ data points per patient daily (1 RPM) Achieved sub-second prediction latency through Cloud Run autoscaling Identified high-risk patients requiring immediate clinical attention
- Enabled proactive intervention by predicting adverse events priorly

## **EDUCATION**

- **Master of Science in Applied Data Science** (May 2026) | Indiana University, Luddy School of Informatics, Computing, and Engineering, Indianapolis, IN
- **Diploma in Software Development** | Universal College of Learning, New Zealand
- **Bachelor of Engineering in Information Technology** | Nagpur University, India

Certificate | Google Data Analytics

## **EXPERIENCE**

### **Coding Instructor** (Coding with Kids |CampK12) 2020-2023

- Designed data-driven learning modules and used analytics to track student progress, identify performance patterns, and improve curriculum
- Developed dashboards and reports to visualize performance and deliver actionable insights.
- Developed dashboards and reports to visualize performance and deliver actionable insights.

### **Software Developer** (TenderLink, New Zealand) 2011-2012

- Development of SaaS Portal search Facility and of online Application Form for their Website
- Performed data validation, debugging, and quality checks that reduced software/data errors by 30%.
- Conducted gap analysis and resolved inconsistencies in data submissions, improving accuracy and workflow efficiency.

### **Software Developer** (21st Century Web, India) 2009-2010

- Developed a PHP-based SEO analytics application
- Automating keyword performance tracking and improving client web visibility
- Reduced software errors by 30% through data validation, debugging, and optimized testing procedures
