
SUMMARY

- 3+ years experienced Java developer with proven expertise in developing micro-services in an Agile work environment
- Worked on 2 professional projects with a Global Retail client and 3 Android applications working for SUNY RF
- Proficient at utilizing Java frameworks Spring, Hibernate, Collections and SonarQube
- Recipient of ACE Award (Accenture), Dean's Scholarship and Research Scholarship (Binghamton University)

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Kotlin, MySQL, MongoDB

Web Technologies: HTML, CSS, ReactJS

Frameworks: Spring Boot, Spring Batch, Spring MVC, Spring Cloud, Hibernate, Android, Google Cloud Platform, AWS, Docker

Operating Systems: Linux, Windows and Android

Technologies: RESTful API, SOAP, IBM Websphere, IBM MQ, Socket Programming, Maven, Gradle

Tools: Git, Eclipse, Android Studio, JIRA, Junit, Mockito, SOAPUI, Postman, Websphere console

Courses: Data Structures and Algorithms, Operating Systems, Cloud Computing, Programming Languages, Computer Security

PROFESSIONAL EXPERIENCE

SUNY Research Foundation | Binghamton, NY **Android Developer (Research Assistant)** **Jun 2020 – May 2021**

- Designed and developed an Android application for visualization of 7 vital signs
- Leveraged Bluetooth LE to connect to vital signs device transmitting at 10 Hz
- Boosted performance by efficiently handling threads, activities and fragments
- Explored solutions in brainstorming sessions with research team to solve critical issues

Binghamton University | Binghamton, NY **Research Assistant** **Jun 2020 – Jan 2021**

- Integrated Ghidra on a remote server inside LXC container promoting modularization of system
- Customized Cuckoo and Cuckoodroid on remote server for Android malware analysis
- Analyzed 20 malware samples on Cuckoo, Ghidra and Cuckoodroid revealing patterns for machine learning

Accenture Solutions | Pune, India **Software Engineer** **Aug 2016 – Jul 2019**

- Developed Web services using EJB 3.1, Hibernate and Java Persistence API
- Cultivated REST application returning current status of data from 4 databases reducing search times by 75%
- Overhauled a Spring boot application enabling communications in 3 distinct message-queue systems
- Devised a Spring Batch service for synchronization of data between 2 systems boosting consistency
- Revamped 1 web service with 150 business rule validations reducing processing time by over 50%
- Mentored 2 associates on Java frameworks and Agile methodologies resulting in higher team performance
- Spearheaded a team of 3 associates for delivering logic expanding the business to 2 new continents

EDUCATION

Binghamton University, SUNY, USA	Master's in Computer Science	GPA: 3.90	May 2021
Savitribai Phule Pune University, India	Bachelor's in Information technology	GPA: 3.42	Jun 2016

PROJECTS

Android App for SMS Cloud Backup | Java, ADB, Google Drive API, SMS Broadcast Receiver **Mar 2021**
A Background service that saves all incoming SMS to user's Google Drive automatically. Google Oath 2.0 and Drive API connect to user's drive

Back to School Game | Unity, C# Scripting **Feb 2021**
A 2D platformer built with Unity game engine. Player has 20 game days to complete course

Android App for Restaurant and Pubs Social Platform | Java, Android Debugging Bridge, SQLite, REST API **Dec 2019**
A Social Media platform for restaurant/pub owners to showcase environment. Map based UI on customer side helps in identifying places according to user's preferences

Brain Computer Interface System | Arduino - C# based language, Bluetooth 2.1, Arduino Microcontroller **May 2016**
An interfacing system for hands-free use of a bot leveraging NeuroSky headset's brain mapping. Concentration and meditation levels of brain serve as inputs for forward/backward movements. Reduces reaction time by 50%
