
PROFILE SUMMARY

Dedicated professional with 3+ years of experience, including expertise in RPA using UiPath and Automation Anywhere. Expert in streamlining processes, conducting workflow assessments, production support and creating detailed technical specifications. I'm an Active job seeker committed to learning new technologies, leveraging diverse experiences to drive efficiency and contribute to revolutionary projects across domains.

EXPERIENCE

Operations Analyst (Holmes Student Center)

Nov 2023 – Present

Northern Illinois University, DeKalb, IL

- Conducted comprehensive data analysis using Excel and Tableau, tracking student center traffic patterns and revealing an average of 5,000 daily visits on weekdays, informing resource allocation and operational planning.
- Analyzed event attendance data for 5-7 daily events, averaging 100-200 participants each, to optimize scheduling and improve facility utilization rates by 15%.
- Developed predictive models to forecast peak usage times and seasonal trends, resulting in a 20% increase in operational efficiency and improved emergency preparedness protocols.

Business Consultant (NIU ELC Project)

Sports Car Club of America, Chicago, IL

Jan 2024 – May 2024

- Collaborated on a business transformation project; compiled over 20 critical requirements through stakeholder interviews which directly informed improvements leading to streamlined operations within six targeted units.
- Played a crucial role in enhancing three business processes and managing risks, ensuring efficient operations and the mitigation of potential challenges.
- Designed and implemented six effective strategies in marketing, sponsorships, data analysis, employee retention, and brand improvement, resulting in significant advancements in the organization's overall performance and growth.

Business Analyst RPA

Recode Solutions, Chennai, India

Jun 2021 – Dec 2022

- Implemented a robust backlog grooming process within JIRA, ensuring alignment of project requirements with business objectives; improved team productivity and sprint completion rates across departments.
- Developed comprehensive project documentation, including 15 Process Flow Diagrams and 10 UML diagrams, which streamlined communication across departments and improved project clarity, ultimately reducing project delays by 20 percent.
- Developed comprehensive system requirements from stakeholder input, ensuring alignment with business objectives; reduced project delays through enhanced communication with Scrum calls between technical and non-technical teams.
- Demonstrated expertise in eliciting business Requirements gathering through comprehensive techniques such as questionnaires, and business scenarios, and facilitated sessions with diverse stakeholders, SMEs, and developers.
- Seasoned in navigating the complexities of E-commerce (B2B), Healthcare, and RPA domains.
- Capitalized on Agile development methodologies, contributing to a collaborative team environment that led to the successful completion of 10+ complex workflows on time and aligned with key business objectives.
- Fostered communication between departments through regular meetings focused on automation strategies; identified gaps to enhance collaboration among teams using JIRA resulting in resolving five major bottlenecks within existing workflows.
- Utilized UiPath and Automation Anywhere platforms to support and administer day-to-day operations of RPA processes in production environments, ensuring stability and optimal performance of robotic environments.

PROJECTS

Employee Offboarding Process Automation:

- Created an automated solution for revoking access for resigned employees, reducing the time and manual effort required for off-boarding tasks across platforms like Outlook, Active Directory, ServiceNow, PayPal and four other platforms.
- Gathered process requirements, participated in design and development phases, and coordinated user acceptance testing (UAT) and production testing to improve the solution's effectiveness by 20%.
- Regularly updated clients on project status, managed backlogs and changes in JIRA, and prepared support documentation for two support teams to ensure smooth process transitions.

Price Change Automation:

- Devised an automated workflow for the Electronics & Home Appliances domain, facilitating the situation or need-based update of prices for thousands of products by extracting data from a business requirement input file and updates client's database within minutes.
- Collected process requirements, utilized the AS400 application to maintain accurate reflection of price details in the database.
- Implemented UAT, performed code reviews, and composed technical knowledge documents for three support teams to assure a seamless transition and ongoing process management.

SKILLS

Tools/Languages: RPA, Automation Anywhere, UiPath, Tableau, JIRA, SQL, Python

Cloud/Databases: AWS, MongoDB, Relational Database (MSSQL)

Office Tools: MS Outlook, MS Excel, MS PowerPoint, MS Visio

Project Management: Project Planning, Timeline Management, Agile, Scope Change Management, Risk Management

Relevant Coursework: Project Management, Business Analysis and Design, Business Data Visualization, Digital Transformation Strategy, SAP ERP, Cyber-Security

Hard Skills: RPA, Business Analysis, Process Automation, Technical Solutions

EDUCATION

Northern Illinois University, DeKalb, IL, USA.

Jan 2023 - Dec 2024

Master's in management information systems

Sri Venkateswara University College of Engineering, Tirupati, India.

Aug 2015 – May 2019

Bachelor of Engineering – Electronics and Communications

CERTIFICATIONS

Automation Anywhere Certified Advanced RPA Professional

AWS Solutions Architect Associate by Intellipaat.

Telecom Essentials by Ericsson.
