

DINESH CHILUKURI | | FRONTEND DEVELOPER

+1 (551)-799-5330 |dineshsaikalyan@gmail.com | http://linkedin.com/in/dinesh-chilukuri-7944a9302 | Jersey City, NJ

SUMMARY

UI/Front-End Web Developer with 4+ years of experience in designing and developing responsive, user-focused web applications. Proficient in **HTML5, CSS3, JavaScript, TypeScript, AngularJS (v2–17), ReactJS/Redux**, and **Vue.js**, with expertise in **MEAN stack** development (MongoDB, Express, Angular, Node.js). Skilled in **Cypress test automation** integrated with **CI/CD pipelines**, **Angular Material Design**, and **Responsive Web Design**. Strong background in **API integration** with **Django Rest Framework** and **RESTful services**. Experienced in **agile methodologies** (Agile, TDD) and **testing frameworks** (Jasmine, Karma, Mocha), enhancing project quality and collaboration. Holds a Master’s in Information Systems from Trine University, bringing a user-centric approach to modern web development.

TECHNICAL SKILLS

- Programming Languages:** HTML, CSS, JavaScript, TypeScript, Python, SQL
- Frontend Frameworks & Libraries:** Angular.js, React.js, Vue.js, jQuery, Chart.js, Bootstrap, SASS, Less
- Testing & Automation:** Cypress, Mocha
- Backend Development:** Node.js, Django, MongoDB, Express.js, RESTful APIs
- Version Control:** Git, GitHub, Bitbucket, SVN
- Cloud :** Microsoft Azure (Azure App Service), AWS (S3, Lambda), CI/CD with Jenkins, Bamboo
- Data Handling & Storage:** MongoDB, SQL (MySQL, PostgreSQL), Local Storage, Session Storage
- UI/UX & Responsive Design:** Responsive Web Design, Angular Material Design, Flexbox, Grid Layout, Adobe XD, Figma
- Collaboration Tools:** JIRA, Confluence, Microsoft Teams, Slack
- Project Management & Methodologies:** Agile (Scrum, Kanban), TDD (Test-Driven Development), CI/CD Integration

PROFESSIONAL EXPERIENCE

Amtex Systems Inc- Remote, USA – UI-Frontend Developer 	May 2022 – Present
- Developed and maintained AEM (Adobe Experience Manager) components, integrating them with third-party systems, which led to a 20% improvement in content update speed and site efficiency. - Optimized AEM performance by implementing caching mechanisms, resulting in faster page load times and improved user experience. - Strengthened security protocols within AEM components by implementing data encryption and secure API configurations, reducing vulnerabilities by 40%. - Created reusable and interactive UI components using ReactJS and Angular (versions 8+), which streamlined the development process. - Collaborated with backend teams to implement and manage APIs using Django Rest Framework, ensuring seamless integration and data flow. - Created dynamic, interactive websites using JavaScript, jQuery, and jQuery UI, boosting site interactivity and increasing user engagement time by 15%. - Designed and developed front-end architecture and UI elements with HTML5, CSS3, TypeScript, Bootstrap, Node.js, and MongoDB for scalability. - Designed complex features like dynamic forms, modular components, and validations using Angular and React that enhanced functionality by 40%. - Integrated Ag Grid and RxJS for efficient data manipulation and state management, providing real-time updates and improving app responsiveness by 20%. - Conducted cross-browser compatibility testing to ensure consistent user experiences across various platforms and devices. - Led version control and project management efforts using GitHub, JIRA, and Bitbucket, resulting in a 20% increase in team productivity through better collaboration. - Integrated CSS pre-processing tools like SASS to streamline the design and customization of responsive layouts. - Developed modular JavaScript libraries for performance optimization, reducing page load times - Configured modular JavaScript libraries and frameworks for enhanced code reuse and performance optimization. - Worked on AJAX to enable dynamic content updates without page reloads, optimizing user experience. - Designed scalable, reusable Angular modules and React components for use across multiple projects. - Configured end-to-end testing pipelines using Cypress and Jasmine/Karma, boosting overall testing coverage and catching 95% of bugs pre-production. - Followed Agile methodologies to manage project timelines and collaborated closely with cross-functional teams.	
Envoy Global - Hyderabad, India UI/Web Developer 	Jan 2020 – Nov 2021
- Analyzed client requirements and collaborated on user-centered design, achieving 95% client satisfaction and alignment with application objectives. - Developed responsive web applications with HTML5, CSS3, and AngularJS, enhancing user experience and increasing mobile engagement by 40%. - Enhanced UI/UX with ReactJS components, resulting in a 25% improvement in application performance and user retention. - Leveraged Node.js for backend integration, optimizing real-time performance and reducing response times by 30%. - Implemented JavaScript-based caching mechanisms, accelerating page load times by 20% by locally storing frequently accessed data. - Built reusable Ext.js components, increasing development efficiency by 15% and ensuring consistent UI across projects. - Enhanced website responsiveness and interactivity with AJAX and Web API, achieving a 20% boost in user satisfaction. - Employed MVC architecture in AngularJS for modular, scalable code, reducing maintenance time by 25%. - Improved code performance by conducting thorough JavaScript code reviews, decreasing load times by 30%. - Integrated D3.js and Backbone.js for data visualizations, enhancing data interpretation and improving decision-making speed for users by 20%. - Configured jQuery plugins for smooth animations and enriched UI, resulting in a 15% increase in user engagement. - Led CSS animations and transitions, enhancing visual appeal and interactivity, and increasing user interaction metrics by 18%. - Coordinated with backend teams to synchronize front-end and back-end integrations, achieving a 98% reduction in data sync errors. - Designed and implemented progressive enhancement techniques to improve accessibility and performance for users with limited network connectivity. - Introduced responsive design principles using Flexbox and Grid layouts, ensuring applications rendered seamlessly across devices. - Developed automated testing scripts in Selenium and Mocha, increasing code reliability and catching bugs earlier in the development cycle. - Utilized Webpack for bundling JavaScript modules, optimizing application load times and improving performance by 15%. - Documented development processes and created coding standards to maintain code quality and scalability across team projects. - Actively engaged in knowledge sharing sessions with junior developers, fostering a culture of collaboration and continuous learning.	

PROJECTS

Customizable Dashboard with Widgets

- Developed an **interactive, customizable** dashboard where users could **drag** and **drop** widgets (e.g., weather, news, calendar) to personalize their experience.
- Leveraged **AngularJS** and **ReactJS** for real-time updates and user-friendly drag-and-drop functionality.
- Integrated third-party APIs for widgets and utilized **Node.js** for backend integration to retrieve and display data.
- Implemented **Chart.js** for data visualization, allowing users to track various metrics interactively.

Fitness Tracker

- Created a comprehensive **fitness tracking application** where users could log workouts, set goals, and view progress visually.
- Employed **ReactJS** with **Chart.js** to create progress charts, enabling users to track their fitness journey dynamically.
- Developed responsive **UI components** using **HTML5, CSS3**, and **Bootstrap** to provide an accessible and engaging experience across devices.
- Connected to a **MongoDB** database to store and retrieve user data, ensuring efficient backend operations

Recipe Finder with Pantry Integration

- Designed a **recipe-finding application** where users could input pantry ingredients and receive suggested recipes based on availability.
- Integrated a third-party **recipe API** to expand the recipe database and enhance user options.
- Used **Svelte** and **Vue.js** for fast, efficient rendering of recipe suggestions and enhanced interactivity.
- Configured **local storage** for saving user preferences and recently used ingredients, optimizing user experience and performance.

EDUCATION

Trine University	Jan 2022 – Dec 2023
Master of Information systems	GPA - 4/4
JNTU Kakinada	Jul 2016 – Jun 2020
Bachelor of Technology in Computer Science and Engineering	CGPA: 7.5/10
