

DIVAKAR

Java Developer

315-796-8900|divakar@itjobtech.com |MA

SUMMARY

- Java Developer with 3 years of hands-on experience architecting and implementing robust Java web applications, leveraging a technology stack including Spring Boot, Spring MVC, and Hibernate to ensure scalability and performance.
- Proficiency in navigating diverse software development methodologies, including Agile and Waterfall, adeptly adapting to project requirements and organizational preferences to drive successful project outcomes.
- Demonstrated ability to design and develop high-quality application utilizing Java and J2EE Technologies such as JDBC, JavaBeans, JSON, Restful, Servlets, and JSF, ensuring the delivery of reliable and efficient software solutions.
- Well-versed in implementing and optimizing relational database management systems (RDBMS) using MySQL and PostgreSQL, ensuring data integrity and performance in backend data storage and retrieval processes.

EDUCATION

Masters in Computer Science

Dec 2023

Rivier University, New Hampshire

Bachelors in Computer Science and Engineering

May 2020

Sathyabama Institute of Science and Technology, Chennai

TECHNICAL SKILLS

Methodology : SDLC, Agile, Waterfall

Language: SQL, Core Java, Java8

Frameworks/Libraries: Spring MVC, Hibernate, Spring Boot, Microservices

IDEs: Visual Studio Code, Net Beans, IntelliJ IDEA

J2EE Technologies: Servlets, JSP, JavaBeans, JDBC

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, Typescript, Terraform, XML

Application Server: Apache Tomcat

Databases: MySQL, PostgreSQL, MongoDB

Build/Other Tools: UML, MS Visio, Maven, Gradle, JUnit, Jenkins, Git, GitHub, Jira, Trello, Docker

Operating System: Windows, Linux

PROFESSIONAL EXPERIENCE

SVB Financial Group, USA | Java Developer

Feb 2024 - Current

- Adhere to Agile methodologies to foster flexibility and collaboration throughout the software development lifecycle, ensuring adaptability to changing requirements and delivering resilient and scalable applications.
- Champion the adoption of microservices architecture to facilitate the design and development of modular, loosely coupled application components, enabling independent deployment and scalability.
- Leverage the Spring MVC framework to construct scalable and resilient web applications, harnessing its model-view-controller architecture to facilitate maintainability and extensibility.
- Dedicate effort to optimizing MySQL queries and indexes to expedite data retrieval processes and minimize database load, enhancing overall application performance and responsiveness.

Experion Technologies, India | Java Developer

Jan 2019 - Nov 2021

- Fostered collaboration among cross-function teams to maintain alignment with Software Development Life Cycle principles, ensuring efficient project execution and delivery.
- Spearheaded the design of user interface (UI) web applications, employing industry-standard web technologies, including HTML, XML, and CSS, adhering to W3C standards to ensure compatibility and accessibility across platforms.
- Industrialized many RESTful API web services capable of producing XML and JSON formats to facilitate seamless integration with various web and mobile applications, enabling efficient data exchange and communication between systems.
- Leveraged the Spring framework with Hibernate to establish robust connections and mappings to Oracle databases, utilizing Hibernate annotations to streamline the mapping process and ensure data integrity and consistency.
- Demonstrated strong communication and interpersonal skills, effectively collaborating with team members, stakeholders, and clients to gather requirements, address concerns, and deliver high-quality software solutions that meet or exceed expectations.
