

SUMMARY

Results-driven Product Manager/Business Analyst with expertise in Agile methodologies, data-driven decision-making, and leading cross-functional teams. Skilled in user research, strategic roadmaps, and stakeholder management. Proficient in Python, SQL, and analytics, with a focus on optimizing product performance and translating business needs into actionable insights. Committed to delivering measurable outcomes and enhancing user satisfaction through continuous improvement.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Business Analysis & Strategy: Requirements Gathering, Process Mapping, Business Process Improvement, Data Analysis, Strategic Planning, Business Intelligence (BI), Market Research, Competitor Analysis, User Research, Stakeholder Management, KPI Monitoring, Process Documentation, Reporting

Product Development & Strategy: Roadmapping, Feature Prioritization, A/B Testing, User Research, Wireframing, Product Lifecycle Management (PLM), Strategic Planning, Requirements Gathering, Stakeholder Management, Data-Driven Decision Making, User Story Mapping

Technologies & Tools: Python, SQL, Power BI, Tableau, Google Analytics, JIRA, MS Office Suite, Slack, Notion, Air Table, Miro Board, CRM Tools, Salesforce, API Integration, Agile/Scrum, Kanban, UiPath, Zapier, Figma

Leadership & Collaboration: Cross-functional Team Collaboration, Leadership, Project Management, Agile Project Management, Sprint Planning, Process Optimization, Technical Communication, Stakeholder Engagement, Problem Solving, Time Management, Conflict Resolution, Business Communication.

CERTIFICATION

- **Lean Six Sigma Green Belt Certification, Council of Six Sigma**

EXPERIENCE

FIS Global, USA | Product Strategy Lead | Next-Gen Payment Gateway System | MySQL, AWS, Python Jun 2024 – Present

- Led a cross-functional team of 10, including engineers, designers, and analysts, to ensure timely feature delivery using Agile practices.
- Used Python to analyze large datasets, automate reporting, and deliver actionable insights, improving business decision-making.
- Developed interactive dashboards in Tableau and Power BI, reducing report generation time by 30% and enabling real-time monitoring of 15+ KPIs for senior leadership.
- Leveraged Google Analytics to track user behavior and optimize customer engagement, resulting in a 25% increase in conversion rates and a 15% improvement in website performance.
- Orchestrated the development and refinement of a detailed product roadmap, prioritizing high-impact features based on market research and customer feedback, resulting in a 15% increase in merchant adoption.
- Converted customer requirements into clear product features and user stories, collaborating with engineering to ensure seamless integration with the platform's architecture.
- Deployed wireframing tools to define product features and workflows, enabling faster iteration cycles and precise communication of design concepts to development teams.
- Oversaw the entire product lifecycle (PLM), from ideation to launch and post-release improvements, driving continuous updates based on user feedback and evolving market trends.
- Conducted A/B testing to validate feature enhancements, driving a 10% increase in conversion rates and optimizing user experience.
- Implemented user story mapping techniques to break down complex features into manageable tasks for development teams, boosting workflow efficiency and reducing development time by 15%.

Qbotica Inc, USA | Project Manager | Agent Toolkit Development | Agile, RPA, JIRA, Kanban, UiPath Jan 2024 – Apr 2024

- Defined and delivered product features aligned with the product vision, achieving a 20% improvement in project task efficiency through Agile methodologies.
- Crafted detailed user stories and specifications, tracked product development progress in JIRA, and ensured transparency through regular project reports, increasing stakeholder awareness by 15%.
- Communicated AI hardware systems strategy and roadmap to stakeholders, securing buy-in and aligning project goals with broader business objectives, increasing ROI by 25%.
- Prioritized features and managed timelines for process automation, enhancing project tracking efficiency by 20% and ensuring compliance with user requirements. Created wireframes and prototypes to visualize product features and led design sprints to meet business needs.
- Facilitated data-driven retrospectives to capture learnings from each project phase, improving process efficiency and reducing bottlenecks by 10%, while continuously evolving the product in response to market changes.

Hewlett Packard Enterprise, India | Technology Solutions Manager | Salesforce, Notion, Slack, SaaS Feb 2020 – Jul 2022

- Supervised a team of 5 developers and 2 QA analysts using Agile and Scrum, accelerating development speed by 20% and reducing defects by 15%.
- Executed SQL queries and Reporting (SSRS) to enhance data analysis and project management precision, leading to a 15% improvement in tracking and reporting accuracy.
- Collaborated with global teams to integrate AI capabilities into enterprise solutions, driving a 25% increase in product adoption rates and a 30% improvement in predictive maintenance features.
- Steered the development and management of product roadmaps, spearheading quality initiatives that reduced post-release defects by 15% and aligned with user needs and compliance standards.
- Partnered with Product Management to execute product strategies, leveraging CRM tools like Salesforce to streamline customer interactions, reducing response times by 15% and improving customer satisfaction ratings by 10%.
- Utilized API integration to boost project visibility and data exchange, achieving a 20% increase in efficiency and productivity.

EDUCATION

Master of Science in Engineering Management | Arizona State University, Tempe | GPA: 4.00/4.00

Bachelor of Technology in Electronics and Instrumentation Engineering | Amrita Vishwa Vidyapeetham University, India
