

GRACE SELINA PAGADALA

📍 Atlanta, Georgia 📞 +1-470-457-7201 [🌐 LinkedIn](#) ✉ graceselina02@gmail.com

SUMMARY

Computer Science graduate with industry experience as a Salesforce Developer and Administrator, specializing in creating customized solutions to enhance CRM functionality, automate workflows. Passionate about leveraging Salesforce technologies to streamline business processes, improve security, and deliver seamless, efficient solutions that elevate client experiences. Proven ability to collaborate with cross-functional teams, gather requirements, and implement solutions that enhance workflows and user experience. Committed to staying updated with Salesforce best practices with strong problem-solving and communication skills.

EDUCATION

Georgia State University

Atlanta, Georgia

Master of Science in Computer Science | GPA 3.8/4.0

August 2023 – May 2025

Graduate Teaching Assistant: Mobile Application Development (Android Studio & Flutter): Led interactive labs and guided 60+ students, assisting with debugging, performance optimization, and project development. Reviewed 200+ assignments, provided detailed feedback, and developed learning resources to enhance student success.

Vignana Bharathi Institute of Technology (Affiliated to JNTU - Hyderabad)

Hyderabad, India

Bachelor of Technology in Computer Science and Engineering | GPA 8/10

August 2017 – July 2021

EXPERIENCE

NetTracer by Reunitus

Atlanta, Georgia

Software Engineer Intern

July 2024 – August 2024

- Engineered and optimized the front-end UI using Angular and developed scalable Java-based APIs, enhancing application efficiency and user engagement.
- Managed and fine-tuned SQL databases, improving query performance and streamlining data retrieval for faster system responses.
- Strengthened security by implementing role-based access control, while collaborating with cross-functional teams to deliver high-impact system enhancements aligned with business objectives.

Cognizant Technology Solutions

Hyderabad, India

Programmer Analyst (EAS Salesforce Core)

July 2021 - July 2023

- Designed, developed, and maintained custom Salesforce solutions to enhance CRM capabilities, automate business processes, and streamline sales and project workflows through Apex classes, triggers, batch jobs, and Lightning Components.
- Developed and optimized user interfaces by creating Visualforce pages and Lightning Web Components (LWC) to improve UI/UX and user interaction. Implemented Salesforce automation tools such as Flows, Approval Processes, and Process Builder to optimize business operations and enhance efficiency.
- Configured and managed Salesforce Sales Cloud and Service Cloud, improving business processes and ensuring effective utilization of CRM capabilities. Managed Salesforce user roles, profiles, permission sets, and security settings to maintain compliance.
- Integrated Salesforce with external systems using REST/SOAP APIs to ensure seamless data synchronization and flow between platforms. Led data migration using Data Loader, ETL tools to ensure smooth, accurate data transitions and ensure data integrity.
- Resolved system performance issues and conducted unit testing, leveraging Salesforce DX and Change Sets for smooth deployment and improved system reliability.
- Created custom reports and dashboards to provide actionable insights and support data-driven decision-making across teams.
- Provided ongoing system production support, user training, and created comprehensive documentation and best practice guides to ensure smooth Salesforce adoption and utilization.

TECHNICAL SKILLS & CERTIFICATIONS

- Salesforce Development:** Apex, Lightning Components (Aura & LWC), Visualforce, SOQL, SOSL, Salesforce CLI
- Salesforce Administration:** Flows, Workflows, Validation Rules, Approval Processes, Permission Sets, Profiles, Sharing Rules
- Integration & APIs:** REST, SOAP, Salesforce APIs, Dataloader.io, Workbench, Salesforce Data Import Wizard, WorkRelay
- Programming Languages & Frameworks:** Java, Python, C, JavaScript, HTML, CSS, PHP, Angular, React
- Databases & Query Languages:** SQL, MySQL, SOQL, SOSL
- Cloud & Tools:** AWS CI/CD, ServiceNow, JIRA, IntelliJ, Visual Studio Code, Figma, Android Studio, Canva, Microsoft Office Suite
- Certifications:** Salesforce Platform Developer 1, AWS Academy Graduate Cloud Foundations, IT Academy Network VMware

ACADEMIC PROJECTS

Application for Posture Detection "Straighten Up -The Pose Detector"

- Designed and developed a user-friendly Graphical User Interface (GUI) using Tkinter in Python and a Responsive web application to analyze and detect posture deviations.
- Integrated Computer vision techniques, Machine learning algorithms, and Web development to analyze and provide real-time feedback on user posture.

Web Application on Fake News Detection

- Designed and implemented a robust Fake News Detection system using vectorization and Natural Language Processing (NLP) Techniques, achieving 98% accuracy in distinguishing between fake and Real news articles.
- Leveraged extensive datasets and Machine learning algorithms to develop a Data-driven approach for identifying misinformation.

Internship project at Electronic Corporation of India Limited (ECIL)

- Designed a Mobile Application on Aadhar Based Online Voting System using Android Studio.
- Created a Demo database to support the project development.
