

HARI NYSHADAM

Jersey City, 07307 NJ | 201-870-8797 | nysh.hari@gmail.com

Summary

Data Analyst with 5 years of experience in the banking and telecom domains, holding an MS in Computer Science and an MS in Machine Learning. Expertise in Machine Learning (ML), Deep Learning (DL), Data Science, Natural Language Processing (NLP), Statistical Analysis, Statistical Modeling, and Time Series Forecasting. Proven track record in developing and deploying advanced machine learning models, implementing deep learning architectures, and applying statistical modeling techniques to solve complex business problems. Experienced in transforming data into actionable insights through effective data visualization. Seeking to transition into roles such as Data Scientist, Machine Learning Engineer, or AI Engineer, while open to Data Analytics positions with strong career growth potential.

Skills

- **Programming Languages:** Python, R Programming, Java, C++, C
- **Machine Learning Frameworks:** SciKit-Learn, TensorFlow, Keras, PyTorch
- **Deep Learning & Neural Networks:** ANN, CNN, RNN, LSTM, AutoEncoders
- **Natural Language Processing (NLP):** POS Tagging, Named Entity Recognition, Sentiment Analysis, Text Classification
- **Advanced Machine Learning:** Generative Adversarial Networks (GANs), Reinforcement Learning, Transfer Learning, Transformers
- **Data Pre-Processing & Analysis:** Data cleaning, feature engineering, principal component analysis
- **Statistical Methods:** Descriptive statistics, probability distributions, hypothesis testing, correlation, time series analysis
- **Data Visualization:** Tableau, Power BI, Dundas BI, Excel
- **Database Management & SQL:** MySQL, Microsoft SQL Server
- **Large Language Models & NLP Tools:** Large Language Models, LangChain, Prompt Engineering

Relevant Experience

RESEARCH INTERN | 01/2021 - 07/2021

Indian Statistical Institute - Bangalore, India

- Developed a neural network using Python to classify land resources from 111,008 NASA and ISRO remote sensing images.
- Presented findings in a research paper at the 2021 International Conference on Innovating Computing Technologies and Applications.
- Conducted data preprocessing and feature engineering to enhance model performance.
- Collaborated with interdisciplinary teams to align machine learning techniques with environmental research goals.
- Provided actionable insights for resource management using advanced machine learning methods.

DATA ANALYTICS CONSULTANT | 09/2017 - 06/2019

Dheefinity Inc. - Ontario, Canada

- Built models to evaluate client creditworthiness using Python, R, and Power BI for banks.
- Designed Power BI dashboards to deliver actionable insights for decision-making.
- Streamlined ETL processes, ensuring data accuracy and seamless analytics integration.
- Delivered data-driven recommendations to optimize risk strategies for financial clients.
- Led global projects effectively using cloud-based tools and virtual platforms.

ASSOCIATE DATA ANALYST | 05/2016 - 07/2017

TEOCO - Bangalore, India

- Delivered analytics solutions to global telecom operators, improving customer retention and reducing churn.
- Collaborated with cross-functional teams to drive client procurement and retention strategies.
- Utilized Python, R, Excel, SQL Server, and Tableau for data analysis and visualizations.
- Automated reporting processes, enhancing efficiency and accuracy.
- Provided insights to support executive decision-making on key business metrics.

COST ANALYST | 09/2014 - 02/2016

TEOCO - Bangalore, India

- Reduced operational costs by 15% through cost analysis frameworks targeting high-impact areas.
- Devised pricing models using R and Tableau, lowering customer churn by 12%.
- Analyzed large datasets with SQL and Excel, delivering actionable insights via Tableau dashboards.
- Collaborated with teams to align analytics with business goals, expanding the customer base.
- Automated reporting workflows with R and SQL, improving efficiency and accuracy by 30%.

Projects

- **Statistical Data Science – Investing strategies in S&P500, Precious Metals, Real Estate and Energy** : In this data science project, I utilized R to analyze and develop forecasting time series models for indices like the S&P 500, PHLX Gold/Silver Index (XAU), and the S&P Dow Jones Index. The process involved extracting and preprocessing large datasets, conducting exploratory data analysis, and testing hypotheses to derive investment strategies. The insights and analysis were visualized through Power BI dashboards to support investment decision-making.
- **Deep Learning – Image Classification ML Pipeline**: In this project, I used Python and TensorFlow, along with DVC for MLOps tasks like data management and pipeline automation. I built a training and prediction pipeline, developed a Streamlit user app, and deployed it via CI/CD on AWS. The project involved downloading 10,000 images of athletes in various sports to train ANN, CNN, and transfer learning models like ResNet-152, achieving a final validation accuracy of 93% for the multiclass classifier.
- **Natural Language Processing - Equity Analyst research tool using LangChain**: I utilized Python libraries like TextLoader and UnstructuredURLLoader to load financial articles for equity research analysis, splitting them into chunks using CharacterTextSplitter and RecursiveTextSplitter. These chunks were stored in the FAISS vector library and relevant sections were retrieved using RetrievalQAWithSourcesChain for analysis with OpenAI's GPT-3.5-Turbo model. The interface was developed using Streamlit

Certifications

- Microsoft Azure Fundamentals
- Microsoft Database Administration Fundamentals
- Indian Statistical Institute:
Statistical Techniques for Business
- Indian Statistical Institute :
Statistical Techniques for Business forecasting

Education

Stevens Institute of Technology - Hoboken, NJ | Master of Science

Machine Learning, 12/2024

GPA: CGPA: 4/4

Reva University - Bengaluru, India | Master of Science

Computer Science, 09/2021

GPA: CGPA: 9.3/10

International Institute of Information Technology - Bengaluru, India | Post Graduate Diploma

Data Science, 07/2018

GPA: CGPA: 3.63/4

Indian Statistical Institute - Bengaluru, India | Part Time Course

Statistical Quality Control, 06/2015
