Relevant Coursework: Product & Information Scientific Computing, Databases & Data Modeling, Machine Learning, Intercultural Communication, Research Method, Database Programming

Work Experience

Network Engineer | Samsung Electronics America Inc. | Bellevue, WA

Sep 2023 – Present

- Conduct network testing based on the standards of 3 major carriers - AT&T, T-Mobile, and Verizon - to ensure the readiness for the launch of new mobile models in the highly competitive US market.
- Collaborated closely with Samsung Research and Development software engineers, employing various A/B testing methodologies to troubleshoot and resolve complex software defects, ensuring effective resolution strategies and alignment with key performance indicators (KPIs).
- Utilize 5+ log analysis tools such as QXDM, XCAL, QCAT, and etc to evaluate key performance metrics; Applied these insights to assess data throughput, SA/NSA Handover, Mobility VoNR, and HW Performance.

Blockchain Analyst | IncuTek | Seoul, South Korea

Mar 2021 – Sep 2021

- Utilized Excel, Python, and SQL to analyze 10+ cryptocurrencies, with a focus on decentralized finance (DeFi) projects and underrated swaps.
- Successfully reduced the risk of investment failure for IncuTek customers by 24% through comprehensive analysis and strategic recommendations.
- Contributed to the dissemination of knowledge by creating 10+ YouTube videos covering the analysis of various cryptocurrencies, providing information about financial circulation, potential risks, and short, long-term prospects.

Business Development Lead | KOJOBS | Seattle, WA

Sep 2021 – June 2023

- Coordinated events such as Career Workshops and Enterprise Seminars, fostering interactions between club members and tech executives from corporations like Google, Amazon, Microsoft, Meta, and more.
- Successfully obtained overall \$5,000+ of financial sponsors from enterprises such as HMart and HiteJinro by planning business meetings.
- Facilitated collaboration with 5+ cross-functional teams in software development, external-cooperation, Human Resources, Public Relations, and Finance Management for enhanced event and seminar outcomes.

Projects

SAS Hackathon Project | Seattle, WA

Mar 2023 – Apr 2023

- Contributed to a multidisciplinary project on South Korea's fertility decline, utilizing data analysis tools such as Python, R, SQL, Excel, and SAS Viya to clean, merge, and derive analysis of comprehensive data collection.
- Actively researched and Introduced diverse data science methods such as Random Forest, LASSO, correlation matrix, and linear mixed effects model to identify key factors driving the trend.
- Utilized data visualization tools such as Power BI, Tableau to deliver the project to 70+ key stakeholders, receiving overall 72% of positive rate.

Skills

- Technical: Python, Java, R, SQL, HTML, CSS, JavaScript, MatLab, Tableau, Power BI, Figma, Word, Excel, PowerPoint
- Analytical: Data Analysis, Business Analytics, Project Management, Compliance Management
