WORK EXPERIENCE

System Analyst/QA Engineer Apex Systems	April 2024- Current
• Created, executed, and managed over 50 test cases, test plans, and test scripts for ServiceNow modules like Incident Management, Change Management, and Service Catalog, leveraging the ServiceNow Automated Test Framework (ATF) to increase testing efficiency by 30% and accuracy by 20%. • Collaborated with cross-functional teams, including developers and business analysts, to identify and document over 100 defects, ensuring timely resolution and optimal system performance. • Performed regression testing to ensure recent updates and patches did not adversely affect existing functionality, maintaining system integrity. • Independently developed and executed comprehensive test cases, identifying critical defects, and contributing to the overall improvement of software quality • Resolved user-reported issues by conducting detailed troubleshooting, collaborating with cross-functional teams to identify root causes and implement effective solutions.	

- Conducted hands-on manual testing, including black box testing, identifying, and resolving critical defects that improved product stability by 15%.
- Executed test plans and checklists for 20+ new features, achieving a 95% on-time delivery of tested functionality and improving overall performance metrics by 10%.

Senior Business Analyst

August 2022 – April 2024

Capgemini Government Solutions

- Served as a liaison between business users, product owners, and technical teams for app development decision-making. Analyze complex issues, providing actionable recommendations for solutions to drive business decisions.
- Led 20+ monthly sessions with customer and internal teams to gather requirements and specifications, resulting in a 15% improvement in project alignment and customer satisfaction.
- Conducted User Acceptance Testing (UATs) on 5 newly implemented systems to identify and resolve systems' critical defects pre-go live. Developed test cases, meticulously recorded test results, generated detailed reports of findings and identified bugs for prompt resolution.
- Authored 200+ pages of documentation for business requirements, guiding the development of major applications and resulting in a 25% reduction in project delays.
- Conducted meetings and presented weekly status reports to leadership and clients, keeping project stakeholders informed.
- Led a team of up to 8 staff members, setting performance standards and objectives.

Technical Business Analyst

August 2022 - October 2022

Tollanis Solutions

- Collaborated with Product Owners to gather and communicate customer requirements to improve the product.
- Facilitated communication between technical and business stakeholders during scrums to improve understanding. Gathered and analyzed customer requests and translated them into technical requirements for internal teams.
- Organized over 50 technical details into diagrams, spec sheets, and tables, improving understanding of project specifications by 30% and reducing errors by 15%. Collaborated with Scrum Master and Product Owner in scoping user stories for a more precise definition of 'done' criteria.
- Functioned as a strategic consultant to internal personnel for developing information systems strategies.
- Collaborated with developing a Zendesk-powered healthcare application and streamlining the job, travel, and accommodation booking process for travel nurses and recruiters, leading to a 40% improvement in communication.

Business Analyst

January 2021 - August 2022

IT Consulting

- Analyzed critical business elements, leading to the development of presentations that distilled drivers of business results.
- Engaged with 15+ key stakeholders to forge strategic partnerships, enhance business relations, and facilitate initiatives, leading to a 20% increase in collaboration and a 10% boost in revenue. Acquired understanding of client needs, leveraged industry best practices, and ServiceNow knowledge to design solutions that increased business process efficiency by 20% while delivering on functional requirements.
- Analyzed and presented business metrics to senior management, which informed data-driven decision-making and led to a cost reduction in operational expenses.
- Developed and deployed a ServiceNow-based food ordering system, achieving a 20% reduction in labor costs, and expanding business operations by 35%.

Clinical Consultant

November 2020 - March 2022

Memorial Health Medical Center

- Analyzed electronic health record (EHR) system usage across 5 departments, identifying critical areas for improvement that led to reduced documentation errors and improved patient data integrity.
- Gathered and analyzed patient data from Epic/MyChart to support clinical decision-making and enhance patient care.
- Utilized ICD-10 coding for diagnoses and management to ensure compliance and improvement in coding efficiency.
- Assisted with the execution of audits using Epic software which improved the accuracy of patient information and discharge document processing.
