

Jenil Gajera

Business Analyst

jenilgajera2907@gmail.com | +1 602-517-8552 | NJ

SUMMARY

Results-driven Business Analyst and Project Manager with a strong background in data analysis, automation, and machine learning. Skilled in Agile and Waterfall methodologies and adept at leveraging tools like Power BI, SQL, and AWS to enhance project efficiency and drive insights. Proven track record of reducing processing times, increasing fraud detection accuracy, and streamlining workflows to boost customer satisfaction. Excellent communicator with a focus on translating complex requirements into actionable plans. Holds an MS in Information Technology and certifications in Business and Agile Analysis.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Database: SQL, MS Excel

Data Analysis & Visualization: SQL, Power BI, Python, R, Apache Spark

Machine Learning & Data Modeling: Scikit-learn, AWS SageMaker

Automation & ETL: Azure Data Factory, AWS Lambda, Apache Kafka

Project Management Tools: MS Project, MS SharePoint

Cloud & Notification Services: AWS SNS, AWS EC2, AWS S3

Analysis Skills: Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis

Tracking/Other Skills: Jira, Microsoft Visio, JAD, RTM, UAT, Confluence, Figma

Soft Skills: Time Management, Leadership, Problem-Solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal Communication

EXPERIENCE

PNC Financial | Sep 2023 - Current | Business Analyst

- Led the development of machine learning models using Python, achieving a significant reduction in false positives and improving the accuracy of fraud detection. Utilized Scikit-learn and TensorFlow for model training and optimization.
- Created an interactive Power BI dashboard to provide real-time insights into flagged transactions, fraud trends, and system performance, cutting analysis time by 40%.
- Automated data extraction, transformation, and loading (ETL) processes with Azure Data Factory, reducing manual efforts by 20%, and used SQL for efficient data manipulation and quality checks.
- Implemented AWS SNS and AWS Lambda for serverless computing, enabling instant alerts to customers about potential fraud and reducing response delays, minimizing financial losses.
- Managed large-scale transaction data streams using Apache Kafka, ensuring seamless fraud detection and scalability to handle increased transaction volumes during peak times.
- Collaborated with stakeholders to gather requirements, documented them in Confluence, and translated them into detailed user stories in Jira, ensuring alignment with business and technical goals. .

Zenar, India | Jan 2021 - Dec 2022 | Business Analyst

- Developed machine learning models in Python using libraries like Pandas, NumPy, and Scikit-learn to enhance credit risk assessment, reducing loan default rates by 20% through improved predictions.
- Designed an interactive dashboard in Power BI to deliver real-time insights into risk scores, application trends, and loan performance, improving decision-making efficiency.
- Automated loan approval workflows using AWS Lambda, reducing approval times by 50% and increasing operational efficiency with risk-based decision processes.
- Leveraged Azure Data Factory to automate ETL processes, integrating financial data from various sources to improve the accuracy and reliability of credit risk analysis.
- Utilized Apache Spark to manage large datasets, enabling scalable and real-time credit risk analysis to handle fluctuating loan application volumes effectively.
- Deployed machine learning models with AWS SageMaker, ensuring continuous optimization and adaptability to new data, enhancing predictive accuracy.

Education

MS in Information Technology - Arizona State University, Tempe, AZ

Bachelor of Engineering in Information Technology - Gujarat Technological University, Gujarat
