TECHNICAL SKILLS

Languages: R, MySql, Python

Visualization Tools: Tableau, Power BI, Excel

Accessory Skills: Regression Testing, Performance Testing, Statistical Analysis, Modeling, Web 3 Interface

EXPERIENCE

Intern Business Analyst

Jan. 2024 – May 2024

Quantum Virtual Services

Remote

- Analyze key metrics to drive improvements in performance and quality.
- Tested various frameworks to explore various output in the market.
- Collaborated KPI reports.

Data Analyst Intern

May 2020 – Sept. 2020

Philadelphia Insurance Companies

Remote

- Used SQL and Excel to perform data analysis and data cleaning on large datasets regarding client information.
- Cultivated a system for additional insurance policies, client acquisition, client retention, and partnerships through our SQL projects. These projects involved database creation, database management, and content analysis. Our leading excel based projects tested forecasting, regression, and analysis.
- Developed a system for client acquisition and retention through statistical models which focused on forecasting as well as regressions using Vlookup, pivot tables, and data analysis tools.
- Created SQL projects which dealt with larger databases to create and analyze workflows aimed at efficient use for reporting and streamline use.
- Developed collaborative reports for stakeholders with regional employees which aimed to visualize final report for stakeholders.

Part Time Sales Associate

July 2019 – Jan. 2020

Nike

San Clemente, CA

- Helped conduct the sales floor through customer support, customer association, and cash wrap.
- Performed back of house inventory analysis.

PROJECTS

“Employee” SQL dataset project | MySQL, Excel

June 2023 – Feb 2024

- Worked on a descriptive employee database consisting of potential 1500 ‘employees’.
- Used SQL to create a database consisting of potential employees that met various business criteria and be able to manipulate it depending on the various criteria. This process enabled us to leverage employee data for the efficiency of the company.

“Superstore” tableau project | Tableau, MySQL, Excel

June 2023 – Feb. 2024

- Worked with a large database on the basis of store operations and accounting which aimed to provide clear data visualization for directions for the store and forecast merchandise as well as sales outlook.
- Used SQL to create and manipulate key indicators for store operations.
- The analysis and report from the database are displayed using tableau highlighting key performance indications for the business.

EDUCATION

Purdue University

Online

Certification Program in Data Analytics

June 2023 – Feb. 2024

University of California, Irvine

Irvine, CA

Bachelor of Science in Cognitive Science

Sept. 2018 – June 2023
