SUMMARY

- Business Analyst with **3 years** of experience in SDLC methodologies (Agile, Waterfall, Kanban), utilizing tools like MS Project and Trello for effective project management and collaboration.
- Proficient in data analysis and visualization using Python, R, Tableau, and Power BI, delivering insights that drive strategic decisions and enhance business performance.
- Skilled in documentation and requirement gathering, creating comprehensive FRDs, BRDs, SRS, and user stories, while ensuring alignment through Requirements Traceability Matrices (RTM).
- Experienced in conducting various analyses, including cost/benefit, impact, GAP, and risk analyses, contributing to process improvements and effective project strategies.
- Strong soft skills in leadership, problem-solving, and communication, with expertise in ERP and CRM systems (SAP, MS Dynamics Nav, Salesforce) and cloud platforms (AWS, Azure) to optimize organizational efficiency.

SKILLS

Methodology:	SDLC, Agile, Waterfall
Programming Languages:	Python, R
Database Management:	SQL, MS XS, MS Excel
Documentations:	FRD, BRD, SRS, User Guide, User Stories, Use cases
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Rally
Visualization Tools:	Tableau, Power BI,
Business Analysis:	Cost/benefit Analysis, GAP Analysis, Risk Analysis, SWOT Analysis
Tracking Tools:	Jira, HP Quality Center, Rational ClearQuest, RTM
Cloud Computing Platforms:	AWS, Azure
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Technical Skills:	KPI, UAT, Test Plans, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS 360, Web XP, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation, and Presentation, Verbal communication, Sprint Planning

EXPERIENCE

Business Analyst| United Healthcare, MA, USA

Aug 2023 – Current

- Facilitated daily stand-ups and sprint reviews to track progress and maintain team alignment, while conducting retrospectives to promote continuous improvement in processes and team performance.
- Utilized Python scripts for data extraction, transformation, and loading (ETL) to prepare healthcare datasets for analysis, implementing data visualization libraries to prototype dashboard elements and enhance user interface designs.
- Wrote SQL queries to retrieve and manipulate data from various healthcare databases, ensuring data integrity and accuracy through validation checks on outputs.
- Collaborated with data engineers to optimize database performance for analytics, enhancing efficiency in data retrieval processes.
- Created Functional Requirements Documents (FRDs) outlining specifications for the healthcare analytics dashboard, ensuring all requirements are traceable and aligned with business objectives.
- Developed Business Requirements Documents (BRDs) to capture high-level business needs and project objectives, engaging with stakeholders to ensure comprehensive understanding and agreement on project scope.
- Designed and developed interactive dashboards in Power BI to visualize key healthcare metrics, collaborating with stakeholders to define requirements and ensure dashboards effectively meet their needs.
- Conducted cost/benefit analysis to evaluate the financial viability of the healthcare analytics dashboard project, presenting findings to stakeholders to support decision-making and project prioritization.
- Generated reports and dashboards in Jira to communicate project status and progress effectively to stakeholders.
- Collaborated with cloud engineers to leverage AWS services for data storage and processing needs, ensuring compliance with data security and privacy regulations when managing healthcare data in the cloud.

- Integrated analytics dashboard functionalities with Salesforce to enhance customer relationship management, analyzing healthcare customer data in Salesforce to drive insights for improved patient engagement strategies.
- Defined and monitored key performance indicators (KPIs) to assess the effectiveness of the healthcare analytics dashboard, analyzing KPI trends and making recommendations for enhancements based on data-driven insights.

Business Analyst |Brane Enterprises, India

May 2021 – Dec 2022

- Collaborated with stakeholders to gather and document business requirements through Joint Application Development (JAD) sessions, ensuring a thorough understanding of functional and non-functional needs.
- Created detailed user stories to capture business requirements, facilitating effective communication between stakeholders and development teams.
- Worked closely with development teams to translate business requirements into technical specifications, supporting successful implementation of solutions.
- Utilized Python scripts for data manipulation and analysis, employing libraries such as Pandas to extract insights for business process improvements.
- Developed user guides and training materials to enhance user adoption of new systems, ensuring documentation is clear and accessible.
- Maintained clear and updated documentation throughout the project lifecycle, supporting effective project management and stakeholder communication.
- Used MS Project for planning, monitoring, and managing project timelines, ensuring timely delivery of project milestones.
- Employed Tableau to create interactive dashboards and reports that communicate key performance indicators (KPIs) and project progress to stakeholders.
- Conducted risk analysis to identify potential project risks and developed mitigation strategies to minimize impact on project outcomes.
- Collaborated with Rational ClearQuest for issue tracking and change management throughout the project lifecycle, ensuring prompt resolution of issues.
- Engaged with SAP teams to align project deliverables with enterprise resource planning (ERP) needs, enhancing operational efficiency.
- Developed prototypes to visualize solutions and gathered user feedback to ensure final products meet user requirements effectively.
- Facilitated User Acceptance Testing (UAT) to validate functionality against business requirements, ensuring stakeholder satisfaction with delivered solutions.

EDUCATION

Masters in information technology- Clark university, Worcester, MA

Bachelor of Technology in Mechanical Engineering - Avanthi Institute of Engineering and Technology, AP, India.
