

SUMMARY

Results-driven Java Full Stack Developer with 4+ years of experience in designing, developing, and deploying scalable web applications using Java, Spring Boot, Angular, React.js, and cloud platforms (Azure, AWS). Proven expertise in RESTful API development, database optimization, CI/CD pipelines, and Agile methodologies. Adept at refactoring legacy systems, improving performance, and reducing technical debt while ensuring high availability and security. Strong collaborator with cross-functional teams, passionate about mentoring junior developers and driving continuous improvement in software development processes.

EXPERIENCE

Java Full Stack Developer, Microsoft Jan 2024 – Present | USA

- Developed and maintained scalable full-stack web applications using Java, Spring Boot, and Angular, serving over 1 million users globally.
- Built responsive and accessible user interfaces using HTML5 and CSS3, ensuring seamless cross-device compatibility.
- Leveraged JavaScript to enhance interactivity and client-side performance, reducing page load times and improving UX.
- Collaborated with cross-functional teams including UX designers, product managers, and DevOps to implement new features, improving user engagement by 25%.
- Engineered RESTful APIs and integrated third-party services to enhance application functionality and performance.
- Led efforts to refactor legacy codebases, increasing maintainability and reducing tech debt by 30%.
- Implemented CI/CD pipelines using Azure DevOps, accelerating release cycles and reducing deployment errors.
- Applied Agile methodologies, participated in daily stand-ups, sprint planning, and code reviews to ensure efficient and high-quality delivery.
- Utilized Microsoft Azure for cloud deployment, ensuring application scalability, security, and high availability.
- Optimized SQL queries and database schema design, resulting in a 40% performance boost for data-intensive operations.
- Integrated authentication and authorization modules using OAuth2 and Azure Active Directory for enhanced security.
- Conducted unit, integration, and performance testing using JUnit and Postman to ensure code quality and system reliability.
- Mentored junior developers and interns, fostering a culture of continuous learning and code excellence.
- Participated in architectural discussions and contributed to decision-making for tech stack and design patterns to future-proof the application.

Full Stack Developer, Tata Consultancy services (TCS) Jan 2020 – Feb 2023 | India

- Developed enterprise web applications using Java and Spring Boot, focusing on scalable backend architectures for banking and healthcare clients.
- Built dynamic single-page applications using React.js and enhanced client-side logic with JavaScript, improving responsiveness.
- Designed semantic and mobile-friendly user interfaces with HTML5 and CSS3, aligning with modern accessibility standards.
- Contributed to internal tooling using C# and ASP.NET, gaining experience with Microsoft's backend ecosystem.
- Created and maintained RESTful APIs to facilitate seamless integration between frontend and backend services.
- Optimized database structures using MySQL and PostgreSQL, enhancing performance and data integrity.
- Deployed services on AWS, utilizing EC2, S3, and Lambda for infrastructure scalability.
- Automated build and deployment pipelines using Jenkins, Docker, and Maven, improving release cycles.
- Participated in Agile ceremonies including sprint planning, reviews, and retrospectives, ensuring alignment with project goals.
- Integrated third-party APIs and tools to enhance application features based on user requirements.
- Provided timely support and resolved production issues, contributing to improved client satisfaction and system uptime.

EDUCATION

Master of Science in Information Systems Dec 2024
Northwest Missouri State University, Maryville, MO, USA

Bachelor of Science in Mathematics, Electronics & Computer Science May 2022
S.R.R & C.V.R Government Degree College, Andhra Pradesh, India

PROJECT

Scalable Smart Fleet Management System | Dec 2024

- Developed a full-stack fleet management system using Node.js, React, and AWS to process real-time vehicle data, optimizing fleet operations.
- Implemented role-based access control for over 500 users and built interactive dashboards with Chart.js and PostgreSQL to track mileage and fuel efficiency.

CERTIFICATIONS

Foundational C# with Microsoft (Free-Code Camp/Microsoft) | Mar 2025

SKILLS

Languages: Java, JavaScript, TypeScript, HTML5, CSS3
Frameworks & Libraries: Spring Boot, Spring Cloud, Spring Security, React.js, Angular, Redux, GraphQL, Hibernate+, JPA+
Cloud & DevOps: AWS (EKS, ECS Fargate, Lambda+, S3, RDS), Microsoft Azure (AAD, App Services), Docker, Kubernetes, Helm+, GitLab CI/CD, Jenkins, Maven, Gradle+
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB+
APIs & Security: RESTful APIs, GraphQL, OAuth 2.0, JWT, OpenID Connect+, Spring Security, RBAC, API Gateway+
Architecture: Microservices, Event-Driven Architecture, Cloud-Native Design, Service Discovery (Eureka), Serverless+, CQRS+
Event Streaming & Messaging: Apache Kafka, RabbitMQ+, SQS/SNS+
Testing & Monitoring: JUnit, Mockito+, Postman, Load Testing (JMeter/Gatling+), Splunk, Grafana, Kibana, Prometheus+, ELK Stack
Frontend Optimization: Lazy Loading, Code Splitting, Webpack+, PWA+
Tools & Practices: Git, Agile/Scrum, SonarQube+, Terraform+, IaC+, Horizontal Pod Scaling (HPA), CI/CD Automation
