## EDUCATION

|                                                                                                                                                                                                                 |                        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| <b>University of Colorado Boulder</b> , Boulder, USA                                                                                                                                                            | August 2022 - May 2024 |
| <i>Master of Science in Computer Science</i>                                                                                                                                                                    | <b>GPA: 3.82/4.0</b>   |
| Courses: Big Data Architecture, Software Engineering, Machine Learning, Design and Analysis of Algorithms, NLP.                                                                                                 |                        |
| <b>Charotar University of Science and Technology</b> , Anand, India                                                                                                                                             | July 2018 - April 2022 |
| <i>Bachelor of Technology in Computer Science &amp; Engineering</i>                                                                                                                                             | <b>GPA: 9.2/10.0</b>   |
| Courses: Operating Systems, Database Management System, Computer Organization, Data Structures and Algorithms, Advanced Java Programming, Computer Networks, Object Oriented Programming, Linux Administration. |                        |

## SKILLS

|                                                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Languages:</b> Python, Java, C/C++, JavaScript, PHP, HTML/CSS                                                                        |
| <b>Frameworks:</b> Flask, Vue.js, Quasar, SpringBoot, SQLAlchemy, OpenCV, Django, REST, gRPC, GraphQL, Scikit.                          |
| <b>Cloud Services:</b> AWS (Lambda, DynamoDB, API Gateway, EC2, S3, VPC, CDN)                                                           |
| <b>Database:</b> MySQL, PostgreSQL, SQLite, Oracle, Redis                                                                               |
| <b>Tools &amp; Tech:</b> GIT, Docker, Kubernetes, Agile Methodologies, Apache Tomcat, GitHub Actions, Grafana, Gunicorn, Kafka, Jenkins |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                          |
