EDUCATION

Carnegie Mellon University – Heinz College of Information Systems and Public Policy

Pittsburgh, PA

Master of Information Systems Management

Aug 2022 – Dec 2023

- **Relevant Coursework:** Distributed Systems, Advanced RDBMS, NoSQL DBMS, Objected Oriented Programming with Java, Linux and Open Source Software, Applied Machine Learning, Blockchain Fundamentals, Statistics for IT Managers, Data Analytics with Tableau, Data Warehousing
- **Awards & Achievements:** Merit based tuition scholarship, Dean's List
- **Leadership:** Secretary (African Graduate Students Association) 3.73/4.0

Ashesi University

Berekuso, Ghana

BSc. Management Information Systems

Aug 2015 – Jun 2019

- **Relevant Coursework:** Operations Management, Finance for Non-finance Managers, Marketing, Quantitative and Qualitative Research Methods
- **Awards & Achievements:** Ashesi Scholarship Fund, Dean's List 3.51/4.0

WORK EXPERIENCE

Graduate Teaching Assistant, Carnegie Mellon University

May 2023 – Dec 2023

- Served as a liaison between faculty and students to address student concerns on a weekly basis.
- Tutored and reviewed students' assignments and projects to ensure writing standards were met per grading rubric.

Implementation Specialist Intern, System Automation

Jul 2023 – Aug 2023

- Supported the creation of user training materials and conducted training sessions, empowering clients to effectively utilize and maintain MyLicense software.
- Conducted research for an initiative to automate employee appraisal process by implementing a 360-degree assessment tool for about 60 employees leading to quicker turnover of appraisals in 2 weeks rather than a month.

SDET Intern, SOIL Campus

Jun 2023 – Jul 2023

- Developed intuitive and responsive user interfaces using HTML, CSS, and JavaScript frameworks like React, Angular, or Vue.js, ensuring cross-browser compatibility.
- Implemented REST APIs using Python frameworks and JSON objects and integrated with databases to manage data storage, retrieval, and manipulation.
- Designed and optimized database schemas to meet application requirements, ensuring data integrity and efficient data manipulation.
- Monitored application performance, system testing, identify issues, and implemented necessary optimizations using RPA tools.

Chief of Staff, Alirtify, San Francisco, CA

Aug 2020 – Aug 2022

- Mobilized resources to carry out a market-fit study with over 4000 candidates in less than one week by performing consumer discovery activities to ascertain consumer-product fit using 65% of budgeted funds.
- Utilized consumer analytics to develop requirements to communicate to the software developers and user interface / user experience designers for prototype development using Figma wireframes.
- Conducted QA / QC (quality assurance and quality control) research by reviewing mobile app features, code reviews and testing and work collaboratively with app development team, resulting in a reduction in application response time from 9 to 5 seconds.
- Developed customer personas and stories, to help with creating use cases and developing metrics and prototypes which were essential in the iterative app feedback with consumers.

ACADEMIC PROJECTS

Capstone Project, Bipartisan Policy Centre

Oct 2023 – Dec 2023

- Developed solutions including a python program to update in house data to reflect changes in publicly released immigration data from the US Border Patrol Dashboard to enable accurate and quick policy analysis and prevent data growth problems.

Class Individual Project, Data Warehousing

Oct 2023 – Dec 2023

- Worked on an end-to-end development project, building a working data platform for New York City transit datasets. The project involved the implementation of data ingest techniques, transforming data using dbt, writing advanced SQL for data analytics including geographic and time series and comparing modern and classic strategies of data modelling.

Android Mobile App Development Project, Distributed Systems

Mar 2023 – Apr 2023

- Built a distributed android mobile app which presents stock data intelligence, functionalities for industry comparisons and news on a user specified company pulling data from 3rd party APIs, RESTful web service, Postman and a dashboard for monitoring app analytics related to access and some business logic.

Class Teamwork Project, Advanced Relational Database Management

Jan 2023 – Mar 2023

- Designed and built a database, functions, triggers, and procedures for a bottled water delivery company using Oracle Developer Suite and PL/SQL queries, using strategic business requirements and specifications analysis to develop business logic assumptions.

TECHNOLOGIES/SKILLS

- **Tech:** Java, Python, Linux/ Unix, Android, HTML, CSS, JavaScript, PL/ SQL, MapReduce, Spark, Hadoop, UiPath, Atlassian Jira, Infogram, Tableau, Postman, MS Office, MS Excel, MS PowerPoint, AWS S3Buckets, ELT/ ETL pipelines, Robotic Process Automation, Oracle Relational Database 11g, Redis, MongoDB, Cassandra, Neo4j, MySQL
- **Certifications:** Scrum Master, Product Owner
- **Skills:** Public Speaking and Presentation, Excellent Written & Verbal Communication Skills, Technical Documentation
