

Mani kapisetti

Java Full Stack Developer

☎ 315-728-9211

✉ kapisettichakramani@gmail.com

OBJECTIVE

Experienced Java Full Stack Developer devoted to delivering high-quality, scalable, and efficient solutions, I aim to utilize my technical skills, collaborative mindset, and problem-solving abilities in crafting robust applications that exceed client expectations while continuously expanding my knowledge in emerging technologies.

SUMMARY

- Over 5+ years of professional IT (Information Technology) experience in developing scalable, reliable and efficient enterprise applications using **Java/J2EE** technologies. Strong Working experience in Design, Development and implementation of several **J2EE** frameworks like (**Model View Controller**) **Struts Spring, Hibernate** and **EJB**.
- Implemented **Spring boot microservices** to process the messages into the **Kafka cluster** setup. Expert level skills on **Angular, CSS3, HTML5, Node JS, jQuery, JavaScript, React JS, AJAX, JSON, Tag Libraries**.
- Thorough knowledge in using **UML, XML parsers (SAX, DOM), SOAP, HTML** and **DHTML**.
- Experience in using core Technologies **Java, J2EE, Servlets, JSP, JDBC, JavaBeans, JavaScript, JNDI, HTML**
- Used testing frameworks like **JUnit, Selenium, HTTP Unit, DB Unit, STIQ, and JMock**. Design, analysis and modeling of n-tired, Object-Oriented system architectures using **Rational Rose**. Good Knowledge on working with **OAuth 2.0** to provide authentication and authorization to **RESTful Web Services** by exchanging **Access tokens**.
- Knowledge on various **Docker** components like **Docker Engine, Hub, Machine, Compose** and **Dockers Registry**.
- Proficient in using **Amazon Web Services(AWS)**. Extensive experience in focusing on services like **EC2, AWS Lambda, VPC, Cloud Watch, Cloud Front, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS**. Experience in the development of service-oriented architecture applications, good understanding of **Object-Oriented Design** and **Design Patterns**.
- Experience with Version Control tools like **GIT, GitHub, CVS, SVN** and build tools like **MAVEN** and **Gradle** with Integrated Development Environments like **Eclipse** and **IntelliJ** and **STS**. Familiar with designing and coding Stored Procedures, Triggers, Cursors and Functions using **PL/SQL**.
- Experience in using core Technologies **Java, J2EE, Servlets, JSP, JDBC, JavaBeans, JavaScript, JNDI, HTML, XML, Web services, Angular, Angular 2 Bootstrap framework, jQuery**. Experienced in **Java** Application Development, Object Oriented Concepts, Object Oriented Design (**OOD**), Object Oriented Analysis (**OOA**), Object Oriented Programming (**OOP**) and its implementations.
- Strong experience in **Spring** modules -**Spring MVC, IOC, AOP, JDBC, JTA, IO, Spring Boot, Spring Microservices, Spring REST, Spring Eureka, Spring Ribbon, Spring Netflix, Spring Boot Zuul API Gateway**. Automated the deployment process by integrating code repository using build pipeline **Jenkins, Bamboo** and **CI/CD** for Continuous Integration and Continuous Deployment that can run on the cloud or on-premises.
- Extensive work experience in all phases of Software Development Life Cycle (**SDLC**) including Requirement Analysis, Design, Coding, Testing and Implementation in **Agile (Scrum), TDD** Environment.

EDUCATION

- Master of Computer Engineering from Syracuse University, Syracuse, USA

SKILLS

Programming Languages	Java, Groovy, SQL, JavaScript, HTML, C/C++/ C#, Python, HTML5, CSS, Node.js
Java Frameworks	Spring Framework, Elasticsearch, Spring Data JPA, Spring JDBC, Hibernate, Spring Rest Docs, Spring Security, Log4J, Apache Camel
AWS Skills	EC2, SQS, S3, Bean Stalk, Chime, Agora, Lambda
RDBMS	MySQL, PostgreSQL, MongoDB
Unit Testing	Junit, Mockito, Spock
Build Tools	Maven, Gradle, Docker, Docker Compose
CI/CD	Jenkins
Monitoring Tool	New Relic, Kibana, Splunk
Web Server	Apache Tomcat
Version Control	GitHub, Git
Development methodology	Agile, Waterfall
Mobile Development	Android Studio
Operating System	macOS, Windows, Linux

EXPERIENCE

Client: Stifel

Sept 2023 - Present

Role: Java Full Stack Developer

Missouri - US

Description: Stifel Financial Corp. is an American multinational independent investment bank and financial services company. It offers securities-related financial services. It's a full-service retail and institutional brokerage and investment banking firm.

Responsibilities:

- Responsible for the overall layout design and prototype using **React JS** with **Redux library**, **jQuery UI**, and **CSS/Less** and **HTML5**. Worked on **RESTful web services** to send the data using **JSON objects**.
- **ANT** was used as a build tool. Also worked in an agile work environment. Extensively used **Jenkins** for **CI/CD** and used **SVN** for version control and used **STS** as the **IDE** for developing the application.
- Hands on experience in creating **Docker** containers and images and deployed the code using **Docker** and **AWS** Services.
- The views are programmed using **JSP** pages with the **struts** tag library; Model is the combination of **EJB's** and **Java** classes and web implementation **controllers** and **Servlets**. Deployed our application on Pivotal Cloud Foundry (**PCF**) which is used to reduce the development overhead by providing a ready to use platform.
- Consumed **Web Services** by implementing **Spring REST** support is to make the development of **RESTful** Web services.
- Supported microservice authentication service provider using **Java Cryptology Extensions' Cipher** class **API**.
- controllers, and directives for the front-end **UI**, while consuming **RESTful** web service **APIs**. Responsible for application availability and outage calls during Outage of the application. Involved in building the code using **Ant** & deploying on web logic server. Used **JavaScript** and **jQuery** for validating the input given to the user interface.
- Involved in designing, capacity planning and implementing multi-rack **Cassandra cluster**. Implemented **Router** Module of **Angular 11** to make the whole project a **Single Page Application** and add routers according to the requirements.
- Involved in design, Development and implementation of Product Lifecycle admin site based on **'MVC'** architecture and Front control design pattern using **Spring MVC** Framework for Presentation tier and server-side **J2EE** technologies.
- Good knowledge of **Amazon Web Services (AWS)**, **Amazon Cloud Services** like **Elastic Compute Cloud (EC2)**, **Simple Storage Service(S3)**, **Amazon Simple DB**, **Amazon Cloud Watch**, **SNS**, **SQS**, and **LAMBDA**.
- Used **Azure DevOps** tool as source control repository. Expertise in coding optimized **SQL** queries on databases like **Oracle**.

- Done with **Unit testing** using **JUnit** and **Mockito**. Experience with **python** and **Django** framework. Extensive expertise in **Kubernetes**, orchestrating containerized applications for efficient deployment, scaling, and management.
- Implementing or exposing the **Microservices** based on **RESTful API** utilizing **Spring Boot** with **Spring MVC**.
- Work with front-end technologies such as **HTML**, **CSS**, **JavaScript**, **jQuery**, **Angular** or **React**. Involved in **CI/CD** process using **GIT**, **Nexus**, **Jenkins** job creation, **Maven build**, Create **Docker** image and deployment in **AWS** environment.
- Developed the **REST Microservices** using **Java JDK 1.8**, **Scala**, on **IntelliJ** platform by gathering the knowledge of previous phase resources and integration with **Oracle**.
- Collaborated with a cross-functional team to ensure effective communication and successful project delivery.

Environment: Java 1.6, Spring AOP, SOA, JMS, JMX, IBM MQ Series, Polymer, REST, SOAP, AngularJS, JSP, JSF, Axis, SOAPUI, Hibernate, JPA, ORM, JDBC, JNDI, XML, XSD, JAXB, JAXP, Design Patterns, GIT, JUnit, ANT, JTA, Maven, WebSphere, Selenium, PL/SQL, Oracle, NoSQL, Linux, Log4J, UML, Agile and Oracle 10g.

Client: Defender Pharmaceuticals, In

Oct 2022 - Aug 2023

Role: Java Full Stack Developer

Missouri - US

Description: Defender Pharmaceuticals, Inc. operates as a development-stage pharmaceutical organization. The Organization focuses on the discovery, development, and partnering of anti-vomiting and anti-nausea compounds for both the human and veterinary markets.

Responsibilities:

- Involved in various phases of Software Development Life Cycle (**SDLC**) such as requirements gathering, modeling, analysis, design, and development. Working on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL invoker**, **UNIX** shell scripting and **core java**.
- Used **Hibernate**, object/relational-mapping (**ORM**) solution, technique of mapping data representation from **MVC** model to **Oracle** Relational data model with **SQL-based schema**. Involved in web services design and development. Deployed static websites and several supporting **APIs (Node.js)** following a server less architecture in **AWS (API Gateway, AWS Lambda & Lambda @Edge, Cloud Front, Dynamo DB, S3, and more)**.
- Implemented **SOAP** based **JAX-WS** Web services interfaces for integrating multiple systems, code re-usability and consumed **JMeter** to test performance of **SOAP** protocol.
- Played key role as senior developer during development of next generation **microservices**. Worked in configuring **CI/CD(Continuous Integration/Continuous Deployment)** tool **Jenkins** for project builds and automation of deployments.
- Implemented a metrics collection mechanism for the server by utilizing **Apache Kafka** to stream server-side events.
- Developed **Single page application** with **Angular 8**, **DXP** local component, **HTML**, **CSS5**, and **Typescript**.
- Used Web services, Web Processing Service (**WPS**), **BPEL**, and **REST** extensively for Operations module. Technologies **SOA**, **SOAP**, **MTOM**, **TCPIP**, **TLS**, **PKI**, **WSDL**, **SAML**, **XSD**, **XPath**, **JMS**, and **MDB** are also used.
- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **Agile** methodology (**SCRUM**) in a test-driven development (**TDD**) approach.

Environment: Java 1.7, Spring 3.5, Hibernate 4.2, Spring Quartz, Spring Boot, Maven, JSF, JUnit, TestNG, Angular JS, Node JS, HTML4, AWS, Gem fire, jQuery, GWT, JMS, Micro services, CI/CD, Selenium, JMeter, PL/SQL, Boss, NoSQL, Linux.

Client: Universal Sampo General Insurance Company

Apr 2020 - Jul 2022

Role: Java Full Stack Developer

Mumbai - India

Description: Universal Sampo is a leading general insurance provider offering a range of insurance solutions for varied needs. It offers affordable products with comprehensive coverage benefits. I analyzed the user requirements to define business objectives.

Responsibilities:

- Used **AWS dynamo DB** for storing config values and utilized as flags to control the code flow. Worked on **JSP**, **Servlets**, **Struts** framework and production support issues of the existing applications.

- Hands on knowledge of **Git, Jenkins, AWS Cloud Technologies, RDBMS (PostgreSQL)**.
- Designed and developed **microservices** with **Spring Boot 2.0** and **Spring REST**. Implement **API Service** using **Apache Camel**. Developed **REST APIs** using **Java 8, Play framework** and **Akka**.
- Performed **UI testing** and front-end testing using **Selenium**. Used **Firebug** to do web-based application testing with **Selenium** for the commands and locator application. Made use of **Reactive** Forms using **Angular 8.0** where most of the validation is done using component rather than using template-driven which provides in **HTML**.
- Used **JMS** for the asynchronous exchange of critical business data and events among **J2EE** components and legacy system. Used **jQuery** to build accordion style content, drag and drop functionality, calendar, popup, and modal windows.
- Implemented the online application by using **Core Java, Multithreading, JDBC, JSP, Servlets, Web Services**.
- **JUnit** frameworks were used for performing unit and integration testing by writing test cases. Created **JUnit** test cases to automate the testing of business logic. Use **log4j** or other logging frameworks for application logging and trouble shooting.
- Expertise in developing the multi-tier web applications in both **Spring MVC** and **Struts MVC** that ensures clear separation of layers and rapid application development.
- Developed Servlets for server-side transactions and made use of **AJAX** for server-side processing without refreshing **JSP** page. Used **IntelliJ IDEA IDE tool** for application development. Involved in various **SDLC** phases like Requirement gathering, Design, Analysis and Code development. Modified existing Shell scripts in **Unix** to call daily sub routines. Involved in multi-tiered **J2EE** design utilizing **Spring** Inversion of Control (**IOC**), **AOP**, **MVC** and **Hibernate**.
- Developed and adhered to best practices in application development, with a strong focus on scalability and relevance, leading to optimized system performance and enhanced user experiences.

Environment: Java 1.8, Spring 4.3, Security, Hibernate5, Spring Boot, Micro services, HTML5, CSS3, Angular JS, JavaScript, Node JS, NPM, Postman, Tomcat, Apache Kafka, PCF, Mockito, RESTful, SOAP, Selenium, JMS, CURL, TestNG, SOAP UI, JMeter, Apache Spark, NoSQL, Cassandra, JUnit, Git, Maven, Jenkins, Log4j, JIRA, Linux, GitHub and Oracle.

Client: GoApptiv Private Limited

Jun 2019 - Mar 2020

Role: Java Developer

Mumbai - India

Description: GoApptiv is revolutionizing the healthcare and pharmaceutical company. Its software portfolio includes a digital payment and promotional platform, a doctor-patient engagement platform, and a data analytics platform, and empowers every stakeholder in the healthcare ecosystem.

Responsibilities:

- Developed prototype and project layout skeletons using **React** with **Typescript, jQuery, HTML5**, and **CSS3**. Designed and developed **RESTful Micro services** using **spring boot**.
- Experience in Analysis, Design, Development and Testing of the application using **agile** methodology.
- Mainly involved in deployment activities **CI/CD** deployment and familiar with **OSE** (Open shift origin). Also made changes in **Jenkins** Files as per the requirement of the pipeline. Work on escalations regarding **AWS Cognito**. Extensive use of **Struts** Framework for Controller components and view components.
- Implement caching mechanisms to improve application performance using **Spring Cache**. Exposed Survey **API** to other applications in **DOE** using **Apache Axis2**. Designed and Developed **UI** using **JSP** by following **MVC** architecture.
- Developed the application under **J2EE** Architecture using **Spring, Struts, Hibernate, Servlets, Web logic** and **JSP**.
- Implemented **AJAX** calls from backend without page refresh using **jQuery, AJAX, J2SE, Spring MVC** and **Hibernate**.
- Developed **REST API's** using **Spring MVC** and **spring boot**, hosted all **micro services** on **PCF**. Developed applications using **Angular 6** and **Java 8** new feature (**lambda expressions**).
- Implemented **core java** Multithreading, Collections, Exception Handling, and **OOP's** concepts. Involved in **JUnit** testing, **JSON** parser & maintaining data accuracy. Extensively used **JUnit** and **Mockito** for writing unit test cases.

Environment: Java 1.5, JavaScript, AJAX, JSP, Servlet, JMS, Spring MVC 3.0, Hibernate 3.0, Axis2, JPA, WebLogic Jenkins, ANT, HTML, SVN, XML, Cloud Foundry, Unix Shell Scripting, SQL, Windows, and Oracle 9i, Tomcat, Jasper reports.
