EXPERIENCE

Senior Software Engineer

Sentri Pay

02/2023 - Present Tampa, FL

- Developed a high-performance financial trading platform at Sentri Pay, architecting a hexagonal, microservices-based, event-driven backend using **Python**, **Django**, and **FastAPI**.
- Optimized **PostgreSQL** and NoSQL databases, and implemented **Redis** caching to enhance scalability and handle high-traffic demands for Sentri Pay.
- Developed **RESTful APIs**, GraphQL, and gRPC services, and implemented an event-driven system using **Kafka**, **RabbitMQ** for real-time data processing to support the scalability and integration of Sentri Pay's platform.
- Developed a high-performance frontend using **React**, TypeScript, and Redux, implementing lazy loading and optimized state management to enhance load times.
- Streamlined AWS cloud infrastructure using **Git**, **Docker**, **Kubernetes**, **Terraform**, AWS DevOps, and EKS to automate deployments, manage version control, and enhance scalability for Sentri Pay.
- Enhanced productivity and collaboration by integrating third-party services like **Stripe**, **PayPal**, Google, and Facebook for secure, seamless transactions, improving team efficiency and user experience on Sentri Pay's platform.
- Implemented a fraud detection model using **Python** and machine learning to enhance fraud prevention at Sentri Pay.
- Implemented strong security between microservices and external communications using **OAuth 2.0**, **JWT**, and secure API authentication to ensure data privacy and integrity across Sentri Pay's platform.
- Led QA efforts using **PyTest** and **Jest** for testing, while managing tasks in Atlassian Jira to ensure platform reliability through collaborative code reviews at Sentri Pay.

Full Stack Engineer

Bolt

09/2020 - 02/2023 Austin, TX

- Led the development of the Bolt SaaS Platform using microservices architecture, event-driven design, Domain-Driven Design (DDD), Python, Flask, FastAPI, and AWS.
- Enhanced communication architecture with Kafka, RabbitMQ, and GraphQL, gRPC services, enabling real-time data processing and seamless inter-service communication.
- Optimized databases and caching using PostgreSQL, MongoDB, Redis, and AWS to support Bolt's transaction demands and enhance data access performance.
- Built a high-performance frontend with **React**, TypeScript, Redux, and Hooks, utilizing lazy loading and optimized state management to improve load times.
- Implemented DevOps on AWS cloud using Git, GitHub Actions, Docker, Kubernetes (EKS), and Terraform, leveraging services like AWS EC2, S3, RDS, and Lambda to enhance scalability and streamline deployments.
- Led QA efforts with Jest, PyTest, Agile methodologies, and Atlassian Jira to enhance reliability and reduce bugs.

Full Stack Developer

Migraine Buddy

11/2018 - 08/2020 Congers, NY

- Architected a scalable Patient Management System using microservices and event-driven architecture with Python and Django, ensuring scalability and adaptability for future growth.
- Built a high-performance backend with Python, Django, and SQLAlchemy, delivering reliable APIs and efficient data access.
- Designed and implemented an event-driven architecture with RESTful APIs and RabbitMQ to enable real-time data processing and support platform growth.
- Optimized data architecture with PostgreSQL and AWS RDS, improving query speeds, data retrieval efficiency, and response times for high-traffic demands.
- Developed a high-performance frontend with React and JavaScript, optimizing state management and load times with lazy loading.
- Spearheaded QA efforts using Selenium, applying Agile methodologies and Atlassian Jira to improve reliability and minimize bugs.

SUMMARY

Senior Software Engineer with **8+** years of experience building high-performance backend solutions for financial technology, cloud-native applications, and scalable web services. Expert in **Python**, **Django**, Flask, and **React** with a strong foundation in microservices, event-driven architecture, and RESTful APIs. Proficient in SQL/NoSQL databases and skilled in deploying backend services on AWS. Experienced with Docker, Kubernetes, and CI/CD automation.

Collaborative and experienced in Agile methodologies, technical documentation, and leading cross-functional teams to deliver scalable, reliable, and efficient solutions.

SKILLS

Programming Languages

Python	JavaScript	TypeScript	Python	
SQL				
Frontend Technologies				
React	Next.js	Hooks	Context API	
Redux	RxJS	HTML5	CSS3	SASS
BootStrap	jQuery			

Backend & Middleware Technologies

Python	Django	Flask	FastAPI
RabbitMQ	RESTful APIs	GraphQL	
WebSockets	Apache Kafka		

Database Management & Data Engineering

PostgreSQL	MySQL	MongoDB	Redis
AWS RDS	AWS DynamoDB		

DevOps & CI/CD

Docker	Kubernetes	Jenkins	GitLab CI
GitHub Actions	Terraform	Git	
CI/CD Pipelines			

Cloud Platforms

AWS	Lambda	API Gateway	S3	RDS
EC2	EKS	Azure		

Quality Assurance & Testing

PyTest	Jest	Cypress	Enzyme
--------	------	---------	--------

EXPERIENCE

Junior Node.js Developer

GoGuardian

📅 05/2017 - 10/2018 📍 EL Segundo, CA

- Contributed to the Education project by applying MVC patterns and OOP to optimize transaction speed, reduce maintenance costs, and support scalable growth.
- Leveraged Node.js, Express.js, and Sequelize to build a high-performance backend, driving faster API responses and enhancing data access efficiency.
- Optimized data infrastructure with MySQL, achieving faster query speeds, improved data retrieval times, and scalable transaction support for high-traffic demands.
- Developed RESTful APIs to streamline data flow, enhance interoperability, and achieve faster response times for seamless integration with third-party applications.

EDUCATION

Bachelor of Science in Information Technology

Strayer University

📅 09/2013 - 05/2017 📍 Tampa, FL

SKILLS

Software Design & Architecture

Microservices Architecture	SOLID	TDD
Event-Driven Architecture	OOP	
Hexagonal Architecture	DDD	

Methodologies & Soft Skills

Agile	Scrum	Kanban	SDLC
Collaboration	Mentorship	Leadership	

Additional Tools & Technologies

Visual Studio Code	ESLint	Prettier
--------------------	--------	----------
