

SIDDHARTH BHARDWAJ

DATA ANALYST

Location: NY, USA | Phone: 347-880-3416 | Email: sidbhardwaj.igd@gmail.com | [LinkedIn](#)

SUMMARY

- Experienced **Data Analyst** with **4 years** of experience skilled in data extraction, cleaning, and analysis from various databases including **MongoDB**, **SQLite** and utilizing **Python**, **Excel** and **SQL**.
- Proficient in **data visualization** and analysis using tools like **Anaconda**, **Spyder**, **Tableau** and **PowerBI** to create interactive dashboards and reports.
- Experienced in developing customer segmentation models using **clustering** algorithms in Python.
- Familiar with project management tools such as **Microsoft Project** and communication platforms like **Slack** for effective task management and team collaboration.
- Demonstrated expertise in process automation, efficiency optimization, stakeholder management, and root cause analysis **methodologies**.
- Applied advanced data analysis techniques and **machine learning algorithms** in Python, R and SQL for predictive maintenance modeling in the healthcare sector.
- Proficient in utilizing cloud-based solutions like **AWS** for data storage and model deployment.
- Skilled in leveraging various data visualization tools like **Tableau** and **PowerBI** to present insights effectively and aid in decision-making processes.
- Successfully led the development and launch of a food management app and contributed to the enhancement of Dyson's business model through strategic value proposition development.
- Proficient in utilizing Python, SQL, MongoDB, and APIs for **data preprocessing**, **exploratory data analysis**, **predictive modeling** and **trading execution strategy development**.

SKILLS

Programming Languages:	Python, SQL, R, LINGO, HTML
Tools:	Anaconda, Spyder, Tableau, PowerBI, Visual Studio, MongoDB, SQLite, Excel, Azure, Slack, Oando, MT4 Trader, JupyterHub, Microsoft Projects, Microsoft Vision, AWS
Data Analysis & Extraction:	Data Cleaning, Data Preprocessing, Exploratory Data Analysis, Machine Learning, Clustering Algorithms, Predictive Modeling, Data Retrieval, Data Management, Data Warehousing, Web Scraping, API Integration, Data Management, Classification, Regression, Clustering, Natural Language Processing, SVM, REST API, Data Visualization, Risk Analysis, Real-time Analytics, Inventory Analysis, LLMs, AI in Business, Freemium Analysis, Inventory Management, API Integration, Machine Learning, Big Data, Business Intelligence (BI), Statistical Analysis, Quantitative Analysis, Database Management, Data Science, Automation, Digital Marketing, Data-Driven Decision Making, Market Analysis, Financial Analysis, IoT (Internet of Things)
Project Management:	Resource Planning, Estimate Calculation, Critical Path Analysis, Timely Delivery, Requirement Gathering, Requirement Elicitation, Activity Tracking, Schedule Tracking, Implementation, SDLC, Communication, Agile (Scrum), Software Development Life Cycle (SDLC), Stakeholder Management
Visualization & Reporting:	Data Visualization, Dashboard Creation, Report Creation, Dynamic Dashboards, Gantt Chart
Business & Financial Analysis:	Industry Trend Monitoring, Financial Planning, Financial Execution, Strategic Planning, Risk Analysis, Defect Severity Analysis, Priority Analysis, Financial Planning, Budgeting, Financial Modeling, Investment Analysis
System Analysis & Design	System Design, JAR, JAD, Work Breakdown, Entity Relationship, Data Flow, Structure Chart, Flow Chart
Application Development:	App Development, Feature Implementation, User Support, User Experience Optimization, Barcode Scanning Integration
Research & Publication:	Market Analysis, Value Proposition Development, Financial Performance Improvement, Innovation Alignment, Competitive Analysis
Analytical:	Hypothesis Testing, Regression Analysis, Clustering, Data Preprocessing, Exploratory Data Analysis, Predictive Modeling, Key Performance Indicators, Market Research, Statistical Analysis, Quantitative Analysis, Data Mining, Business Intelligence (BI), Statistical Analysis, Quantitative Analysis, Data Mining

EDUCATION

Masters in Management of Technology | **New York University**, USA

Sep 2022 – May 2024

Bachelor of Business Administration | **Maharaja Agrasen Institute of Management Studies**

Aug 2016 – May 2019

EXPERIENCE

DATA ANALYST | CAPITAL ONE, USA

JAN 2024 – JUN 2024

- Extracted, cleaned, and analyzed customer data from MongoDB and SQLite databases using Python and SQL.
- Utilized Anaconda and Spyder for data analysis and visualization.
- Developed customer segmentation models using clustering algorithms in Python.
- Created interactive dashboards and reports using Tableau and PowerBI.
- Conducted HTML data scraping for additional customer data sources.
- Managed project tasks and timelines using Microsoft Project and communicated progress to the team using Slack.
- Implemented a prototype recommendation system using LINGO to suggest products to customers based on their segment.

DATA ANALYST | CAPSTONE - NYU, USA**JUN 2023 – DEC 2023**

- Conducted multi-channel research and data analytics to identify market preferences for sustainable cleaning products.
- Developed and integrated data pipelines to support a Residence-Centric CRM system for compliance and budget flexibility.
- Leveraged advanced SEO and content marketing techniques to enhance digital visibility and customer engagement.
- Implemented data collection frameworks and feedback mechanisms to refine products based on end-user insights.
- Achieved significant improvements in operational efficiency and sustainability practices for high-end residential managers.

DATA ANALYST | INFOSYS |**FEB 2020 – DEC 2021**

- Implemented process automation leveraging Simility platform to streamline finance department operations, demonstrating proficiency in automation tools and SQL.
- Optimized efficiency by introducing a new business process resulting in a 15% increase, showcasing expertise in process improvement, optimization, and Excel.
- Conducted data analysis and presentation, developing, analyzing, and presenting key performance indicators to senior management, highlighting proficiency in data analysis and reporting tools like Tableau, PowerBI, as well as Excel and SQL.
- Managed stakeholders, achieving stakeholder satisfaction by aligning project goals with their needs, showcasing strong stakeholder management and communication skills, along with Excel and SQL proficiency.
- Analyzed sales data, conducting thorough analysis of sales data, identifying areas for improvement and making revenue-boosting recommendations, demonstrating proficiency in data analysis and business strategy, including Excel, SQL and Python.
- Conducted root cause analysis, analyzing various operational metrics including inventory control, material sourcing, and lead times, showcasing expertise in problem-solving and root cause analysis methodologies, including SQL and Excel.

DATA ANALYST | WIPRO |**AUG 2019 – JAN 2020**

- Utilized SQL and Excel to monitor industry trends, enhancing financial planning and execution strategies.
- Guided prestigious clients such as KPMG, PWC, Amazon, and Walmart in handling claims worth up to \$1,000,000. Utilized Excel, TBA, and Alight technologies for efficient processing.
- Conducted analysis for over 50 companies, including industry giants like Amazon and Walmart, to ensure accurate claim processing, strategic planning, and informed decision-making utilizing the Delphi method and Data Analysis.
- Employed data visualization tools such as Tableau and PowerBI to present insights effectively and aid in decision-making processes.

DATA ANALYST | PHILIPS HEALTHCARE |**MAY 2018 – MAY 2019**

- Developed and implemented a predictive maintenance model for medical equipment at Philips Healthcare.
- Utilized advanced data analysis techniques and machine learning algorithms in Python, R, and SQL to analyze historical maintenance data and predict equipment failures before they occur.
- Conducted data cleaning and feature engineering using Excel and SQL to optimize predictive accuracy.
- Leveraged AWS for cloud-based data storage and model deployment.
- Successfully deployed the model, resulting in a significant reduction in unplanned maintenance costs and increased equipment uptime.

RESEARCH AND PUBLICATIONS**Safe Plate - The App for Managing Food Safety**

- Developed and launched the Safe Plate Food Management App, managing resources and meeting project goals within budget.
- Implemented features like barcode scanning and strategic partnerships to enhance user advantages.
- Utilized metrics, functional optimization, and proactive user support to enhance user experience and integrate feedback.

Dyson Zone 2.0

- Analyzed Dyson's business model, identified areas for enhancement, and led the creation of a persuasive value proposition for various customer segments.
- Leveraged Dyson's strengths in innovative product design and technology to establish a distinct market position.
- Implemented strategies that improved the company's financial performance and aligned with Dyson's commitment to innovation.

Navigating Consumer Complaint Database

- Used Python for data preprocessing, exploratory data analysis, and predictive modeling, employing machine learning algorithms for accurate predictions.
- Created dynamic Tableau dashboards to present data insights and trends to key stakeholders.
- Employed SQL and MongoDB for effective data retrieval and management, ensuring smooth integration and warehousing.
- Utilized APIs and external services to enhance the trading system's functionalities
