SUMMARY

I possess expertise in Linux, CMD, Putty, and various command-line interfaces, as well as proficiency in programming languages such as Python and Java. With a strong background in cloud-based solutions and cross-functional collaboration, I excel in developing innovative, scalable applications utilizing cutting-edge technologies. As an AI and machine learning enthusiast, I have demonstrated experience in designing, deploying, and maintaining AI-driven solutions, ensuring optimized performance and advanced functionality

TECHNICAL SKILLS

- **Languages:** Python, Java, C#, JavaScript, Ruby
 - **Cloud & DevOps:** Expertise in deploying AI/ML models in Azure, AWS, and GCP. Skilled with Docker, Kubernetes, and CI/CD pipelines.
 - **Frameworks & Libraries:** Spring Boot, Angular, NodeJS, React, Pandas
 - **APIs & Integration:** Proficient in designing and integrating REST APIs and Fast APIs for seamless communication between services.
 - **Databases:** SQL, MySQL, PostgreSQL, ETL for database design and queries
 - **Automation & Scripting:** Linux, PowerShell, Bash
 - **Data Visualization:** Power BI for data analysis and reporting
-

EDUCATION

Penn State University, Pennsylvania

Bachelor of Science in Computer Science / Information Sciences & Technology | 01/2018 – 08/2021

Bellevue College, Washington

Associates Degree in Computer Science | 09/2013 – 06/2016

PROFESSIONAL EXPERIENCE

Links Education

Instructor: Coding Languages | March 2023 – Present

- I volunteer my time to educate early learners in computer science fundamentals, fostering interest in AI, machine learning, and LLM development.
- Mentor students on cloud environment, AI applications, promoting early engagement with AI technologies.

General Motors

Robotics AI Developer/DevOps Engineer | March 2022 – March 2023

- Working with Azure to build pipelines for CI/CD tooling, using git commands and Kubernetes for automation, Linux, etc.
- Working with GrPC interface for automation, using SQL/PostgreSQL for database design/queries, writing Python and C# code to automate tasks, using .NET and Java for yaml files, etc.
- Developed and deployed AI solutions, using Linux, and various command-line interfaces, Python, Java and C#.
- Leveraged cloud technologies (Azure) design CI/CD pipelines, optimizing AI application deployments.
- Integrated AI-driven automation into robotic processes, improving operational efficiency.

The Pursuit By You

Data Systems Integrator/Database Engineer | May 2021 – March 2022

- Experience in planning, developing, and implementing company app. Used Node.JS, React to build applications
- Used Figma to redesign and improved company websites, API integration and automation.

T-Mobile USA

Engineer – Systems Design & Software | May 2017 – November 2019

- Designed and built tools to save how much time the team spent on tasks and increase efficiency by 50%.
- Developed and deployed network technology software/automation with a short time with timesaving 35%.

- Fixed software bugs, performed integration, configuration, to eliminate discrepancies. This saved 7% revenue.
 - Scripted with Putty, CMD, Linux, and other Command prompts with a quick integration results and productivity.
 - Implemented, automated unit/regression, and performed testing for datafill, with just about 15 minutes down time.
 - DevOps and continuous integration practices and platforms with high efficiency integration nodes.
 - Worked with Power BI and SQL extensively to build and improve tools performance by 70% time saving.
 - System architecture, TCP/IP, DNS, DHCP, HTTP, VPN, Firewall, providing high network security resources
-

ADDITIONAL HIGHLIGHTS

- Experience with **CUDA** and model optimization for AI applications.
 - Strong problem-solving abilities, with a focus on algorithmic thinking and innovation.
 - Excellent communication and collaboration skills, thriving in cross-functional team environments.
-

KEY ATTRIBUTES

- **Achievement-Oriented:** Proven track record of excellence in all AI-related projects.
 - **Critical Thinking:** Strong analytical skills for improving AI models and applications.
 - **Team Player:** Collaborative and articulate, capable of working effectively across teams.
-
